# REPORT

OF THE

# SELECTMEN.

---

In submitting our annual report at the close of the year 1895, we present to the citizens of Arlington a record of a busy and important year in the history of the town. During this year the High Water Service has been completed and put into operation, thereby securing unusually good fire-protection within its limits; a new and substantial school building is nearly completed in the Crosby district; the first section of our sewer system connecting with the Metropolitan system is finished and ready for admitting the house services in the early spring. Authority was given the Sewer Commissioners, at the Town Meeting in November, to construct sewers for a large portion of the town. Expensive and valuable work has been done upon our streets, and by the end of the coming year they should be in excellent condition, fully maintaining the town's high reputation for good roads. The first steps have been taken towards establishing Public Parks, several localities of great natural beauty have been selected for this purpose. The several appropriations made to cover all these improvements come well within the proper debt limit of the town, and comprise nearly all of the large items of indebtedness that we have looked forward to with more or less apprehension, as liable, when they did come, to largely increase our rate of taxation.

By a conservative course and careful consideration of all appropriations, with an eye to the most needed and desirable improvements, much may be done to make our town attractive without adding materially to the burden of our citizens. Situated six miles from the business centre of the city of Boston, and well within the Metropolitan district, our town presents one of the most beautiful spots for suburban homes in the whole district.

A more general interest seems to have been taken during the past year in town affairs. The appointment at the last annual meeting of a committee of twenty-one, secured a careful consideration of the proposed appropriations by a larger number of citizens than usually take an active part at public meetings. No question is of greater importance to the welfare of the town than that of an abundant supply of good water. A committee was appointed to carefully investigate the whole subject of our Water Supply composed of the following named citizens :—

John H. Hardy, Howard W. Spurr, Matthew Rowe, Edward C. Turner, J. P. Dennett, E. N. Blake, F. M. Lowe, H. S. Adams, C. W. Allen, William Basset, Henry Hornblower, Theodore Schwamb, Alfred P. Gage, George A. Lloyd, John H. Perry.

So far as material prosperity is concerned, no efforts should be spared to place the town on an equal footing with surrounding towns, and so far as the health of the community is concerned, all efforts, that do not give us good and pure water, are inadequate.

The details of the work on the streets will be found in the report of the Superintendent. Massachusetts avenue still requires a considerable outlay of money to put it in proper condition. The great amount of travel over this avenue occasions a heavy yearly expense to keep it in order. In the past year, a large drain pipe has been laid from "Crusher Lane" along the avenue and into the raceway be-

low the "Hobbs Mill," taking care of a large quantity of surface water in that vicinity.

The condition of Alewife Brook is greatly improved by the removal of all sewer connections on the Cambridge side. The sediment, which still remains at some points in the brook, is to be removed by the city of Cambridge.

## TOWN HOUSE.

Very little has been done to the building during the past year. The interior of the entire building requires substantial repairs, painting and cleaning. The fire alarm signal has been placed in the cupola of the building, being operated by compressed air furnished by a water motor placed in the basement. Some time was required to perfect the apparatus but it now works to the satisfaction of the Engineers and the Selectmen.

## ALMSHOUSE.

The Almshouse remains in charge of Mr. and Mrs. B. F. Durgin, who continue to render excellent and satisfactory service in the care of the institution and its inmates. The number provided for at present is ten, five males and five females.

The buildings have been painted, a fire escape added by order of the State Inspector of public buildings, and concrete laid to carry the rain-water away from the building, and all are now in good condition.

It is evident that further accommodations must be added for the vehicles belonging to the Highway Department, every available space being now occupied.

## POLICE.

The details of the Police Department will be found in the excellent report of Chief Harriman. We recognize the efficient service of the Chief and his officers. It is, however, very apparent, that the territory, now patrolled, is too great

to be properly looked after, by the present number of officers, in the manner which many citizens desire.

The request of the Chief for more men should be carefully considered before an appropriation is made for the coming year.

## STREET LIGHTING.

In accordance with a vote of the town, a contract for three years, with the Somerville Electric Light Company, has been made for lighting the streets, extending from January 1, 1896, to January 1, 1899, at $9000 per year, for the present number of lights, viz., seventy-three and one-half arcs and one hundred and eighteen incandescents; — additional lights to be added at the rate of $90 per year for arcs and $24 for incandescents. As all the lights are burned every night until one o'clock, instead of twenty nights in each month, with an increase of fifty per cent. in lighting, but only eleven per cent. in price, we are of the opinion that it is for the best interests of the town to have made the contract as described.

## FIRE DEPARTMENT.

The town has never been so well equipped in the matter of fire protection as at the present time. Two tests were made by the Selectmen in calling out the department, without any previous warning being given to the members. The response in both cases being very satisfactory, demonstrating that a stream of water can be available, in case of fire, in any part of the town in five minutes from the sounding of the alarm. This department should receive the cordial support of the citizens and tax payers.

The Pierce and Winn Company secured the contract for coal for the year at the following prices:

| | | | |
|---|---|---|---|
| Furnace, Egg and Stove, | at $4.42 | per | ton |
| Honey Brook Lehigh, | at 4.88 | " | " |
| George's Creek Cumberland, | at 3.62 | " | " |

The disbursements, for the various departments, will be found in detail in the Treasurer's report.

EDWARD S. FESSENDEN,
GEORGE D. TUFTS,
EDWIN S. FARMER,
*Selectmen.*

# REPORT

OF THE

# SUPERINTENDENT OF STREETS.

---

*To the Honorable Board of Selectmen:*

GENTLEMEN—I submit to you the following report. A large part of the work done the past season has been of a costly nature, consisting principally of rock and blue gravel excavations. This is especially true of the widening of Massachusetts avenue above Park avenue, Westminster avenue and the extension of Jason street and Glen Road. The rock obtained by blasting the ledge from the first two streets has been teamed to the stone crusher and the gravel used in covering crushed stone on the avenue and in gravelling other streets. The loam, and other materials not fit for surfacing the streets, has been used in making the fill near the West End Car House.

The Steam Drill purchased in the early part of the season has proved a valuable addition to the town outfit, as drilling with hand drills is a slow and costly process.

When the season's work commenced, only such a number of men were employed as it was thought could be assured work for the season, and no man that has complied with the rules of the department has been idle a single day that he wished to work. This has been a new departure, and has resulted satisfactorily to the men, and to the advantage of the town.

The following streets have been repaired with crushed stone and gravel:

### Addison Street

Has been coated over with a light coat of fine crushed stone, well rolled and covered with a light coat of screened gravel at a cost of $325.

### Broadway.

There has been very little work done on this street, except patching and cleaning the gutters, as it was expected the sewer would be built next season. The water-pipe should be laid at the same time, so that after the street is properly graded and macadamized, there will be no need of digging it up. As this will be an expensive street to build there should be a special appropriation for it.

### Bow Street

From Lowell street to the railroad has been gravelled and the brush on the sides cut.

### Claremont Avenue

At Wollaston avenue end has been widened to sixty feet, as was first laid out, the grade lowered and retaining wall built along the line of Mr. W. O. Partridge's land, Mr. Partridge paid for the building of the wall. The cost of the improvement was $312.

### Eastern Avenue

Has been repaired by lowering the sides and scraping into the centre of the street and gravelling the worst places.

### Forest Street

From railroad crossing to the Winchester line has been repaired by a coating of crushed stone in the worst places and gravel on other parts. The gutters have been cleaned the entire length.

### Gray Street.

The ledge near Ravine street has been blasted and removed and, for a distance of about five hundred feet, the street has been graded and coated over with gravel at a cost of $328.

### Grove Street

For about 450 feet from Massachusetts avenue has been gravelled and slight repairs made on other parts. This street could be much improved by lowering the grade at the railroad crossing, so as to go under the tracks, doing away with the present grade crossing. This would not be very expensive to the town, as the Railroad Company and State would pay the largest share of the expense and the material could be used in improving other streets.

### Highland Avenue

Has been improved, by plowing and scraping the high edges into the centre of the street and coating over with gravel.

### Hillside Avenue

Near Wollaston avenue has been filled on the east side making it safe to the public. Slight repairs have been made on other parts.

### Extension of Jason Street and Glen Road

Has been built at an expense of $1422. The crumbly nature of the ledge removed in building these streets made it a valuable material for road making.

By breaking with hammers we were able to make a macadam surface on both streets.

### Lowell Street

For a distance of 500 feet from Massachusetts avenue has been surfaced with crushed stone and gravel.

### Massachusetts Avenue

From Medford street to Crusher lane on south side of Electric railroad has been resurfaced with crushed stone and gravel, many places repaired on north side where needed. Other places between centre of town and Cambridge line have received slight repairs. Work in widening the avenue above Park avenue was commenced about the first of October and has continued with a small force of men until January first, and is nearly completed.

### Mystic Street

At Winchester line has been widened to sixty feet by cutting away the bank on Mr. Dwight's side of the street and building retaining wall. The gravel obtained at this point was used in making the fill in places where the street was less than sixty feet. When this street was first built only about thirty feet in the centre was filled to grade. A railing was placed on each side leaving the street unfinished. To build to line as given by County Commissioners will require about 8000 cubic yards of filling. Work is still progressing on the street.

### Oak Street

Has been improved by cutting brush on the sides, cleaning gutters, and gravelling the worst places.

### Park Avenue

From Wollaston avenue to Lowell street has been resurfaced with crushed stone and gravel.

### Pine Street

Is in an unsafe condition, needing constant care in icy times to prevent teams from sliding over the bank. The only way to make it safe is to widen to 40 feet, build heavy retaining walls, and erect a substantial railing.

### Schouler Court

Has been gravelled its entire length, sidewalks graded and ed over with stone-dust.

### Walnut Street

Has been repaired by scraping edges into centre of street and coating over with blue gravel from Massachusetts avenue to land of Thomas Higgins, and the sidewalk coated over with stone-dust.

### Westminster Avenue

From Lowell street to residence of H. T. Elder has been widened to 40 feet by removing the ledge and bank of gravel on the east side, at an expense of $1300. The street has been gravelled its entire length.

### Wollaston Avenue

Has been widened to 60 feet as was first laid out, a walk built on north side and repaired several times after heavy rains.

The gutters on the street should be paved, as the grade is so steep that it washes badly after every heavy rain. It would be economy on the part of the town to pave the gutters on all hilly streets.

There have been many slight repairs made on other streets and a thorough cleaning of the streets was accomplished before cold weather set in.

### Sidewalks.

There have been 2510 yards of concrete walk laid and 700 yards of old concrete top-coated. A large part of the concreting has been done at the town's expense, as in many places the grade was changed to conform to centre of street, and in other places the concrete was rough and uneven, caused by the roots of trees. Gravel walks have been extended on many streets where needed.

The stone-dust obtained from crushing stone has been used to resurface many of the old walks. There have been three granite walks laid, one extending from each walk on Pleasant street, across Massachusetts avenue, to the walk in front of Town House, and one from south side of Water street to the Library. These cross-walks consist of two rows of flagging, 18 inches wide, with three rows of paving between, and five rows of paving on each side, making a walk about eight feet wide.

There have been about 3000 feet of edgestone set this year, the abutters as usual paying for the stone, the town teaming and setting it.

### Drainage.

There has been a 24 inch pipe laid from foot of new street built by Theo. Schwamb and Nathan Robbins' heirs, across the avenue and through land of Mr. Lloyd to the brook, a distance of 350 feet; also, a 15 inch pipe connecting with this pipe, laid along the south side of Massachusetts avenue to Crusher lane, a distance of 650 feet, with suitable catch basins to take the surface water, and connections made with the drains, taking the water from the side hill; an 18 inch pipe from the foot of Westminster avenue, across Lowell street, along the side of Park avenue, to line of railroad, and a 12 inch pipe across Mystic street from J. H. Hartwell's connecting with the drain emptying into the meadows.

### Watering Streets.

It has required three double and two single teams to do the watering this year, as more streets have been watered. This has been done by the Fire Department furnishing two double teams and Eli Fletcher one, at an expense of $500 for each team, the Highway Department furnishing the two single teams. The whole expense was met by Highway appropriation, except $878 raised by subscription.

### Offal and Ashes

Have been removed under direction of Highway Department. The work has been done by two men with one horse, except during the winter, when the highway teams help collect the ashes. The town as usual is divided in two sections. On Pleasant street, Mystic street, and south of these streets, the offal is removed twice a week on Monday and Friday, the ashes on Wednesday. North of Pleasant and Mystic streets the offal is removed on Tuesday and Saturday, the ashes on Thursday.

### Steam Roller.

After two years' use it is in good condition. It has been used more days than last year. $726.27 has been received for rental from other towns.

### Stone Crusher.

After twenty-two years of use it is in very good condition. The engine and boiler are rather small for the work required of them, and it would be better if we had more power, but they are in good condition after their many years of use. The elevator belt gave out this fall and as the old elevator was rather out of date, it was thought best to have one of modern construction. Work on this and the enlargement of the bins is now in progress.

### Teams.

There are now twelve horses in the Highway Department. One having died the past season, there should be one bought to take his place, and two others changed as they are getting old. Two single carts are being built. The other carts are in good condition, only needing slight repairs.

Respectfully submitted.

SAMUEL E. KIMBALL,

*Superintendent of Streets.*

# TOWN WARRANT.

COMMONWEALTH OF MASSACHUSETTS, MIDDLESEX, SS.

**To Garritt Barry, a Constable of the Town of Arlington, in said County, Greeting:**

*In the name of the Commonwealth of Massachusetts you are hereby required to notify and warn the inhabitants of the Town of Arlington who are qualified to vote in elections and town affairs, to assemble in the*

## TOWN HALL, on MONDAY, the Twenty-third day of MARCH, current,

*at half past seven o'clock, P. M., then and there to act on the following Articles, viz:—*

Art. 1. To choose a Moderator to preside at said meeting.

Art. 2. To see if the Town will make an appropriation for Memorial Day in addition to the sum named in Art. 26 of the March 2, 1896, meeting, or act in any manner relating thereto.

(This Article is inserted at the request of C. S. Parker and others.)

Art. 3. To see if the Town will adopt the provisions of an Act of the Legislature of the year 1895, entitled: An Act relative to the watering of streets in towns, Chap. 186, viz:—

Any town the population of which exceeds three thousand, which shall adopt the provisions of this act at its annual town meeting or at a special meeting called for said purpose, may annually appropriate and expend money for watering its public streets, and may provide that its Board of Assessors may assess upon the estates abutting on the streets so watered the whole or any portion of the cost of such watering; and the amount of such assessments upon each estate, unless previously paid, shall be certified by such Board of Assessors to the Collector of Taxes of the town, who shall include the same in the next tax bill issued for an annual tax upon such estate, and the same shall be a lien upon such estate, and shall be considered as constituting a part of, and shall be levied, collected and paid or abated in the same manner as the town taxes on real estate.

**HEREOF FAIL NOT, and make due return of this Warrant, with your doings thereon, to the Town Clerk, on or before said day and hour of meeting.**

**Given under our hands, at said Arlington, this fourteenth day of March, in the year of our Lord one thousand eight hundred and ninety-six.**

**EDWARD S. FESSENDEN,**
**GEORGE D. TUFTS,**
**EDWIN S. FARMER,**
*Selectmen of the Town of Arlington.*

**A true copy. Attest: GARRITT BARRY, Constable of Arlington.**

# NOTICE!

Town meeting of March 2d adjourned to Monday evening, 23d ist. at 7.30 o'clock.

## Police Organization.

| | |
|---|---|
| Headquarters, | Town Hall Building. |
| ALONZO S. HARRIMAN, | Chief. |
| GARRITT BARRY, | Sergeant. |

## Patrolmen.

Garret J. Cody, John Duffy,
Daniel M. Hooley, Andrew Irwin.

The chief and one patrolman are on duty in the daytime; during the night, one sergeant and three patrolmen are on duty.

## Illegal Liquor Business.

The illegal sale of liquor has been very small, the kitchen bar-rooms (so called) do not thrive to any great extent. There have been a number of search warrants served during the past year where liquor was said to be kept for sale, but in no instance was liquor found; many persons think that a search warrant can be procured from the court by merely asking for it, but that is not so.

You must first have very good evidence that liquors are being sold, and an officer has to make oath to that complaint, so it makes it one of the hardest and most difficult warrants that an officer has to procure from a court.

## Recommendations.

The telephone boxes now in use at each end of the town, and connected with the station for police calls, have given very good satisfaction the past year, and I would recommend that one more box be connected at the corner of Massachusetts avenue and Grove street, then each officer would have direct communication with the station from his route.

I would also recommend that two more officers be appointed to the force. I find that the lower route from the centre to the Somerville and Cambridge lines cannot be properly covered by one man, as the route is so large that an officer

cannot get over the route as often as it should be done. The sergeant who has charge of the centre route, I find cannot get far from the business part of the centre on account of having to be near the Station to answer all calls, telephone and otherwise, thereby leaving Pleasant street, Academy street, Mystic and side streets without proper protection. I think with two additional men that the town would be as well protected as any town in this vicinity.

## Conclusion.

In conclusion I wish to thank your honorable board for the courteous consideration received from you officially, Wm. H. H. Tuttle, town solicitor, and B. Delmont Locke, town clerk, for their kind assistance; also the sergeant and other officers of the department for the prompt and faithful discharge of their duties.

Respectfully submitted.

ALONZO S. HARRIMAN,

*Chief of Police.*

# ANNUAL REPORT

OF THE

# CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

---

*To the Honorable Board of Selectmen:*

GENTLEMEN — I respectfully submit my annual report of the Fire Department of this town.

FIRES AND ALARMS.

The Department has answered 32 calls the past year, which are as follows:

Jan. 9th. 2.55 P. M. Box 21. Mrs. John Purcell, Fremont street. Rubbish fire.

Jan. 23rd. Assistance asked for from Lexington. Cary Farm.

March 9th. 4.45 P. M. Box 54. House owned by H. E. Lewis, Massachusetts avenue. Value $600. Insurance $300. Damage $5.

March 14th. 7.30 A. M. Box 36. Finance Block. Value $8500. Insurance $9000. No damage.

March 15th. 2 A. M. Box 43. House owned by James Irwin, Grove street. House value $1000. Insurance $1000. Damage $545. Furniture value $300. Insurance $300. Damage $177.

March 28th. 1.25 P. M. Box 25. House owned by P. H. Cullinane, Webster street. House value $2000. Insurance $1800. Damage $10. Furniture value $500. Insurance $400. Damage $40.

April 2nd. 9.05 P. M. Box 25. Hot bed fence, owned by W. W. Rawson, Broadway.

April 27th. 8.15 P. M. Box 45. Stable and house, owned by Mr. Phillips, Massachusetts avenue. House and stable value $200. Insurance $200, Damage $5. Contents value $400. Insurance $400

May 8th. 1.07 P. M. Box 47. Brush fire, owned by W A. Peirce, Forest street.

May 8th. 8.40 P. M. Box 25. Brush and grass fire.

May 10th. 12.10 P. M. Box 52. " " " "

May 10th. 2.25 P. M. Box 52. " " " "

May 11th. 11.15 A. M. Box 52. " " " "

May 12th. 8.40 P. M. Box 46. House owned by George Doherty, Dudley street. House value $1000. Insurance $500. Damage $75. Furniture value $200. Damage $25.

May 12th. 10.10 P. M. Box 45. Stable owned by Mr. Phillips, Massachusetts avenue. Stable value $200. Insurance $200. Damage $200. Horse, wagon and furniture value $400. Damage $300.

May 17th. 1.20 P. M. Box 45. Blacksmith shop owned by T. Higgins, Massachusetts avenue. Shop value $1000. Insurance $800. Damage $15.

May 25th. 8.45 A. M. Box 45. Owned by Gray estate, Grove street. Value $6000. Insurance $5000. Damage $25.

June 3rd. 7.45 A. M. Hen house owned by Mr. D. Crosby, Court street. Damage $10.

June 15th. 7.45 A. M. Boxes 15 and 16. Stable and house owned by John Lyons. House value $1900. Insurance $1500. Damage $1400. Stable value $500. Insurance $1000. Damage $1000. Furniture value $800. Insurance $500. Damage $400.

June 25th. 2.20 A. M. Stable owned by W. H. Allen, Warren street. Stable value $1400. Insurance $2000.

Damage $20. Stock, etc., value $1000. Insurance $600. Damage $40.

June 25th, 2.25 A. M. Box 36. Stable at Finance Block. Stable value $100. Insurance $100. Damage $100. Horse and wagon, etc., $350. Insurance $100. Damage $350. Stable owned by R. W. Shattuck. Value $1800. Insurance $1000. Damage $150.

July 3rd. 7.45 P. M. Still alarm. Store owned by Welch & Son.

July 6th. 1 A. M. Box 36. Stable owned by Russell estate, occupied by T. H. Carens and J. Daley. Stable value $350. Insurance $200. Damage $25. Horses, harness, etc., $225. Insurance $225. Damage $75.

July 9th. 5 A. M. Stable owned by J. Russell estate. Value $600. Insurance $800. Damage $600.

July 23rd. 2.25 A. M. Box 36. Stable owned by Russell estate. Value $350. Insurance $200. Horses, harness, etc., $225. Insurance $225. Damage $50.

Aug. 30th. 11.30 A. M. Box 45. Boiler room in mill owned by John Lloyd, occupied by Raymond Co. Value $7700. Insurance $4000. Damage $100.

Sept. 20th. 6 A. M. Box 16. House owned by John McMillan. House value $4000. Insurance $4000. Damage $853. Furniture value $1000. Insurance $1000. Damage $200.

Oct. 13th. 8.30 P. M. Box 15. Fire caused from lime owned by contractor of new school-house. Value $120. Damage $25.

Oct. 14th. Boxes 15 and 25. Second alarm of lime fire.

Oct. 15th. 8.22 A. M. Box 54. House owned by Mrs. M. A. Bowers. House value $2500. Insurance $2000. Furniture value $1000. Insurance $850. Damage $30.

Nov. 9th. 6.30 A. M. Still alarm. Flag house on Grove street.

Nov. 13th. 6.55 A. M. Box 34. House owned by Hornblower & Buckman. Value $4000. Insurance $3000. Damage, none.

You will observe that the most serious fire was the one of June 15, at which the house and stable of Mr. John Lyons were destroyed. At this fire we were handicapped by not having sufficient water. I should think it would be wise to lay a 4-inch pipe to all houses situated off main streets.

All fires have been reported to the Fire Marshal or to his aids for investigation.

### MEMBERSHIP.

The membership of the department is in the same condition as in last report. One new company has been added to the department which is Hose No. 1 and is situated at the Heights.

### APPARATUS.

There have been some changes in apparatus, which are as follows: A new hose wagon has been purchased for Hose 1 at the Heights, which has a ladder attached and two small chemical tanks. Hose 2 has been thoroughly overhauled and revarnished and now has a ladder attached, also two chemical tanks. A new hose pung has been placed in Hose 3 House. The Chemical Engine has been repainted and had a pole attached for a pair of horses, and is now placed in the Highland House. These pieces of apparatus are now in first class condition. Hose 3 and 4 and Hook and Ladder 1 have had no repairs. You will observe that all the apparatus above the centre, have ladders attached to them, so that any of these pieces arriving at a fire in their section will not have to wait for the truck in order to obtain a ladder.

### HORSES.

The Fire Department now has six horses. Two are kept at Wm. Penn Hose House. Two are at Hose 2 House and

are used on the Chemical, and the remaining two are at Hose 1 House at the Heights. We still give the town the use of one of the horses at the Chemical House, and the town keeps one horse at the Highland House.

A pair of horses was purchased in the early spring for the Chemical. We shall have to buy a pair of horses for Wm. Penn House and some arrangement will have to be made to secure a horse for Hose 2 House. We made a contract with your Board to water Massachusetts avenue, from Forest street to Tufts street. We have done this work with four horses and two men.

### FIRE ALARM.

The Fire Alarm is in the same condition as in last report. We have had some trouble with the electric wires on Pleasant street, and this will cause us more or less trouble unless some other means are devised to remove the firemen's dread, electric light wires. I think one way to better the matter would be to have the wires run up Academy and Jason streets and from there looping down to boxes 32, 34 and 35 on Pleasant street.

A new air whistle has been placed on the Town House and thus far has worked to the satisfaction of the Engineers.

### BUILDINGS.

The house at the Heights must have a new floor, and a tower should be placed in same for drying hose. The building must be painted this year. These repairs must not be longer neglected. A new floor must be placed immediately in Hose 2 House as the floor is not safe at the present time for horses to travel over.

A furnace has been placed in Hose 2 House. We have now two permanent men in our employ. One is the driver of Hose 3, and the other is the driver of the Chemical. A bed-room has been furnished in Hose 2 House which accom-

modates the driver of the Chemical and also the driver of the Hose Wagon. I invite the citizens of the town to visit Hose 2 House, and I feel assured you will find it as convenient as any Hose House in the vicinity.

### HYDRANTS.

We find the High Water Service very valuable in time of fire, giving us plenty of water, and with good force. I congratulate the town on having as good water service as any town in the county.

### HOSE.

The hose of the department is in the same condition as in last report, but am sorry to say that for lack of funds, we have only purchased 200 feet. We have now about 5000 feet of hose but we should have 6400 feet in order to make an exchange of hose for every company. We should have additional hose, as our new hose company requires about 1600 feet.

### FIREMEN'S RELIEF ASSOCIATION.

The association is in the same condition as in my last report. We are paying out some money every month to some of the members who are sick or unfortnnate. We have received one gift this year from C. J. Raymond Co., for services rendered at the fire on their building.

### RECOMMENDATIONS.

I called your attention in my last report to the fact that a building law should be incorporated in the by-laws of the town. This is a very important matter and needs to be considered. Another matter which I think needs to come before the town is — for every person who becomes a member of the Fire Department, $10 is kept back for his hat, badge and key. That is, the first $10 he earns he does not get until

he gets his discharge. This seems hardly right as we have some members who have been in the department 15 years or more. To pay the amount kept back from these men, it would call for an appropriation of $500.

### APPROPRIATIONS.

I would recommend an appropriation of $7000 to meet the expenses of the coming year.

Mr. George W. W. Sears declined his re-appointment and your Board appointed Capt. Frank P. Winn to fill vacancy. Mr. Winn is a faithful fireman and has served the town as captain for many years.

He was chosen clerk of the Board of Engineers and has proved an efficient officer. In closing I wish to thank my assistant engineers and the captains of the several companies, also the members of the department for the manner in which they have aided me and have so faithfully discharged their duties.

Respectfully submitted.

CHARLES GOTT,
*Chief Engineer.*

# REPORT

OF

# BOARD OF HEALTH.

---

The first election of a Board of Health for the town of Arlington took place March 4, 1895.

Edward S. Fessenden was chosen to serve three years, E. P. Stickney, M. D., for the term of two years, and Edwin Mills for one year.

The Board organized by choice of Edward S. Fessenden for chairman and Edwin Mills, secretary. B. Delmont Locke was chosen to serve as clerk of the Board.

Our town the past year has been remarkably free from the prevalence of epidemics of contagious or other diseases.

Our Board has been watchful to discover and prompt to remedy in every way practicable danger from threatening sources of disease.

Wise legislation in this Commonwealth has empowered Boards of Health to establish and enforce regulations for the abatement of nuisances and the preservation of health. It has been the aim of this Board to adopt and enforce only needed regulations and at all times to take such measures as circumstances might require for the public good.

Our town has made marked advancement the past year in improvements of its sanitary condition.

First in importance being the adoption of a general system of sewerage for the town in connection with the Metropolitan Sewerage System.

Construction of that portion of the town sewerage system which is to serve the Henderson district has been completed and will be connected for use in the spring of 1896.

The city of Cambridge has recently cut off its former sewer discharges into Alewife brook and taken measures to remedy the offensive condition of that stream, which had become a nuisance caused by sewage pollution.

The introduction of our high service water supply now serving the Heights and territory adjacent thereto, which was heretofore without a water supply, is also of great benefit in a sanitary point of view.

When suitable sewers and house drains are provided, with an adequate supply of waterto flush them, then cesspools must be dispensed with and the most dangerous source of disease, which threatens our homes, will be removed.

The Board has given prompt attention to all calls for their services to abate nuisances and remedy sanitary defects.

In most cases parties interested have readily responded to requirements of the Board, with results satisfactory to all concerned.

Continued enforcement of the State Plumbing Laws and our Town Plumbing Regulations has resulted in great improvement in the construction and ventilation of drains and waste pipe connections in our houses, stores and public buildings. Before the adoption of present laws such work was frequently done in the cheapest manner possible, and the plumbing work or substitutes therefor now in use in many of our dwellings cause serious defects in sanitary conditions very dangerous to the health of occupants.

From reports of 1895 of the Inspector of plumbing it appears that during the year, ninety-eight applications for plumbing permits and notices of work to be performed, have been regularly made and filed.

Thorough inspections as required for each case have been made in conformity to State laws and our Town regulations relating thereto.

Many examinations of plumbing have been made at requests of owners or occupants of premises, also at suggestions of attending physicians in cases of illness, to discover sanitary defects and suggest remedies therefor.

We desire to express our appreciation of courtesies extended, and aid received in the discharge of our duties from physicians of our town, also for the efficient services of our Chief of Police in cases of contagious diseases requiring use of disinfectants and fumigation.

## Deaths Registered during the year ending Dec. 31, 1895.

ARLINGTON, Dec. 31, 1895.

# REPORT

OF THE

# SEWER COMMISSIONERS.

---

The first report of this department is as follows:

The section known as the Henderson Street Sewer has been completed, with the exception of a short piece on Massachusetts avenue below Henderson street, which will be built as early as possible in the spring of 1896.

The sewer is now available and services will be put in as soon as the frost is out of the ground. A full report, of the proposed sewers for the entire town, has been furnished in book form giving all possible information regarding the work that is to be done. A large number of copies were printed and are at the Town Clerk's office for distribution; any further report at this time would be simply a repetition of the printed report.

# REPORT

OF THE

# COMMITTEE ON WATER SUPPLY.

---

ARLINGTON, Jan. 31, 1896.

*To the Town of Arlington:*

The Committee appointed at a Town meeting January 26, 1892, "To examine and report on the best means of increasing and improving the water supply for the whole town," submit the annexed communication received from the State Board of Health, and, as the subject of an improved water supply has been referred to another Committee, we respectfully ask to be discharged.

COMMONWEALTH OF MASSACHUSETTS.

**Reply of the State Board of Health to an application from Arlington, for advice in relation to water supply under the provisions of Chapter 375, of the Acts of 1888.**

OFFICE OF STATE BOARD OF HEALTH, STATE HOUSE,
BOSTON, May 25, 1894.

*To the Committee on improved Water Supply of the Town of Arlington:*

GENTLEMEN — The State Board of Health received from you an application dated April 26, 1894, stating that since the reply

made by this Board to you on Feb. 10, 1893, you had continued your investigations, and that you now ask if, in view of the additional information which you had obtained, the Board had any additional advice to give you. Your application was accompanied by two printed reports of your committee to the Town of Arlington, one dated Feb. 21, 1893, and the other Feb. 26, 1894. The first of these reports contains the reply of the Board above referred to, and the other the results of subsequent investigations.

By tests of the ground at various points within the water-shed from which the present supply of the town is derived, you have found no place likely to furnish as good a supply of water as the source tested last year, on the border of the Great Meadows near the East Lexington railroad station. At this place you have driven a few additional wells, and have made tests to determine the capacity of the source by connecting the wells together and pumping from them from Dec. 1 to Dec. 29, 1893, at an average rate of about 500,000 gallons per day. During this test you sent three samples of water to this Board for analysis. The samples were collected on Dec. 14, 19 and 27, 1893. The analyses gave substantially the same indications as those made a year before, and, like them, they showed a perceptible deterioration in the quality of the water during the progress of the test. The quality of the water at the time of the test was such that it would be satisfactory for all water supply purposes, but there is reason to think that it will deteriorate if a large quantity of water is pumped from this source.

The tests of this year show more definitely than those of last year that quite a large quantity of water can be obtained from this source, but they do not give additional information of such a character as to cause the Board to change its views, as expressed in its previous reply, as to the limitations of this source in a dry year.

The conditions under which you now apply for the advice of the Board are somewhat different from those of last year. You then had in view the construction of permanent works, and you now indicate that it is proposed to put in works of a temporary character for pumping water from these wells until a metropolitan

water supply is available. Having in view the temporary character of the proposed works and the unfavorable results of investigations for obtaining a better water supply at some other point, the Board thinks that you cannot do better than to adopt this source. It is the general experience that the amount of water to be supplied for the first few years after the construction of works is comparatively small, and it is probable that this source will furnish all of the water needed for a temporary supply; moreover, the smaller the amount of water pnmped, the less likelihood there is of deterioration in the quality of the water. It may be well to add that in referring to the possible deterioration in the quality of this water the Board has had in view the possibility that it might become unsuitable for laundry uses and unpalatable, rather than that it might become unwholesome.

By order of the Board.

SAMUEL W. ABBOTT,
*Secretary.*

# Report of Water Commissioners.

During the past year the construction of the high service system has been completed, and as the whole question of the water supply is now being agitated, and as numerous inquiries have been made for information as to various parts of the works, it seems best at this time to give a general history of the works, their construction, improvement, extension and maintenance up to the present time; and a plan has been prepared, and is annexed to this report, which shows the size and location of the property owned or held by the town for securing and storing its water supply, and also the sizes and locations of its pipe systems for distributing the water throughout the town.

By Chapter 245, Acts of 1871, the Arlington Lake Water Company obtained from the legislature the right to take the waters of Sucker brook and its tributaries above Lewis' mill, at Arlington Heights, and to store the water and supply it to the inhabitants of Arlington. The town, on June 26, 1871, bought this right from the company and proceeded to build our present low service works in 1872. By Chapter 242, Acts of 1873, the legislature confirmed this purchase and gave the town additional powers. This act is the foundation for all the powers exercised by the town in regard to its water works, with the exception of the authority to borrow more money as it was needed to pay for the works and to refund a part of the water debt, and the authority to lay a pipe in Massachusetts avenue in Lexington, which powers were given by later acts.

The original works consisted of a storage reservoir located on the line between Lexington and Arlington, and on the westerly side of Lowell street. It has an area of about 31 acres and a capacity of 77,000,000 gallons. The area of the reservoir lot, including the area of the reservoir itself, is 46¼ acres. This reservoir was formed by building a dam across North brook, one of the tributaries of Sucker brook, and as this brook would not alone furnish sufficient water to supply the town, Munroe's and Fessenden's brooks were diverted from their natural courses through the Great Meadows and turned into North brook, so that now all three flow into the reservoir.

The total drainage area tributary to the reservoir at the present time is about 2¼ square miles. From the reservoir a 12-inch cement-lined pipe was laid to the centre of the town, with smaller pipes branching from it to supply the various streets, and with the necessary gates and hydrants; all the pipes being of sheet iron, lined and covered with cement. At the time the reservoir was built, an additional 12-inch main was laid through the dam for use when another pipe should be needed, and there was also laid another 12-inch pipe to be used as a drain and this pipe is kept open whenever water is running over the wasteway, so as to draw away as much of the impure water in the bottom of the reservoir as possible. Up to 1874 extensions of the pipe system were made with cement-lined pipe, but since then nearly all new pipes laid have been of cast iron.

In 1876 so much complaint was made as to the quality of the water as it was supplied direct from the reservoir, that a filter gallery, 135 feet long, 12 feet wide, and 12 feet deep, was built in a bed of coarse gravel on the easterly side of the reservoir, and this was connected with the main pipe below the reservoir by a brick conduit and iron pipe. This gave a very satisfactory quality of water, but not enough of it, and in the following years this gallery was extended and

two additional ones built, one in the reservoir itself, in the "flat," so-called, opposite the filter first built, and one just below the easterly end of the main dam of the reservoir; but all these together did not give enough filtered water, and it was still necessary to use water direct from the reservoir a part of the time in the dry weather of summer.

In 1892 a 20-inch vitrified clay pipe was laid, beginning at the brook just before it enters the reservoir, and running around the northerly and easterly sides of the reservoir to the filter gallery which was built first, so that the water of the brook could in dry weather, when it is quite clear, be turned through the filters into the pipes without being mixed with the foul water in the reservoir, and since that year (1892) no water has been drawn directly into the pipes from the reservoir, the small amount which the brook and filters could not supply having been taken from the Great Meadows. A 10-inch drain pipe was laid at the same time to divert the drainage of the farm north of the reservoir and prevent it from entering the reservoir, and this same pipe is so laid that it can be used to drain the filters for the purposes of inspection and cleaning.

At the time the reservoir was built, about 175½ acres of the Lexington Great Meadows were taken to make a reserve storage basin in which the surplus water of Munroe's and Fessenden's brooks could be stored in the spring and let down into the reservoir as wanted during the summer. There is also one-half a square mile of drainage area tributary directly to these meadows in addition to that tributary to the reservoir. In order to use the meadows, it was necessary to build a dam at each and to divert the water of Brown's brook around it, and this was done in 1877 with the intention of using this water to keep the reservoir full during the summer and thus keep the yield of the filters up to the maximum, but it was found that this plan could not be carried out successfully, and that the water stored in the

meadows became very offensive; so for a long time it has only been used in connection with the low service for a few days in dry years when the other sources were deficient; during the past year it was not so used at all.

Brown's brook was diverted by building a brick circular drain, three feet in diameter, alongside the railroad location from Slocum's mill pond to the point where the brook enters the meadows by a culvert under the railroad near the East Lexington railroad station.

There are fifty houses on the water shed draining into the Great Meadows and one hundred and ten on the water shed draining into the reservoir. Most of these latter are on the water shed of Munroe's brook. The population on both drainage areas is increasing, and a large amount of manure is used on the cultivated portions, some of which is close to the banks of the brooks which in summer flow directly through the filters into the pipes which supply the low service system. There is no sure way of preventing this pollution of the drainage area, unless the town acquires the property. The water which comes from the portion of the area draining into the Great Meadows, on which about 45 houses are located, can readily be diverted into the Brown's brook culvert and thus be kept out of the town's water supply, but this will very much reduce the amount of water which will be collected in the Great Meadows, unless a pipe should also be laid from the meadows to tap the brook above the line of contamination. On the other hand, the contaminated water might be purified by passing it through a system of filters.

In settling the damages sustained by the mills on the stream below the reservoir and Great Meadows, about three acres, including the location of Slocum's mill and mill pond, were bought. The following is a statement of the quantity of land now owned or held by the town in connection with its water supply.

| | Acres. |
|---|---|
| Site of low service reservoir, | 46.29 |
| Great Meadows property, | 175.55 |
| Slocum Mill property, | 2.88 |
| Stand-pipe site, Arlington Heights, | 1.62 |
| Land for diverting Munroe's and Fessenden's Brooks, | 1.63 |
| | 227.97 |

In 1894–5 the high service system was built, the water being taken from twenty-five 2½ inch tubular wells driven in a bank of coarse gravel at the edge of the Great Meadows near the East Lexington railroad station. A brick pumping station is located here with a Blake compound duplex pump of a capacity of 500 gallons per minute, and the necessary boiler, air pumps, etc., and the water is pumped into an iron stand pipe or tank, 40 feet in diameter and 60 feet high, in the centre of the park at the top of Arlington Heights. This tank has an iron roof 20 feet high and will hold 565,000 gallons. From this runs a 12-inch main pipe and branches leading to the streets which require high service, with the necessary gates and hydrants. All the pipes of this system are of cast iron.

The locations of the pumping station, stand pipe and pipe system are shown on the plan accompanying this report.

During the year the construction of the high service works has been completed and paid for, with the exception of a balance of $500 held back, under the terms of the pipe-laying contract, till March 1, 1896, to secure the town against loss on account of any poor work which may develop before that time, and a small balance, $725.67, on account of contract for the stand pipe, which will probably be adjusted early in the spring.

The whole expenditure for the works authorized by the vote of May 28, 1894, for which an appropriation of $92,000

was made, is as follows, including the two items above mentioned.

**Expenditures under appropriations of $92,000 made in 1894, for the construction of High Service Water Works.**

**Stand Pipe.**

| | | |
|---|---|---|
| Paid for land, | $2,537 90 | |
| for iron work, | 7,438 33 | |
| for foundation, | 1,055 52 | |
| | | $11,037 75 |

**Pipe Contract.**

| | | |
|---|---|---|
| Donaldson Iron Co., | $34,341 29 | |
| Less pipe for Lake street, | 3,554 00 | |
| | | 30,787 29 |
| Paid for inspecting pipe, | | 529 60 |

**Laying Pipe.**

| | | |
|---|---|---|
| Paid E. E. Eglee, | $20,827 27 | |
| Water Department, | 2,605 87 | |
| | | 23,433 14 |

**Hydrants.**

| | | |
|---|---|---|
| Paid Chapman Valve Co., | $3,930 15 | |
| Less those used on other work, | 900 00 | |
| | | 3,030 15 |

**Gates.**

| | | |
|---|---|---|
| Paid Ludlow Valve Co., | $1,829 82 | |
| Less those used on other work, | 281 50 | |
| | | 1,548 32 |
| Special castings, | | 2,520 35 |
| Gate boxes, | | 386 70 |
| Connecting driven wells, | | 1,032 50 |
| *Amount carried forward,* | | $74,305 80 |

| | | |
|---|---|---|
| *Amount brought forward,* | | $74,305 80 |
| **Pumping Station.** | | |
| Paid A. L. Bacon, | $4,762 80 | |
| H. B. S. Prescott, plans, | 75 75 | |
| Peirce & Winn Co., cement, | 44 21 | |
| Radiator, stove, scales, | 194 31 | |
| Lightning rod, carpenter work, | 212 75 | |
| Plumbing, painting and fittings, | 113 90 | |
| | | 5,403 72 |
| **Pumps.** | | |
| Paid Blake Mfg. Co., | $4,610 50 | |
| for coal for test, | 73 82 | |
| | | 4,684 32 |
| **Relief and Regulating Valves.** | | |
| Paid for valves, | $742 50 | |
| manholes, | 243 02 | |
| covers, | 83 00 | |
| | | 1,068 52 |
| **General Items.** | | |
| Paid for engineering, etc., | | 2,560 68 |
| surveying, | | 557 58 |
| pile foundation for pipe, | | 150 00 |
| freight, express, etc., | | 316 74 |
| horse hire, | | 51 99 |
| pipe fittings, | | 291 25 |
| incidentals, | | 238 54 |
| Paid Highway Department for repairing streets over pipe trenches, | | 1,000 00 |
| Due on stand-pipe, | $725 67 | |
| Due on pipe laying, | 500 00 | |
| | | 1,225 67 |
| Total, | | $91,854 81 |

The stand pipe was finished and painted early in the winter and was filled January 15, 1895, and has been in use ever since, with the exception of four days in October, when it was emptied to be cleaned and to have some loose rivets made tight. Owing to some defects in the appearance of the roof and some leaky rivets, the final payment has not been made as yet.

The pumping station boiler and pump were so far completed January 11, 1895, that water was pumped into the stand pipe on that date, but there was so much air in the water that it was found necessary to put in an apparatus for separating the air from the water. This caused so much delay that the pumps were not tested till March 21, 1895; on that date an elaborate test was made and the pumps were found to more than fulfil the contract requirements. The engineer's report upon the test is annexed to this report.

The contracts for gates, hydrants, special castings and pipe have been carried out in a very satisfactory manner.

May 3, 1895, a supplemental contract was made with Mr. E. E. Eglee, by which he agreed to lay pipe in certain streets not included in his original contract, upon the same terms as the work was done last year. Some of the work authorized at the annual meeting in 1895 was included in this contract. The work of pipe laying under the contracts with Mr. Eglee was completed August 15, 1895, and a settlement was made with him, the work having been done in a satisfactory manner. The pipes as laid have been tested with a pressure of 200 pounds to the square inch, and only five defective pipes have been found.

The following table gives the lengths and sizes of the pipes of the high service system, together with the number of gates and hydrants in each street. All the pipes are of cast iron. There are eight relief valves located at various points throughout the system and one reducing valve located near

the corner on Massachusetts avenue and Forest street, by which the pressure on the pipes below it is reduced about 75 pounds.

The first service pipe connected with the high service system was put in March 21st, and the works have been in operation continuously since that time; there are now 190 services connected with it.

No complete records were kept at the pumping station till June first. Since then full records have been kept, and the following table has been compiled from these records.

## STATISTICS FROM RECORDS OF PUMPING STATION OF ARLINGTON WATER WORKS FOR THE LAST SEVEN MONTHS IN 1895.

| MONTH. | WATER PUMPED. Gallons. | COAL USED. | | PUMP RUN. | | WATER USED Gallons per Day Average. |
|---|---|---|---|---|---|---|
| | | Pounds. | Tons. | Days. | Hours. | |

* 21 hours pumping into pipes only, stand pipe being shut off for repairs to pipe line.

† 54 hours pumping into pipes only, stand pipe being shut off for repairs.

Up to August 23d 25 wells were connected with the pump, on that day one well was shut off and on November 16 four more wells were shut off.

As soon as the pipes were filled with water, they were thoroughly flushed and all dirt left in them blown out as far as possible. During the summer complaint was made that the water had a bad taste and odor and that clothes washed in it were badly discolored. The pipes were again thoroughly flushed, and one of the wells was shut off. For a time the quality of the water was improved, but it soon began to deteriorate, and in October the water was drawn from the stand-pipe, and it was thoroughly cleaned; at the same time the pipes were again thoroughly flushed and the dead ends of the pipes have been flushed since then at least once each month. In addition to this, four more wells, making five in all, have been shut off. The wells shut off are all located in the edge of the meadow, and, in the opinion of the Superintendent, who had charge of the work of driving them, are the ones most likely to furnish poor water. Since this was done, there has been very little complaint as to the quality of the water, and there has been no trouble as yet in drawing all the water required from the twenty wells still in use. The water drawn from the wells has been analyzed at four different times during the year by the State Board of Health, and the results are shown in the table annexed to this report. They show that the water contains a larger amount of iron and free ammonia than is ordinarily found in ground waters which have proved to be satisfactory. The last analysis of water taken after the five wells had been shut off shows a decreased amount of iron. An analysis of one sample of water from the low service reservoir was also made and the result is given in the same table.

During the year the supply for the low service system has been drawn from the filters at the reservoir, and during the dry season the supply was increased by water taken directly from the brook at a point just above the reservoir, but no water was taken from the Great Meadows. The filters

furnished the whole supply for 247 days, and on 118 days it was necessary to take more or less water directly from the brook. This was done on the following dates:

May 9 to 12.
May 31 to June 26.
July 1 to August 18.
August 28 to September 9.
September 19 to October 13.

The supply has been quite satisfactory. Most of the complaints have come from persons located near dead ends, and flushing the pipes through hydrants located near by has usually removed the cause of the complaint. It is now the rule of the department to have the pipes at all dead ends flushed as often as once each month, and it is expected that complaints will be less frequent in the future.

The usual number of breaks of the cement pipes have occurred, and this shows that all the cement pipe will have to be renewed before many years.

The following table, which has been prepared with care from the best information at our command, shows in detail the size and kind of pipe, and the number of gates and hydrants in each street on the low service system.

**Cement Pipe.**

| | | | | |
|---|---|---|---|---|
| | | 12 | 10991 | | |
| | | 8 | 6121 | | |
| | | 6 | 16796 | | |
| | | 4 | 25186 | | |
| Total, . . . . . | | | 59094 | 84 | 56 |

**Iron Pipe.**

| | | | | | |
|---|---|---|---|---|---|
| | | 12 | 150 | | |
| | | 8 | 6091 | | |
| | | 6 | 2250 | | |
| | | 4 | 12899 | | |
| Total, . . . . . | | | 21390 | 45 | 37 |
| Total both kinds, . . . . . | | | 80484 | 129 | 93 |
| | | | 15.24 miles | | |

In the second column the letter "C" means "cement lined pipe," and the letter "I" means "cast iron pipe."

In addition to the main pipes, large service pipes have been laid for short distances in ten streets or courts where, in the opinion of the Water Commissioners, it was not advisable to establish fire hydrants, and where the water was only wanted for a few houses or for irrigation. These pipes are described in the following table. They are of wrought iron, lined with cement.

| | Size, in. | Length, ft. |
|---|---|---|
| Barnes lane, | 2 | 604 |
| Cottage avenue, | 1¼ | 460 |
| Dudley court, | 2 | 250 |
| Fremont street, | 2 | 525 |
| John Kelly's lane, | 1¼ | 550 |
| Mt. Vernon street, | 1½ | 404 |
| Norcross street, | 2 | 220 |
| Russell terrace, | 2 | 333 |
| Teel street place, | 1¼ | 90 |

## Extensions and Renewals.

During the year, in addition to the work which was done under the appropriation of $92,000 made in 1894 for the high service system, new pipes have been laid in the following streets.

FOR THE HIGH SERVICE.

| | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Acton street, | 556 | 6 | 2 | 1 |
| Ashland street, | 365 | 6 | 1 | 1 |
| Crescent Hill avenue, | 957 | 6 | 1 | 3 |
| Elder terrace, | 202 | 6 | 1 | 1 |
| Glen road, | 667 | 6 | 2 | 2 |
| Gray street, | 732 | 6 | 2 | 1 |
| Gray street, | 604 | 10 | 1 | 1 |
| Jason street, | 200 | 8 | 0 | 1 |
| Kensington park, | 1140 | 6 | 3 | 2 |
| Lowell street place, | 280 | 6 | 1 | 1 |

| | | | | |
|---|---|---|---|---|
| Oakland avenue, | 426 | 6 | 1 | 2 |
| Park avenue, | 448 | 6 | 1 | 1 |
| Park square, | 194 | 4 | 1 | 0 |
| Wachusett avenue, | 356 | 6 | 1 | 1 |
| Westmoreland street, | 350 | 6 | 1 | 1 |
| Willow place, | 202 | 6 | 1 | 1 |
| Wollaston avenue, | 228 | 8 | 0 | 1 |
| Woodland street, | 250 | 6 | 0 | 1 |

FOR THE LOW SERVICE.

| | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Decatur street, | 406 | 6 | 1 | 0 |
| Pitts street, | 518 | 6 | 1 | 1 |

On the following streets new and larger iron pipes have been laid, with new gates and hydrants, to replace the old cement pipes which were worn out.

| | Length, ft. | Size, in. | Hydrants. | Gates |
|---|---|---|---|---|
| Appleton place, | 380 | 6 | 1 | 1 |
| Decatur street, | 670 | 6 | 1 | 2 |
| Lake street, | 2579 | 8 | 5 | 3 |
| North Union street, | 1962 | 8 | 4 | 2 |

On Jason street, where it was necessary to lower the pipe on account of changing the grade of the street, 180 feet of 6-inch pipe was replaced with new 8-inch iron pipe and one new hydrant set.

The cost of this work is as follows:

| | | |
|---|---|---|
| Donaldson Iron Co., pipe, | | $3,797 57 |
| Inspecting pipe, | | 81 00 |
| **Laying pipe.** | | |
| Paid E. E. Eglee, | $4,865 02 | |
| Water department, | 2,887 21 | |
| | | 7,752 23 |
| *Amount carried forward,* | | $11,630 80 |

| | |
|---|---|
| *Amount brought forward,* | $11,630 80 |
| Paid for gates, | 369 64 |
| " " hydrants, | 1,120 22 |
| " " special castings, | 390 67 |
| " " engineering and surveying, | 697 17 |
| Total, | $14,208 50 |

The details of the cost of the work done by the Water Department will be found in the report of the Superintendent, from which it will be seen that the average cost of laying 6-inch iron pipe, including the cost of pipe, gates and hydrants, is 70 cents per lineal foot, that the lowest cost on any one street was 43 cents and the highest 102 cents.

Full records in convenient form for use have been made, showing the location of the pipes, gates and other fixtures of the high service system and of all new pipes and fixtures of the low service system, and it is intended to extend this record as fast as the old pipes are renewed. In December the Superintendent made a house to house inspection of the fixtures supplied by the department, to enable the Registrar to check his record and correct it in cases where changes had been made in the plumbing. From the books of the Registrar and Superintendent the following tables have been prepared, showing the number of fixtures supplied by the water works and the income which will be received the coming year at the present rates.

| | |
|---|---|
| Houses paying the maximum charge of $25, | 148 |

In addition to the above there are the following fixtures on which charges are made :

| | |
|---|---|
| Faucets, | 1,687 |
| Bath-tubs, | 287 |
| Water-closets, | 433 |
| Hand hose, | 536 |

| | |
|---|---|
| In stables, horses, | 354 |
| cows, | 124 |
| Can rooms and wash houses, | 19 |
| Greenhouses, | 24 |
| Hotbed sash at 10 cents each, | 14,039 |
| School houses, | 6 |
| Water motors, | 5 |
| Stand pipes for street watering, | 15 |
| Fire hydrants, | 264 |
| Drinking fountains, | 5 |

The income which is expected to be received the coming year from the above-described fixtures, at the present rates, is as follows :

| | |
|---|---|
| Houses, school houses and motors, | $16,958 00 |
| Stables, | 1,241 00 |
| Can rooms, wash houses and greenhouses, | 1,204 00 |
| Sash or hotbeds, | 1,403 90 |
| | $20,806 90 |
| From Town for fire hydrants, | 4,580 00 |
| Drinking fountains, | 200 00 |
| Total, | $25,586 90 |

This amount will probably be increased by the income from the new services which will be added during the year.

On Sept. 28, 1895, in connection with the Fire Department, an exhibition test was made to show what could be depended upon for the extinguishment of fires in the centre of the town. A number of insurance men were present and expressed themselves as much pleased with the display. Two hydrants were used, one at the corner of Massachusetts avenue and Pleasant street, and the other opposite the Unitarian Church. A line of hose was laid from each, and united at the base of the spire of the Unitarian Church.

With the ordinary pressure (about 90 pounds per square inch), the stream reached well above the clock in the spire. Then the gate at the reducing valve was opened, allowing the full pressure (about 165 pounds per square inch) to come down, and with this pressure the stream reached the vane on the spire, 180 feet above the base. In order to show the difference between the high and low services, a line of hose was laid from the hydrant on Pleasant street opposite Swan street. This stream barely reached the gutters on the church. After this, two lines of hose were laid from the hydrant at the corner of Russell Park on Mystic street, and an exhibition given of horizontal streams. Those from the high service played from the base of the flag-staff on the park to beyond the centre of Mr. George Clark's stable on the opposite side of Mystic street. During the coming season, if it is found desirable, it is proposed to connect the high service with the low service, so that in very dry times some of the water from the high service can be turned into the low service to supplement the supply, and so avoid the necessity of drawing any water directly from the Great Meadows. This can only be considered a temporary expedient.

During the last few years the hire of a horse and team for the work of the department almost equalled the cost of keeping our own team. This year, in consequence of the greater amount of work occasioned by the increase of the pipe systems, it was deemed best to own our own team, and in the spring a horse, wagon and harness were purchased and stabled in the place provided in the rear end of our shop building. This winter a pung was also bought.

We now have on hand about 3000 feet of 6-inch iron pipe and enough of the 8, 10 and 12 inch pipe to meet any ordinary calls for repairs. There are also on hand 13 new hydrants and six 6-inch gates, and the necessary special castings to lay the pipe on hand. There is also enough pipe

and fittings on hand to lay about 30 new services. At the pumping station there is enough coal to last till about June 1, 1896. Applications have been received to lay pipes in Harvard street, a private way leading from Appleton street; in Lowell street from its junction with Massachusetts avenue to the Railroad bridge; in Bow street from Lowell street to the Railroad crossing; in Westmoreland street from Crescent Hill avenue to Madison avenue; in Madison avenue from Westmoreland street to Washington street; and in Mystic street from the present end of the pipe to Mr. Cronin's house. These would all be of 6-inch pipe.

It is also desirable each year to replace some of the old worn-out cement pipe with new iron pipe, and in doing this it will he mutually advantageous to co-operate with the Highway Department as much as possible, and re-lay or extend the water pipes before or at the time when permanent improvements are being made, so as to avoid digging up a street which has just been put in good order, as it is impossible to repack a water pipe trench and leave the surface of the street in as good condition as it was before.

In addition to the above, there will be calls during the year for pipes to supply the houses which are now being built or planned to go on the land lately put on the market, situated on the southerly side of Massachusetts avenue, near the Lexington line.

To comply with all the requests will require a large appropriation. It is the intention of the Water Commissioners to lay pipe wherever requested so far as their means will allow, whenever the parties making the request will guarantee an income to the town of six per cent. on the average cost of laying a 6-inch iron pipe for the length of pipe asked for.

The works generally are in good condition. The street hydrants will be painted during the winter and the stand pipe will require painting in the spring.

The details of the work of the past year are given in the reports of the Superintendent, Treasurer and Registrar, which are annexed.

Respectfully submitted.

SAMUEL E. KIMBALL,
GEORGE W. LANE,
FRANK W. HODGDON,
*Water Commissioners.*

# APPENDIX

TO THE

# WATER COMMISSIONERS' REPORT.

# REPORT

OF

# FRANK L. FULLER,

Civil Engineer,

ON

## Test of Pumping Machinery, March 21, 1895.

---

Time, 9.30 A. M. to 7.30 P. M. or 10 hours.
Total coal consumed, 1,535.5 lbs.

DIMENSIONS OF PUMP.

| | |
|---|---|
| Diameter of high pressure steam cylinder . . . . | 9 inches |
| " " low " " " . . . . | 18 " |
| " " water cylinder . . . . . | $8\frac{1}{2}$ " |
| " " plunger rod . . . . . | $2\frac{1}{4}$ " |
| Length of stroke (nominal) . . . . . | 12 " |
| " " " (average) during ten hour test . | 12.3108 inches |
| | 1.0259 feet. |
| Diameter of Stand Pipe or Tank (nominal) . . . | 40.00 " |
| Height " " " " " " . . . | 60.00 " |

Engine Counter at 7.30 P. M., 96,651
" " " 9.30 A. M., 68,144

28,507 rev's, or 114,028 strokes.

| | |
|---|---|
| Area $8\frac{1}{2}$ inch water plunger . . . . . | 56.745 square inches. |
| Half area $2\frac{1}{4}$ inch water plunger rod . . . | 1.988 " " |
| Effective area . . . . . | 54.757 " " |

$\frac{54.757 \times 12}{231} = 2.8445$ gallons, theoretical displacement for 12 inch stroke.

Observations of counter, length of stroke, water and steam pressures, vacuum gauges on suction pipe and condenser were taken every 15 minutes.

In order to determine the slip or loss of action of the pump, the water was pumped into the stand pipe and observations of the height of the water taken every five minutes, from 9.45 A. M. to 6.30 P. M., or for an interval of $8\frac{3}{4}$ hours.

During this time the depth of water in the tank was increased from 27.71 to 58.19 feet. This difference amounts to 30.48 feet.

By computation (using the actual diameters of the tank), 287,523 gallons were pumped into tank from 9.45 A.M. to 6.30 P.M.

Counter at 6.30 P. M., was 94,172
" " 9.45 A. M., " 68,884

25,288 rev's or 101,152 strokes.

Length of stroke (average) from 9.45 A. M. to 6.30 P. M. as observed, 1.0268 feet.

101,152 x 1.0268 = 103,862 feet of piston travel from 9.45 A.M. to 6.30 P. M.

$\frac{287,523}{103,862.87}$=2.7683 gallons per foot of piston travel from 9.45 A. M. to 6 30 P. M.

Actual plunger displacement for 12 inches, 2.7683 gals.
= 0.9732

Theoretical plunger displacement for 12 ins., 2.8445 "

1.0000—0.9732=0.0268 or 2.68 per cent. slip.

| Total number of strokes. | | Average length of stroke. | | Gallons per foot piston travel. | | Gallons |
|---|---|---|---|---|---|---|
| 114,028 | x | 1.0259 | x | 2.7683 | = | 323,839 |

Total amount of water pumped in ten hours . . . . . 323,839

$\frac{323,839}{600}$=539.7 gallons (average) per minute.

Average water pressure for 10 hours . . . . . 112.30 lbs.
" vacuum on suction pipe for 10 hours . . . . 12.54 in.

112.30 x 2.31= . . . . . 259.41 feet.

$\frac{12.54 \times 34}{30}$=suction lift, not including friction, in pump . 14.21 "

Difference in elevation of vacuum and water pressure gauges . . . . . 0.71 "

Total lift . . . . . 274.33 feet.

DUTY.

$$\frac{\text{Gallons per foot of piston travel.} \times \text{Average length of stroke.} \times \text{Wt. of one gallon water.} \times \text{Number of strokes.} \times \text{Lift.} \times 100}{1{,}535.5 \text{ lbs. coal.}} = 48{,}252{,}440 \text{ foot lbs.}$$

$$\frac{2.7683 \times 1.0257 \times 8.34 \times 114{,}028 \times 274.33 \times 100}{1{,}535.5 \text{ lbs. coal.}} = 48{,}252{,}440$$

The duty guaranteed by the Geo. F. Blake Manufacturing Co. was 45,000,000, foot lbs. That duty has been exceeded 7.2 per cent.

The average pumpage per hour was 32,384 gallons or about 8 per cent. more than the contract calls for.

From 10.15 to 10.30 A. M. when the tank was about half full, the pumping was at the rate of 839,700 gallons per 24 hours, or 16.6 per cent. more than called for by contract.

The average boiler steam pressure for the ten hours was 68.1 lbs. The average pressure in the steam chest during the same time was 51.4 lbs.

The highest boiler pressure was 70 lbs., and the lowest 65.5 lbs.

The highest pressure in the steam chest was 54 lbs., the lowest 49 lbs.

The steam pressure during most of the test was remarkably uniform.

The pump worked smoothly and was not troubled by air.

Brand of coal used, Pocahontas.

The color of water is expressed by numbers which increase with the amount of color. Boston water, as drawn from a tap at the Institute of Technology, had an average color for six years of 0.43. Other water supplies in the State have an average color of from 0 to 1.45.

All waters containing suspended matter, excepting ground waters which contain a large quantity of iron, are filtered through filter paper before determining the color and residue on evaporation Occasionally these determinations are also made on the unfiltered water, the results in such cases being indicated by an asterisk.

F. L. FULLER, Engineer, Boston, Mass.
*Jan. 26, 1895.*

# REPORT

OF THE

# SUPERINTENDENT OF THE WATER WORKS.

---

*To the Arlington Water Commissioners:*

GENTLEMEN — I hereby respectfully submit my report for the year ending Dec. 31, 1895.

## EXTENSION OF MAINS.

### Appleton Court.

336 feet 6-inch pipe have been laid in this street and one hydrant set, at a total cost of $247.55.

| | |
|---|---|
| labor, | $118 50 |
| pipe, | 95 64 |
| hydrant, | 25 34 |
| lead, | 8 07 |

### Lake Street.

2579 feet 8-inch pipe have been laid, five 5-inch Chapman valve hydrants and three 8-inch Ludlow valves set in this street, replacing the 4-inch cement pipe, at a total cost of $1915.96.

| | |
|---|---|
| labor, | $489 50 |
| pipe, | 1,158 52 |
| hydrants, | 130 00 |
| gates, | 48 24 |
| lead, | 89 70 |

This completes Lake street from Massachusetts avenue to a point between the ice tracks of the Fitchburg Railroad, total distance 4129 feet.

**Pitts Street.**

519 feet 6-inch pipe have been laid, one 5-inch Chapman valve hydrant and one 6-inch gate set, at a total cost of $252.27.

| | |
|---|---|
| labor, | $54 62 |
| pipe, | 148 42 |
| hydrant, | 26 00 |
| gate, | 10 75 |
| lead, | 12 48 |

**North Union Street.**

1962 feet 8-inch pipe have been laid, four 5-inch hydrants and two 8-inch gates set in this street, replacing the 4-inch cement lined pipe, at a cost of $1420.05.

| | |
|---|---|
| labor, | $334 25 |
| pipe, | 881 00 |
| hydrants, | 104 00 |
| gates, | 32 16 |
| lead, | 68 64 |

This was a much needed improvement that should be applied to a number of streets in the lower part of the town.

**Decatur Street.**

1076 feet 6-inch pipe have been laid, two 5-inch hydrants and two 6-inch gates set in this street (replacing the 4-inch cement lined pipe that had been laid for a distance of 670 feet), at a cost of $637.78.

| | |
|---|---|
| labor, | $224 50 |
| pipe, | 308 30 |
| hydrants, | 58 00 |
| gates, | 21 50 |
| lead, | 25 48 |

**Woodland Street.**

250 feet 6-inch pipe have been laid and one 6-inch gate set in this street, at a total cost of $255.99.

| | |
|---|---|
| labor, | $171 00 |
| pipe, | 68 00 |
| gate, | 10 75 |
| lead, | 6 24 |

**Willow Place.**

202 feet 6-inch pipe have been laid, one 4-inch hydrant and one 6-inch gate set, at a cost of $173.15.

| | |
|---|---|
| labor, | $73 00 |
| pipe, | 57 82 |
| hydrant, | 25 34 |
| gate, | 10 75 |
| lead, | 6 24 |

**Lowell Street.**

2116 feet 6-inch pipe have been laid, five 4-inch hydrants and one 6-inch gate set in this street, at a cost of $1473.53.

| | |
|---|---|
| labor, | 669 00 |
| pipe, | 616 28 |
| hydrants, | 126 70 |
| gate, | 10 75 |
| lead, | 50 80 |

**Elder Terrace.**

202 feet 6-inch pipe have been laid, one 4-inch hydrant and one 6-inch gate set, at a cost of $163.77.

| | |
|---|---|
| labor, | $63 62 |
| pipe, | 57 82 |
| hydrant, | 25 34 |
| gate, | 10 75 |
| lead, | 6 24 |

**Wollaston Avenue.**

228 feet 8-inch pipe have been added to this street and one 8-inch gate set, at a cost of $226.86.

| | |
|---|---|
| labor, | $108 56 |
| pipe, | 93 64 |
| gate, | 16 08 |
| lead, | 8 58 |

**Glen Road.**

191 feet 6-inch pipe have been added to this street and one 6-inch gate set, at a cost of $159.38.

| | |
|---|---|
| labor, | $80 06 |
| pipe, | 54 85 |
| 2¼ bends, | 8 00 |
| gate, | 10 75 |
| lead, | 5 72 |

**Gray Street.**

290 feet 10-inch pipe have been added to this street and one 5-inch hydrant set, at a cost of $621.54.

| | |
|---|---|
| labor, | $405 42 |
| pipe, | 174 49 |
| hydrant, | 29 15 |
| lead, | 12 48 |

The trenching in this street was done by contract, we laying the pipe.

**Lowell Street Place.**

280 feet 6-inch pipe have been laid, one 4-inch hydrant and one 6-inch gate set, at a cost of $208.12.

| | |
|---|---|
| labor, | $84 00 |
| pipe, | 80 23 |
| hydrant, | 25 34 |
| gate, | 10 75 |
| lead, | 7 80 |

**Jason Street.**

260 feet 8-inch pipe have been added to this street, 120 feet 6-inch pipe had to be taken up on account of change of grade of street and replaced with 8-inch pipe making 380 feet 8-inch pipe in all laid in 1895, at cost of $679.41.

| | |
|---|---|
| labor, | $455 87 |
| pipe, | 163 49 |
| hydrant, | 29 15 |
| gate, | 16 08 |
| lead, | 14 82 |

**Service Pipes.**

176 services have been put in during the year, 142 connected with the high service and 34 with the low, at an average of $11.80 each, making the total cost $2,076.80.

Academy street, Jason street and Bartlett avenue have been transferred to high service.

**Hydrants and Gates.**

The hydrants and gates are in good repair. One hydrant has been set on Medford street near the estate of the late Jere. Russell. There are several other places in the lower part of the town where hydrants should be placed at the earliest opportunity.

**Reservoir.**

The reservoir is in good condition, brush having been cut and weeds pulled up and burned.

**Brook.**

The brook was cleaned out in the early summer and is in a fair condition although it will require some attention before we have to use it again.

**Recommendations.**

I would respectfully call the attention of the Board to that part of the supply known as North brook, which is in a very bad condition. If the town is to keep the present system for any length of time some means should be adopted to divert it from its present source, or prevent its contamination from manure and drainage from farmyards.

**East Lexington.**

The drainage from the most thickly settled part of East Lexington passes under the Boston & Maine Railroad, and empties into the Great Meadows, and as several houses have been built on the banks of the stream the past summer laying drains from the cellars into the brook it has become a nuisance that should be abated without delay.

**Great Meadows.**

The brush has been cut off the lower half of the meadows and a fence built on the town line from the pumping station around the wells which improves the looks of the place in a marked degree.

**Repairs on Mains.**

Twenty-one leaks have occurred in the old main pipes during the year, some caused by blasting for the new pipe, others from having picks driven through them, but the greater number was from rusting out of the pipes where they have been insufficiently covered with cement.

**Repairs on Services.**

We have repaired quite a number of old services, retapping and in some places relaying with new pipe and fittings where it was needed. We have had a few leaks in the lower part of the town where the sewer was put in caused by the settling of dirt in the ditch.

THOMAS RODEN,

*Superintendent.*

# WATER WORKS.

# TREASURER'S REPORT.

---

## RECEIPTS.

| | | |
|---|---|---|
| Balance of cash on hand, Dec. 31, 1894, | | $10,975 74 |
| Amount received during the year 1895, viz., | | |
| For water rates for 1895, | $18,101 62 | |
| From town for use of street hydrants for 1895, | 4,000 00 | |
| From town for water for drinking fountains, | 200 00 | |
| | | 22,301 62 |
| Amount received of Faneuil Hall National Bank, interest on deposits, | | 41 65 |
| Amount received of town, interest on temporary loan, | | 26 66 |
| Received of Frank Alderman for pasturing for 1894 and 1895, | | 250 00 |
| Received of town, amount loaned, | | 5,000 00 |
| on account of "high service," etc., | | 32,000 00 |
| amount of appropriation, | | 1,000 00 |
| | | $71,595 67 |

## EXPENDITURES.

**Running Expenses.**

| | | |
|---|---|---|
| Paid Donaldson Iron Co., for pipe, | $345 | 11 |
| Pittsburg Testing Laboratory, testing pipe, | 11 | 00 |
| Thomson Meter Co., meters, | 67 | 60 |
| Davis & Farnum Mfg. Co., on account stand pipe, | 87 | 49 |
| Gilchrist & Taylor, pipe and fittings, | 62 | 55 |
| Wm. T. Foster & Co., lead, | 82 | 34 |
| Geo. H. Sampson, forcite, etc., | 17 | 55 |
| Repauno Chemical Co., powder, | 7 | 00 |
| The Geo. Woodman Co., for pipe, | 61 | 11 |
| Goldsmith & Peppard, wagon and blacksmith work, | 186 | 27 |
| Boston Lead Pipe Mfg. Co., lead pipe, etc., | 64 | 57 |
| E. W. Noyes, printing, | 55 | 50 |
| H. M. Chase, horse hire, | 107 | 06 |
| Edgar Snow, 1 horse, | 103 | 00 |
| H. W. Hilliard, insurance on shop, | 56 | 25 |
| Darling & Russell, insurance on pumping station, | 50 | 00 |
| Peirce & Winn Co., coal, wood, etc., | 857 | 26 |
| W. G. Hartwell, wood, | 9 | 43 |
| F. B. Fletcher, " | 10 | 00 |

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1895.

## Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely:

DWELLING HOUSES.

| | |
|---|---|
| Occupied by one family, for the first faucet, | $6 00 |
| For each additional faucet, to be used by the same family, | 2 00 |
| Where a house is occupied by more than one family, one faucet only being used for all, for each family, | 4 00 |
| Where a house is occupied by more than one family, the highest rates will be charged for each family, having the water carried into their part of the house: | |
| For the first bath-tub, | 5 00 |
| For each additional bath-tub, | 3 00 |
| For the first water-closet, | 5 00 |
| For each additional water-closet, | 3 00 |
| For hopper water-closets, | 8 00 |
| Where bath-tubs or water-closets are used by more than one family, for each family, | 4 00 |
| Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than | 25 00 |

BOARDING HOUSES.

| | |
|---|---|
| For the first faucet, | 10 00 |
| Each additional faucet, | 2 00 |
| Water-closet or bath-tub, when used by boarders, | 10 00 |
| Each additional bath-tub or water-closet, | 3 00 |

STORES, OCCUPIED AS OFFICE, SHOP OR SIMILAR PURPOSE.

| | |
|---|---|
| First faucet, | $6 to $20 00 |
| For each additional faucet, | 2 50 |
| For water-closet or urinal, | 6 00 |

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

| | |
|---|---|
| For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, | $6 to $25 00 |

HOTELS.

| | |
|---|---|
| For each bed for boarders and lodgers, | 3 00 |
| For each bath-tub in a hotel, | 10 00 |
| For each water-closet in a hotel, | 10 00 |

PUBLIC BATHS.

| | |
|---|---|
| For one tub in a public bath-house, | 10 00 |
| For each additional bath-tub, | 5 00 |
| For one water-closet in public bath-house, | 10 00 |
| For each additional water-closet, | 3 00 |

STABLES.

| | | |
|---|---|---|
| Private Stables. | For the first horse, | 5 00 |
| " | For each additional horse, | 3 00 |
| " | For one cow, | 2 00 |
| " | For each additional cow, | 1 00 |
| Livery, Club and Boarding Stables. | For each horse, | 3 00 |
| Car and Omnibus Stables. | For each horse, | 2 00 |
| Truck and Cart Stables. | For each horse, | 2 00 |
| *Provided*, that in no case shall any stable be charged less than | | 5 00 |

The rates for stables include water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

| | |
|---|---|
| For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than | $3 00 |

STEAM BOILERS.

| | |
|---|---|
| For each boiler in use not over twelve hours a day, for each horse-power, | 6 00 |

BUILDING PURPOSES.

| | |
|---|---|
| For each cask of lime or cement, | 6 cents |

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than four months a year:

| | |
|---|---|
| For a jet of 1-16 of an inch, | $3 00 |
| " " 1-8 " " | 5 00 |
| " " 1-4 " " | 8 00 |

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases in their judgment the interests of the town shall require.

B. DELMONT LOCKE,
*Water Registrar.*

# AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. Delmont Locke, as Treasurer and Collector of the Town of Arlington, also as Treasurer of the Arlington Water Works, for the year 1895, and find the same correct, with vouchers for all payments, and the balances of cash as stated by him.

Clarence T. Parsons, }
Leander D. Bradley, } *Auditors.*

# SCHOOL COMMITTEE'S REPORT.

*To the Town of Arlington:*

As required by statute the School Committee submit their Annual Report.

**Superintendent.**

At the end of the spring term Mr. I. Freeman Hall resigned his position as Superintendent to accept a call to a larger field. Mr. Hall, as our first Superintendent, rendered important service to our schools. He went to his new work with the best wishes of the entire Committee.

Considering the rapid growth of our school work and the large amount which we expend annually for the support of our schools, the value of thorough and efficient superintendence can hardly be overestimated. We have thought it good business judgment, therefore, to secure for a time, at least, the entire services of a superintendent, thereby ensuring a condition more satisfactory both to the Committee and to the Superintendent, without incurring any great additional expense.

We spent much time investigating the qualifications and the records of many available men, and finally elected Mr. True W. White, Superintendent of Schools in Westboro, to fill the position. Mr. White is a man of high character, broad education, and large experience. He is entitled to the respect and confidence of all our citizens.

**Changes of Teachers.**

In the High School building Miss M. Helen Teele resigned from the Greek and History department at the close of the spring term to accept a call to the new English High School in Somerville. Miss Mary H. Cutler was elected to the position. Miss Eltinge resigned in February to go to Brookline. Miss M. Cady Roberts was chosen to fill the vacancy.

At the Russell School Miss Arnold resigned at the close of the spring vacation. The number and classification of the pupils in that building seemed to call for a twelfth teacher. Miss Mary J. Mayo was engaged for grade IV., and Miss Nellie A. Grimes, for personal reasons of her own, was allowed to go from the Cutter School to grade VII.

At the Cutter School Miss Mabel W. Fuller was chosen to the position made vacant by Miss Grimes.

At the Locke School Miss Holbrook and Miss VanDerveer resigned at the end of the school year. Miss Emma Sawyer and Miss Esther C. Glidden were elected to fill their positions.

The large number of scholars in the Cutter and Crosby primary schools made it necessary to employ assistants early in the year. The services of Mrs. Harlan B. Bean and Miss Theodora West were secured.

Last fall Miss Hollis was granted leave of absence on account of poor health. During her absence the classes in sewing have been instructed by Miss Copeland, formerly Principal of the Locke School.

Several of the teachers who resigned have been of exceptional merit, and we have regretted much to lose them from our schools. In filling their places, however, we have taken pains to secure teachers of ability and experience.

**Courses of Study.**

During the past year we have endeavored to unify the

courses of study throughout the town, so that the various classes of any one grade will cover just the same ground during the school year. This will make less confusion when the classes come together in the upper grades. We also have spent much time systematizing our text books and adopting regular books for all the different grades. This will tend to accomplish the same purpose, and will result in a saving to the town.

Our Superintendent with our approval has laid out a course in physiology and hygiene with "instruction as to the effects of alcoholic drinks, stimulants and narcotics on the human system," as required by law.

**Music and Drawing.**

These studies have been conducted by the same teachers as before, and the work has been satisfactory to the Committee.

**Pollard System of Reading.**

In March, 1895, a sub-committee was appointed to investigate the subject of reading, with a view to securing uniformity in the text books used in the several schools. In the course of its labors this sub-committee became interested in the so-called Pollard System of Reading. The Committee spent much time studying the system, personally observing the work elsewhere, and inquiring as to the results obtained by it in a great number of places. The more thoroughly members became acquainted with it and its work, the more strongly convinced did they become as to its value. The result was the adoption of the system in September by a unanimous vote.

Under the old method (it cannot be called a system) pupils were taught to read by memorizing the forms of words and whole sentences. When a pupil had learned ten words or a hundred words, he had nothing to help him in

the pronunciation of others. Phonics were used to some extent (a partial recognition of the short-comings of the old methods), but they were not systematized throughout our schools.

In the new phonic system the usual sounds of letters and combinations of letters are learned. Then the child has the means of self-help. Pronunciation ceases to be a mere strain of memory; it becomes a reasoning process. It is true that many word forms must be learned as exceptions, but we must remember that the old "sentence method" taught *every* word as an exception. One is surprised to find how few exceptions there really are to the regular pronunciations of letters and combinations of letters; but were the exceptions far more numerous than they are, certainly there would be much time saved by the grouping, and much power gained by the child in the application of his mental faculties.

Of course pronunciation is not the only result to be aimed at. But we know from our study of other languages that the power to understand and to convey the meaning of words comes easily and naturally by constant use of them. When once we begin to read, we increase our vocabulary unconsciously. And so under the new system it is found that the children learn to read intelligently as well as promptly and accurately.

We have appreciated the fact that this, like any other change of method, has made necessary for the first year an extra effort on the part of our teachers. But we are happy to say that they, for the most part, have responded loyally.

We will not discuss the Pollard theory more in detail, but will refer all persons interested to the Report of our Superintendent of Schools. We made the change believing that we were making a great advance along scientific lines, ensuring a saving of time and a development of power to

the children. As we have pursued our investigations further, and have become better acquainted with the working of the system, we feel more strongly than before the wisdom of the change.

**High School Building.**

Our last report contained a description of the new High School Building. This building is now thoroughly equipped and affords opportunity for scientific and other work never before possible in this town. In equipment and organization it ranks with the best buildings in the Commonwealth.

Owing to the crowded condition of the Russell School House, and in order to extend the advantages of the new building to a large number of pupils, we have placed the classes of the ninth grammar grade in the High School Building. We thus bring the grammar grades into closer touch with the High School, and by gradually extending down into the ninth grade some of the High School studies we hope to relieve the pressure in the High School and reduce the tendency to over-work. This movement is going on in other places with marked success.

As stated in our last report, the new building offers accommodations for a manual training department, In this department the boys are taught to do simple mechanical drawing and tool work, and the girls are taught sewing. The principal object is to train the hand to work with the brain, thereby rendering both the physical and the mental faculties more efficient. The Committee and Teachers, however, believing that this object can be accomplished along practical lines, have laid out the work in such a way as to give scholars skill as well as power, which will be a practical benefit to them hereafter.

**Crosby District.**

In our last report we called attention to the imperative

necessity of a new school building in the Crosby District. In accordance with our suggestion, the necessary funds have been appropriated, and a suitable building is being erected under the direction of a special committee appointed by the town. We are assured that the new building will be ready for occupancy before the beginning of the next school year.

**Kindergarten.**

The crowded condition of the school buildings this year has rendered it impossible for us to maintain a kindergarten. After the new Crosby Building is completed, there will be sufficient room for this work both in the Russell and in the Crosby Districts, but there will be no opportunity for it in the Locke and Cutter Buildings. We believe that kindergarten work is of great value, and shall be glad to introduce it so far as possible, whenever we feel that the Town is ready to incur the expense.

**Buildings and Repairs.**

During the summer vacation the Cutter Buildings and fences were thoroughly painted.

A law, which went into effect September 1st, required all school committees to furnish flags and staffs for the several school buildings. We have complied with the law, and the flags are constantly displayed at the various buildings.

At the March meeting the town appropriated $5000 for an outside building for the sanitary arrangements of the Russell School, and for the proper ventilation of said building as suggested by Professor Woodbridge. During the summer vacation a new brick building was erected, and a new and approved system of sanitaries was placed therein. The old basement was thoroughly cleaned out, filled in with fresh gravel, and concreted. The air chamber in the cupola was cleaned, whitewashed and screened, and other changes

were made as suggested by Prof. Woodbridge. The entire work was done and all the appliances were put in under his direction and with his approval. As he is undoubtedly the foremost sanitary engineer and expert in this Commonwealth, his approval is a sufficient guaranty of the character of the work. We are now awaiting his final report and recommendations as to what, if anything, is further required for proper ventilation of the buildings.

In closing we ask our citizens to give to our schools the personal attention which they deserve. By going into the schools frequently and observing the problems and the difficulties which confront us, parents will get a better understanding of the work than can be had from mere rumor, and will be better able to help the Committee and Superintendent with suggestions and criticisms.

Our schools are doing good work. With the continued support of the Town we trust that they may be kept in the first rank among the schools in the Commonwealth.

Approved by the School Committee.

SAMUEL H. SMITH,
*Chairman.*

JANUARY, 1896.

# SUPERINTENDENT'S REPORT.

*To the School Committee of Arlington:*

GENTLEMEN — I have the honor to submit my first annual report as Superintendent of the Arlington Public Schools, which is the fourth that you have received since establishing the office. Having been here only one term, I have hardly yet become familiar with all the conditions affecting the schools of the town, and shall omit to speak of a number of matters with which you are at present better acquainted than I.

**Statistics.**

The table at the end of this report shows the average number of pupils for the year to have been 996. In 1894 it was 971. The average attendance was 938. In 1894 it was 914.

At the end of the year, December, 1895, there were 1035 pupils, divided as follows:

HIGH SCHOOL, 95, Grade IX. 86, making 181 in the High School building. At the beginning of the year the number in the same grades was 132.

RUSSELL SCHOOL, 433. At the beginning of the year it was 466. The Kindergarten would about make up the difference.

CUTTER SCHOOL, 162. A year ago, 158.

LOCKE SCHOOL, 147. A year ago, 136. The increase is mostly in the seventh grade.

CROSBY SCHOOL, 112. A year ago, 100. The number has been steadily increasing from year to year, and justifies the erection of the new building.

The *attendance* has been remarkably regular; 94 per cent. is a splendid average for the pupils of a whole town for a year.

**Text Books**

will always need attention in schools that aim to be progressive. What seemed best a few years ago may be far behind the best of today. Moreover, accepted theories change. A generation ago few teachers thought of having more or less than one book on a subject for the use of their classes. A little later there was a popular notion that *no* book should be used by the younger pupils, but everything was to be taught orally by the teacher. Then a reaction set in; rival publishers brought out scores of attractive "supplementary" books, and to keep up with modern progress it was thought necessary for a child to be provided with three or four authorities. In your schools there were to be found a full dozen different kinds of books on Arithmetic, half as many on Geography, and unnumbered varieties of Histories, Language Books, Readers, etc. Now, a teacher certainly should be so familiar with the subjects that she teaches as not to be bound slavishly to her book; but it is fair to assume that the specialist who made the book was able to present the subject quite as well as the average teacher. Also, it is highly important that children should learn to use books, gathering information from them, and even in some cases comparing authorities; but for young pupils to be required to work up topics regularly from great masses of material, implies at least a misdirection of energy. It seems to me desirable, because it will vastly simplify the work for both teachers and pupils, to have one authorized text book in each subject for each grade throughout the town, supplemented by as many reference books as can profitably be used. In this way only can unity in aims, quantity and method be easily obtained. You were wise, I think, in beginning to act in this direction as you did last spring. Already prescribed books have been selected in Arithmetic, Reading (primary), Spelling and History.

**Courses of Study,**

like text books, can never be regarded as so perfect that they can be left long without modification. The outlines prepared by my predecessor three years ago have served a good purpose, and are still followed in general. For grades VIII. and IX., essentially different work was laid out last year. The Principal of the High School has for some time been re-arranging the old course so that it shall be more in harmony with the convenient new building. With the assistance of the teachers I am carefully reviewing the courses in the other grades and making the few changes that seem necessary. Our disposition and policy are conservative. We know that radical changes disturb progress, and prefer to leave things as we find them until we feel *sure* that they can be materially improved. In a few cases I have advised somewhat different methods. In many cases more definite limits seemed needed in order that each teacher might know how much she is expected to do to fit for but not anticipate the next year's work. Thus far I have issued outlines in Arithmetic, Spelling, Language, Physiology and Hygiene.

*Arithmetic* seems to show less and less satisfactory results year by year. Everywhere there is complaint that children show a lamentable inability to grasp the meaning of a problem and to work it out by themselves rapidly and correctly. One reason for this is that they are led and directed so constantly that they come to depend too much on assistance. Another reason may be that they have been taught cumbersome methods of solving examples, which are supposed to be logical, but which are too unpractical for use outside the school-room. When anyone thus sacrifices all tangible results to the idea of mental development, there is danger that he fails to get either. On the other hand, as long as a boy is learning to *do*, independently, rapidly and

accurately, we may safely risk the mental development. I have urged the teachers of Arithmetic to give many short examples to their pupils, who are to concentrate their attention on solving them, without assistance, in the briefest possible way.

*English Language,* which deserves the position now generally accorded to it as the most important of the regular school studies, has been well taught in the Arlington schools. In reviewing the "Course" in this subject I have merely suggested the most valuable kinds of exercises, and assigned certain ones to be emphasized in each grade. The essential truth is that the aim must be to train children to be practical *users* of language. For the present no text books for this purpose are in the hands of the pupils.

*Physiology* and *Hygiene* are required by state law "to be taught to all pupils in all public schools." Our new outline was prepared with this in mind. Special emphasis is laid on practical hygiene, and teachers are urged to draw the principles, so far as possible, from the experience and reason of the children.

**Reading.**

The *Pollard Synthetic Method* of teaching reading and spelling was unanimously adopted by the Committee. This is the most important change in method made during the year. It may be said to mark a new epoch in educational history.

Last spring a SPECIAL COMMITTEE was appointed to investigate the condition of Reading in your schools. They did not make a written report of what they found. If they had, judging from the conditions in Arlington and in other towns, I think it would have been about as follows:

Reading is taught by the so-called "*Thought Method.*" This is a combination of the "Word" and the "Sentence"

Methods, which succeeded the old "Alphabet Method" some fifteen years ago. The children in the primary classes usually show much animation. They recite the little stories smoothly, by phrases or sentences rather than by single words, and *naturally*, i. e., just as they talk. On the other hand, they make a great many mistakes, sometimes getting the whole sentence wrong, but oftener and usually changing or omitting many of the smaller words. It is an unusual thing to hear a paragraph read exactly as it is. The method gives the child absolutely no power to find out any word that he has not been taught.

After the Thought Method has been followed for some time it is supplemented by drill in *Phonics*. This work varies with the various teachers, both in amount and in method. In the schools where it is most thorough, the children are taught the more common sounds of the letters, with the corresponding diacritical marks. Then they are trained to combine the sounds of new groups of letters, and so pronounce words that they have not before seen. Some pupils have much power of this kind; but many others, especially in the higher grades, and particularly in certain schools, seem to have no such power. Even the brightest can not be sure of the pronunciation until the proper diacritical marks have been supplied by the teacher or the book. If the drill in phonics were systematic, progressive and uniform, the situation would not be so bad. As it is, the intermediate and grammar grades find the children pitiably dependent on their teachers. The carelessness displayed is discouraging. The articulation is wretched; vowels are mispronounced, consonants are omitted, whole words are inaudible. There are many that are unable to read effectively, that is, to get the thought from a printed page; one teacher says that her fourth-year class, as a class, can not read a primary book on Geography.

The above is a fair statement of what your Special Committee must have found. They decided that the results were not satisfactory. The POLLARD METHOD was brought to their attention. They visited a school where it had been used for three years, but where all the conditions for effective work seemed less favorable than in your own schools. The contrast was startling. Children, almost wholly from homes where correct English was not spoken, read fluently, distinctly, correctly, accurately and understandingly. Not only did they do this from their own books, but they stood most searching tests from visitors. Eight-year-old children, having been only three years at school, read editorials from the Boston *Herald*, mispronouncing only a few such words as "economical," which they subsequently pronounced correctly by their own efforts when given time to mark them; and the class showed interest and a fair degree of appreciation for what was read. Many other people, teachers, superintendents and critics, visited that school. The testimony was uniform: the results were marvellous. Personal acquaintances reported the success of the system in other parts of the country. Letters were read from hundreds of teachers and school officers, telling how they had secured far better results since using this method than ever before. Unlike other publications, where the Pollard books were introduced and fairly tried, in hundreds of cities and towns in many states, they remained. The system had been used so long and with such great and uniform advantage, that it was far beyond the stage of experiment. Your Special Committee recommended it to the Board, and the Pollard System was introduced into our four lowest grades on the 30th of September.

We have now been trying to use the new method for three months. More accurately, we have been learning to use it; for our teachers, entirely unacquainted with the system, found a great deal to learn. The progress that we shall be

able to make another year in the same length of time, has been prevented in these three months by a number of causes that have tended to make success not less certain but less rapid. In spite of all, the work is in better condition than I had expected it would be at this time. People are appreciating that it is a regular part of the school curriculum, and that success in this is as important as in other parts of the work. Already several of our teachers, as well as those citizens that have most carefully examined it, believe thoroughly in the method. Although it is within a year that the first town in the state adopted it, the Synthetic work is going on in eight Massachusetts towns and cities beside Arlington, and from every one of them I hear enthusiastic reports. The primary teachers of Watertown have unanimously requested that it be introduced in their schools. Their Superintendent, our own fellow-townsman, says that he "can't keep them from using it — couldn't if he would."

Unfortunately some enthusiasts claim too much. There is an impression that it is expected to teach reading, unaided. Miss Sarah L. Arnold has been quoted as being opposed to the method. Yet she writes me that "it is a cunningly devised plan for teaching the pronunciation of words." For my part, that is all that I expect or want. We all know that to pronounce words is not the whole of reading, but it is the first essential. It is the *mechanics* of reading, just as addition, subtraction, multiplication and division are the essential mechanics of arithmetic. When the four rules are mastered, a child can learn arithmetic; so when a child can change printed words into spoken words readily and accurately, he is in a fair way to learn the meaning of both. For the teacher to help the child to master the thought contained, is an exercise in language. As a recent lecturer to the Arlington primary teachers well said, "there is no one method of developing thought." To call

the Word-Sentence Method "*The* Thought Method" is an arrogant assumption. The Synthetic Method leaves the competent teacher free to develop the thought contained in the word, that is to teach language, by every method that she knows or can invent.

No one acquainted with the facts now questions concerning the immediate results of the Pollard Method. With its aid children learn to read English better and in less time than they ever did without it. But some say that is not enough. In an attack on the system which has been printed by a rival publishing house and circulated in Arlington, Dr. Emerson E. White is quoted as having said several years ago, "The greater the apparent results the greater is the ultimate injury to the child." Dr. White is commonly regarded as the greatest Public School writer in America. In a letter dated Dec. 28, 1895, he says: "'The proof of the pudding is in the eating,' and if the system gives results which are satisfactory to you, never mind what any one says of its psychology." Comforting as this advice is, I can not accept it entirely. I want to know as well as is possible the ultimate effect on the mental habits. The unparallelled results shown in connection with the Pollard System did not alone overcome my prejudice against so great a departure from the methods used for several years under my own direction. Although no "theorist" in education, I have carefully studied the THEORY, and beg leave to present briefly my reasons for believing the Synthetic Method to be correctly founded on psychologic principles, and pedagogically sound.

The aim of the Synthetic Method is, to enable the child to translate printed language accurately into oral language. This is a true pedagogical aim; for when this is done, the thought immediately comes into the mind if the words are familiar; if they are unfamiliar, their pronunciation is the first step in their study. It harmonizes with psychological

facts. A child associates thought with sound more naturally than with form alone. To the average adult, printed words suggest spoken words and these suggest ideas; a careful trial will convince most thoughtful people of this fact. Sight alone does not leave a distinct image of a word in the mind, as is found when we pass over a difficult foreign word in our reading without pronouncing it. All good teachers of foreign language insist on distinct pronunciation; one who tries to read French without pronouncing it, gets but a vague knowledge.

While the Pollard system is not perfect and we confidently look for improvements, it is the *best* way of attaining the above aim. It is a system of *Phonics*, which afford "the only civilized way" of learning to read. The Word Method is, as Professor Bain of Aberdeen called it, a "Chinese Method," since it necessitates the memorizing of the shape of every word learned. The Synthetic differs from other phonic methods, first, in that the children are trained to mark and sound the letters for themselves instead of depending on their teacher or book; second, in commencing to mark and sound at the end. By this plan, when all the letters have been examined all the sounds are in mind and the word is pronounced without danger of mutilation; third, in the careful arrangement of the exceptions, which are the only words requiring special study.

This method seems to me well adapted to develop in remarkable degree desirable mental powers and habits in those that study it. By the Word-Sentence method the memory alone is exercised, and that is tremendously overtaxed to master the ordinary vocabulary of 10,000 words, each as an isolated fact. By our new method the memory is exercised moderately, close observation is cultivated, while the greater part of the pupils' work is in applying simple rules which tell what marks and sounds to give the let-

ters in certain positions. This is an exercise of *reason*, almost identical in kind with the reasoning so highly valued in the elementary study of Latin. Experience proves that children can do it, and even the duller ones do it with keen delight. Close attention, accuracy and self-reliance can not fail to be cultivated, instead of the carelessness, inaccuracy and dependence for whose "artificial cultivation" the Sentence Method seemed especially contrived. The one idea for which the Pollard Method stands, is POWER. Power for *all* the children, in reading, and increased power in all other work.

There is not space here to describe the Method in detail. At the Superintendent's office there are a great number of papers and letters from all parts of the country explaining it clearly and telling of its success in many places; anyone is welcome to examine them. What is better, all persons interested have the right to visit the schools and study the practical application.

**Manual Training.**

This department is well equipped and organized. The simultaneous exercise of the hand, the eye and the brain is just now regarded as the educational ideal. Certainly this work is popular. The reasons for limiting it to the eighth and ninth grades are not evident. If it is good for the pupils there it ought to be doubly good for those in the higher grades who have sufficient interest to ask permission to take it as extra work. It is quite possible, also, that the greatest educational profit from manual training may be obtained in the lower grammar grades. Careful study should be given to the double question, whether the simpler work shall not be begun in the seventh year, and whether advanced woodwork or iron work for the boys and cooking for the girls shall not be put into the High School, at least as electives.

**Kindergartens.**

The desirability of Kindergartens is no longer denied. It has been demonstrated that children from a good Kindergarten take up the mental work of the primary school more readily and make faster progress. More than this, splendid opportunities are afforded for cultivating the social qualities, such as courtesy, generosity and the subordination of personal desires. Better still, little children are made wonderfully happy, basking in floods of elevating Beauty, of which Emerson said that a single ray outvalues all the utility in the world. These things are worth so much that parents go to the trouble of sending their own children from homes where the atmosphere of refinement and beauty prevails. Are the tax-payers of Arlington willing to make provision for the children from less beautiful homes, whose needs are much greater? If the committee is unwilling to take the responsibility of incurring the expense of free kindergartens, such as are maintained by many of our neighboring cities, I recommend that the question be brought before the town in the form of an article to be voted on in town meeting.

**Teachers' Meetings.**

The benefits obtained from Teachers' Meetings are dependent on the correspondence between the purpose of the meetings and the needs and sympathies of the teachers. During the past four months three meetings have been arranged for all the teachers, and nine others for particular grades. Having become moderately familiar with the conditions, the superintendent is now planning for a series of meetings to be held at regular intervals, which he hopes will prove inspiring and profitable to the corps of teachers as a whole.

**Discipline.**

The subject already discussed at some length at the meetings, and which it is desired to emphasize throughout the

year, is discipline. The word is here used in its highest sense. To maintain good order in the school-room is the first necessity. An efficient teacher has little trouble in doing this; but the means employed, as they affect the permanent moral character of the future men and women, deserve most thoughtful attention. A great evil in the country is the growing disrespect for established authority. If children are trained to the habit of rendering respectful and willing obedience to the authority of the home, the school and the state, not only will the outward form of good citizenship be assured, but they will be able easily to obey the inner law of their own will and conscience. No exigency of the work in mental instruction should be allowed to interfere with this first and greatest duty of developing good citizenship and good character. As professional guides to the young, we are under solemn obligation to teach these noblest duties of human beings, by precept, by persistent training, and by personal example.

In this connection a word is deserved by the High School. In the quality of the mental work, but more especially in the *spirit*, founded on a discipline that is firm yet liberal, the High School compares favorably with the best in the state. The new building helps to make this easy, but great credit is due the teachers and the pupils.

**Rules and Regulations.**

The Committee have spent many hours in revising the Rules and Regulations, which were printed in 1888. A number of modifications were rendered necessary by the changes in administration caused by the establishing of the office of Superintendent. Certain other modifications resulted from the natural development of ideas in regard to teaching and school management. Copies of the revised rules can be obtained at this office.

It will be seen that many duties formerly assumed by the different Sub-Committees are now laid on the Superintendent. With these added duties and powers the Superintendent takes greater responsibility. The present incumbent appreciates the fact, and asks for such cordial assistance from the citizens and the teachers as is necessary for the success of his efforts to direct wisely the education of their children. That he may prove deserving of their respect, as well as of the exceeding confidence and personal kindness already shown by the Committee, will be his one ambition.

Respectfully submitted.

TRUE W. WHITE.

ARLINGTON, Dec. 31, 1895.

## SCHOOL STATISTICS, 1895.

# REPORT

OF THE

# TRUSTEES OF THE ROBBINS LIBRARY.

---

Time enough has now elapsed since the new Library was opened, Nov. 9, 1892, to enable us to see how extensively it has been patronized by the citizens of the town. By reference to the following table

| | | | |
|---|---|---|---|
| 1891 | Books | loaned | 33,198 |
| 1892 | " | " | 33,855 |
| 1893 | " | " | 37,246 |
| 1894 | " | " | 40,316 |
| 1895 | " | " | 38,579 |

it will be seen that in 1892, the year of the removal from the old building, there was a slight increase in the number of books drawn. A fair comparison can be made only between the three following years, 1893-4-5, and the last full year at the old Library. The circulation increased to 37,246 in 1893, to 40,316 in 1894, but fell off to 38,579 in 1895. Although the decrease, 1737, of the past year is nearly half as large as the increase, 3070, of the year before, the average for the three years, 38,713, shows a gain of 5515 over the last full year, 1891, at the old Library.

The result thus stated is certainly disappointing to those who had hoped to see an increase in the patronage of the Library commensurate with the improvement in its housing.

Much may be hoped from the new plan, which was inaugurated on the 2nd of January, 1896, of giving to each book-borrower an extra card for anything except fiction, the idea being to give students increased facilities for investigation and to develop a taste among our readers for a different class of literature than simply stories and tales.

The attractiveness of the Library has been still further enhanced during the past year by the gifts of Mr. Winfield Robbins of four handsome bronze statues of Louis XVI. time, representing the seasons, and a magnificent Louis XV. clock of brass and tortoise shell, which adorns the mantel over the fireplace in the Reading Room. Other gifts of this generous donor await his return from Europe before being unpacked.

The internal administration of the Library remains the same with the exception of the loss of one of our assistants, Miss Annie Baston, who, after six years of faithful service, resigned in September to accept a position elsewhere. Her always cheerful face and willing spirit will not soon be forgotten.

Miss Louise Marsh has been transferred to Miss Baston's place at the Book Delivery, Miss Angie Adams taking the place left vacant by Miss Marsh.

Mr. C. S. Parker has kindly continued to publish in the *Advocate* the lists of new books greatly to the convenience of the readers.

Joseph C. Holmes,
James P. Parmenter,
E. Nelson Blake,
Sam'l C. Bushnell,

Matthew Rowe,
*Trustees.*

# LIBRARIAN'S REPORT.

*To the Trustees of the Robbins Library:*

GENTLEMEN—The number of books added in 1895 by gift and purchase, is a little larger than that of the year before. Many of these have been bought by special request and represent a variety of tastes. Among the reference books are a much needed new edition of Chambers's Encyclopædia in ten volumes, History for Ready Reference from the best Historians, Biographers and Specialists by J. N. Larned, in five volumes, and the Standard Dictionary of the English Language in two volumes.

A record of those who use books for reference cannot easily be kept, but there is a large number constantly coming especially from the schools and the various clubs, who, either by themselves or assisted by Miss Dupee, succeed in finding what they want, provided the library contains it. We are assured that this number increases, while the number of books delivered for home use may be fluctuating.

Those who are not already familiar with the card-catalogue would often find it very helpful, as it is the only complete catalogue up to date, and contains authors, titles and subjects in alphabetical order.

One book and a single number of Harper's Monthly have mysteriously disappeared, but it is hoped that they may yet be found.

Mr. Winfield Robbins, besides presenting us with costly gifts for decoration, has kindly sent us eight books while travelling abroad.

We are indebted to Rev. Mr. Bushnell for five different works, one of which, an edition of Johnson's Cyclopædia in four volumes, previously belonged to John Ericsson, the noted inventor. This has been transferred to the Reading Room at the Heights, as the beginning of a Reference

library in that section. We acknowledge the "History of the Cutter family of New England," from Mrs. T. G. Bucknam of this town, "The Meaning and the Method of Life," from the author, Dr. G. M. Gould of Philadelphia, four volumes from the American Swedenborg Printing and Publishing Society, "Early History of the Department of Mass. G. A. R.," from the Department, a fac-simile copy of Thackeray's original "Second Funeral of Napoleon," from the Werner Co., Chicago, and Catalogues and Bulletins from the following Public Libraries: Brookline, Lancaster, Lexington, Salem, Watertown, Weymouth, Worcester, Mass., Manchester, N. H., Wilkes-Barré, Pa.

Our list of Periodicals and Newspapers has been lately enlarged and the names of those now taken are:

## Periodicals.

# TOWN WARRANT.

COMMONWEALTH OF MASSACHUSETTS, MIDDLESEX, SS.

**To Garritt Barry, a Constable of the Town of Arlington,** in said County, **Greeting:**

*In the name of the Commonwealth of Massachusetts you are hereby required to notify and warn the inhabitants of the Town of Arlington who are qualified to vote in elections and town affairs, to assemble in the*

## TOWN HALL, on MONDAY, the Twenty-third day of MARCH, current,

*at half past seven o'clock, P. M., then and there to act on the following Articles, viz:—*

Art. 1. To choose a Moderator to preside at said meeting.

Art. 2. To see if the Town will make an appropriation for Memorial Day in addition to the sum named in Art. 26 of the March 2, 1896, meeting, or act in any manner relating thereto.

(This Article is inserted at the request of C. S. Parker and others.)

Art. 3. To see if the Town will adopt the provisions of an Act of the Legislature of the year 1895, entitled: An Act relative to the watering of streets in towns, Chap. 186, viz:—

Any town the population of which exceeds three thousand, which shall adopt the provisions of this act at its annual town meeting or at a special meeting called for said purpose, may annually appropriate and expend money for watering its public streets, and may provide that its Board of Assessors may assess upon the estates abutting on the streets so watered the whole or any portion of the cost of such watering; and the amount of such assessments upon each estate, unless previously paid, shall be certified by such Board of Assessors to the Collector of Taxes of the town, who shall include the same in the next tax bill issued for an annual tax upon such estate, and the same shall be a lien upon such estate, and shall be considered as constituting a part of, and shall be levied, collected and paid or abated in the same manner as the town taxes on real estate.

**HEREOF FAIL NOT,** and make due return of this Warrant, with your doings thereon, to the Town Clerk, on or before said day and hour of meeting.

Given under our hands, at said Arlington, this fourteenth day of March, in the year of our Lord one thousand eight hundred and ninety-six.

EDWARD S. FESSENDEN,
GEORGE D. TUFTS,
EDWIN S. FARMER,
*Selectmen of the Town of Arlington.*

**A true copy. Attest: GARRITT BARRY, Constable of Arlington.**

## TOWN HALL, on MONDAY, the second day of MARCH next,

*at six o'clock, A. M.; then and there to act on the following Articles, viz:—*

Art. 1. To choose a Moderator to preside in said meeting.

Art. 2. To elect a Town Clerk for the ensuing year.

Art. 3. To elect a Town Treasurer and Collector for the ensuing year.

Art. 4. To elect one Selectman for the term of three years.

Art. 5. To elect one Assessor for the term of three years.

Art. 6. To elect three members of the School Committee for three years.

Art. 7. To elect one Water Commissioner for three years.

Art. 8. To elect one member of the Board of Trustees of the "Pratt Fund" for the term of five years,

Art. 9. To elect one member of the Board of Commissioners of the "Sinking Fund" for the term of three years.

Art. 10. To elect two trustees of the Robbins Library for the term of three years.

Art. 11. To elect one member of the Consolidated Board of Trustees of "Soldiers' Monument and Robbins' Fund," and of Cemeteries, for three years; and one for one year, to fill vacancy caused by death of Henry Swan.

Art. 12. To elect two Auditors and five Constables for the ensuing year.

Art. 13. To elect one Sewer Commissioner for three years.

Art. 14. To elect one Park Commissioner for three years.

Art. 15. To elect one member of the Board of Health for three years.

Art. 16. To elect all other necessary Town Officers for the ensuing year.

Art. 17. To bring in their ballots, "Yes," or "No," in answer to the question, "Shall licenses be granted for the sale of intoxicating liquors in this town?" in accordance with Section 5 of Chapter 100 of the Public Statutes of Massachusetts.

*All town officers who are by law required to be chosen by ballot, except the Moderator, are to be voted for on one ballot. The polls will be opened as soon as possible after the organization of the meeting and kept open until five o'clock, P. M.*

Art. 18. To hear and act on the reports of the Selectmen and other Town officers and Committees heretofore appointed.

Art. 19. To determine what action the Town will take in regard to lighting the streets the ensuing year.

Art. 20. To act on the List of Jurors as revised by the Selectmen.

Art. 21. To see if the Town will cause one of the church bells to be rung daily (Sunday excepted) at twelve o'clock, M. and nine o'clock, P. M.

Art. 22. To make an appropriation for the Robbins Library for the ensuing year.

Art. 23. To make an appropriation for the Public Schools for the ensuing year and determine in what manner the same shall be expended.

Art. 24. To determine in what manner the Town ways, highways and bridges shall be repaired the ensuing year.

Art. 25. To determine what sum of money the Town will raise by general tax, to defray Town expenses, interest and State Aid, and make an appropriation for the same.

Art. 26. To see if the Town will appropriate the sum of one hundred and fifty dollars for the proper observance of Memorial Day, the same to be expended under the direction of Francis Gould Post 36, G. A. R.

(This article is inserted at the request of J. A. Blanchard and others.)

Art. 27. To see if the Town will authorize the Town Treasurer, under the direction of the Selectmen, to borrow money for any necessary purpose, in anticipation of the collection of taxes the current year, the same to be repaid directly from the proceeds of said taxes.

Art. 28. To see what action the Town will take in regard to extending its water pipes and making an appropriation for the maintenance and extension of its water service.

(This article is inserted at the request of the Water Commissioners.)

Art. 29. To see if the Town will vote to extend the water main on Mystic street from the present terminus to the Winchester line, and make an appropriation for the same.

(This article is inserted at the request of Edward F. Cronin and others.)

Art. 30. To see if the Town will authorize the Committee on Crosby School Building to use the unexpended balance of appropriation to dedicate the building and grade and fence the school-house lot.

(This article is inserted at the request of the Crosby School Building Committee.)

Art. 31. To see if the Town will make an appropriation to furnish the new Crosby School Building.

(This article is inserted at the request of the School Committee.)

Art. 32. To see if the Town will sell or otherwise dispose of the old Crosby School Building.

Ar. 33. To see if the Town will grade and macadamize the whole or a portion of Broadway, and make an appropriation for the same.

Art. 34. To see if the Town will vote to apply to the Metropolitan Water Board to be admitted into the Metropolitan Water District, under the provisions of Section 3 of Chapter 488 of the Acts of the year 1895.

(This article is inserted at the request of George I. Doe and others.)

Art. 35. To see if the Town will vote to accept and establish as a town way, the way called Elmore street, as laid out by the Selectmen, described as follows: Commencing at a point on the easterly line of Ashland street, at a stone bound 18.51 feet southerly from the range of the underpinning on the north side of house standing on Lot No. 5, on the west side of Ashland street; thence by a curve to the left, with a radius of 50 feet, 51.80 feet to a stone bound; thence south 52° 08' E., 432.56 feet to a bound; thence by a curve to the left, with a radius of 17.9 feet, 44.61 feet to a bound on the westerly line of Oakland avenue. The above-described line is the northerly line of Elmore street, which is laid out 40 feet wide, with a curve at the intersection of the south line with Ashland street, with a radius of 14.85 feet, and a curve at the intersection of the south line with Oakland avenue, with a radius of 50.20 feet; as shown on a plan on file at the Town Clerk's office, dated Jan. 24, 1896, and made by J. O. Goodwin, Surveyor.

Art. 36. To see if the Town will vote to accept and establish as a town way, the way called Oakland avenue, from Park avenue to Appleton street, as laid out by the Selectmen; described as follows: Beginning at a point on the easterly line of Park avenue, at a stone bound, at the intersection of Park avenue and Oakland avenue, thence north 70° 43' 20" east, 500 feet to a stone bound; thence by a curve to the left, with a radius of 444.14 feet, 439.69 feet to a stone bound; thence north 14° east, 443.23 feet to a stone bound; thence by a curve to the left, with a radius of 394.41 feet, 207.16 feet to a bound; thence north 16° 05' 40" west, 260.6 feet to a bound; thence by a curve to the right with a radius of 425 feet, 268.08 feet to a bound on the southerly line of Appleton street. Said described line passing 73.75 feet south-easterly from corner board at south-easterly corner of house of Alfred Bicknell, on Lot 13, Block 9, and 26.10 feet south-westerly of underpinning at north-west corner of house of Samuel J. Lombard on Lot 17, Block 2. Said described line being the easterly line of Oakland avenue, which is laid out fifty feet wide, as shown on a plan on file at the Town Clerk's office, dated Jan. 24, 1896, and made by J. O. Goodwin, Surveyor.

Art. 37. To see if the Town will vote to accept and establish as a town way the private way called Robbins Road, laid out by the Selectmen, described as follows: Beginning on the south-westerly line of Massachusetts avenue at a bound 220.61 feet south-easterly from the bound at the angle in the south-westerly line of Massachusetts avenue near the blacksmith shop of Thomas Higgins, thence the line runs in a south-westerly direction, making an angle with the south-westerly line of Massachusetts avenue of 80° 34', 1427.82 feet to a bound. The above-described line is the north-westerly side line of said street, and the south-easterly side line is parallel thereto and 45 feet distant therefrom. As shown on a plan on file in the Town Clerk's office, entitled "Acceptance Plan of Robbins Road," dated January, 1896, and made by H. S. Adams, C. E.

Art. 38. To see if the Town will hear and act upon the report of the committee of fifteen, appointed to take into consideration the question of Arlington's Water Supply, at the adjourned meeting held Nov. 21st, 1895.

(This article is inserted at the request of the committee.)

Art. 39. To see if the Town will appoint a committee of twenty-one, to whom all articles in the warrant involving the appropriation of money shall be referred, to consider and report at the adjourned meeting.

(This article is inserted at the request of the Committee on By-Laws.)

Art. 40. To see if the Town will authorize the Selectmen, at their discretion, to sell or dispose of the spring, and all land and rights connected with the same, now owned by Town, and formerly owned by the late Walter Fletcher.

Art. 41. To see if the Town will authorize the Selectmen to purchase a certain parcel of land on Mystic street, formerly owned by Edmund Dwight, for a gravel pit, and make an appropriation for the same.

**HEREOF FAIL NOT, and make due return of this Warrant, with your doings thereon, to the Town Clerk, on or before said day and hour of meeting.**

**Given under our hands, at said Arlington, this twentieth day of February, in the year of our Lord one thousand eight hundred and ninety-six.**

# REPORT

OF THE

# SELECTMEN.

The Selectmen have the honor to submit the following as their report for the year ending December 31, 1896.

Every year is an important one, and each brings its own peculiar burdens to bear, and problems to solve; the past year has been no exception to the rule.

By the death of Mr. George D. Tufts, which occurred on the nineteenth of June, the Board lost an earnest and valued member and the town a faithful and able official.

His long term of office, extending over a period of fourteen years, rendered his services peculiarly valuable. Appropriate resolutions were passed at a special meeting of the Board. It was voted that a copy be sent to Mrs. Tufts, and that they be spread upon the records of the town. The vacancy was filled at a special town meeting held November 30, 1896, by the election of Mr. George I. Doe for the remainder of the term ending in March, 1899.

Two weeks after the death of Mr. Tufts, our Superintendent of Streets, Mr. Samuel E. Kimball, received a severe injury by breaking his leg above the knee, while engaged in directing the placing of a heavy curbstone at the Robbins Library. In spite of his suffering, Mr. Kimball continued to direct the work that was in progress on the streets, although confined to his bed most of the time for many weeks. He was able to do so through the valuable aid of his brother, Asa Kimball, and his son, R. C. Kimball.

The demand for new and better streets and sidewalks, paved gutters and curbing, has largely increased the duties of the Superintendent of Streets and we desire to express our appreciation of Mr. Kimball's long and valuable services to the town in this position. We also wish to acknowledge the faithful efforts of all those connected with the highway department during Mr. Kimball's absence. The full details of the work on the streets will be found in the Superintendent's report.

The extended work on Massachusetts avenue, which has been in progress for some time, we are pleased to report as being practically completed. Efforts are being made to obtain from the State Highway Commission some assistance toward the care of this avenue.

The sewer has been built in the avenue as far as the junction of Lowell street, and the West End Street Railway Co. has extended its line of double tracks to the same point; this extension insures to the citizens of the town a very satisfactory service.

On the first of May last, the Company established a five cent fare from Boston to Arlington Heights, a distance of eight and one-half miles, with free transfers at Harvard Square to other points on their system. This concession made, without any solicitation on the part of the town, is a very gratifying evidence of the fairness which has always been exhibited towards our town by the West End Company.

## STREET SIGN BOARDS.

The replacing of street sign boards with new boards giving more information regarding distances to neighboring towns, has been commenced by the erection of new signs at the following points on Massachusetts avenue:—corner of Mystic, Medford, Pleasant, Forest and Lowell streets. This work will be continued as rapidly as possible, until all necessary points are provided with proper signs.

## GRADE CROSSINGS.

Under the existing laws of the Commonwealth ninety per cent. of the cost of separating the grades of highways and steam railroads is borne by the State and the railroads; the remaining ten per cent. is paid by the towns and apportioned in the State Taxes; acting under this law, your Board of Selectmen petitioned the Superior Court for the separation of grades on the following named streets:—Park avenue, Bow street, Forest street, Brattle street and Grove street. A commission has been appointed and a hearing on them is expected at an early date.

## CONTRACTS.

Full particulars of the contracts awarded for the construction of the sewer will be found in the separate report of the Commissioners. The contract for coal for the Schools, Fire Department and Town Buildings was awarded to the Peirce & Winn Company at the following prices:

| | |
|---|---|
| Furnace, Egg and Stove, | at $4.67 per ton |
| Honey Brook Lehigh, | at 5.17 " " |
| George's Creek Cumberland, | at 3.72 " " |

## STREET LIGHTING.

This completes the first year of the three years' contract with the Somerville Electric Light Company. The service has been satisfactory throughout the year with but few exceptions. The lighting of the streets every night, instead of twenty nights each month, has proved very acceptable to the public. It is impossible to entirely prevent the burning of the limbs of trees by the electric light wires, especially in wet and stormy weather. In this respect, much care has been taken the past year, and fewer complaints than usual have been received. The entire care of the trees on the

streets should be placed in the hands of one person with authority to do all that is necessary for their proper protection.

At present there are on the streets of the town 81½ Arc and 124 Incandescent Lights. The following have been added during the past year:

| | | |
|---|---|---|
| 2 | Arcs | on Jason Street, |
| 2 | " | " Hillside Ave., |
| 1 | " | " Wollaston Ave., |
| 1 | " | " Addison Street, |
| 2 | " | " Massachusetts Ave., |
| 3 | Incandescents | " Oakland Ave., |
| 2 | " | " Grove Street, |
| 1 | " | " Lowell Street. |

## POLICE DEPARTMENT.

The report of the Chief shows the excellent work that has been accomplished the past year. The addition of two patrolmen, as authorized at the last annual meeting, has secured for the town a uniform service which has given very general satisfaction. The placing of a telephone at Grove street, as requested by the Chief, would still further increase the efficiency of the force.

## FIRE DEPARTMENT.

The citizens of the town have good reason to be proud of our Fire Department. The equipment is complete and the Engineers are to be commended for the good judgment shown in purchasing the new apparatus, also for the excellent organization of the various companies. The appropriation made at the last annual meeting for this Department will prove to be a good investment.

## ALMSHOUSE.

This Institution is in excellent condition. In the past year a complete electric lighting system has been installed

throughout the buildings, including the stable. New floors have been laid in the lower hall, dining room and kitchen of the main building. Iron bedsteads, with new mattresses, have been placed in all the rooms and additional ventilation provided for the sanitary arrangements. Mr. and Mrs. B. F. Durgin continue in charge of the institution and its inmates to the satisfaction of all.

At present there are eight persons provided for—four males and four females. Two deaths have occurred during the year.

## TOWN HOUSE.

The appropriation for the repairs on this building proved to be inadequate, partly for the reason that the rentals of the hall have been less than usual, but more particularly from the fact that the condition of the building was much worse than was expected. The large hall, anterooms, stairways and lower corridor were thoroughly cleaned, painted and the walls tinted; all the fastenings for the busts on the walls were replaced and the figures themselves repaired. The electric lighting was entirely rearranged and new lights and new gas fixtures added.

Some new furniture was purchased for the platform, a new floor was laid the whole length of the lower hall and the entire sanitary outfit was replaced. The building will be connected with the sewer early in the spring. Some other minor repairs were made and the building is now in good condition.

The accumulation of valuable documents and plans, in the office of the Town Treasurer and Clerk, has exceeded the capacity of the two vaults now provided for their protection and it is necessary that additional accommodations should be made for their safety. The Assessment Plans of the Sewer Department alone represent several thousand dollars in value. The needs of the various executive de-

partments of the town have outgrown the accommodations of the present building. A new Town Building will soon be a pressing necessity.

The indebtedness of the town has been increased in the past year by the issuing of the following Bonds :

$100,000, 4 per cent., 40 year Sewer Bonds at 1.0794
5,000, 4 per cent., 30 " Water " " 1.065

The premiums obtained on these Bonds provide a substantial sum for the sinking fund. The entire bonded debt of the town now amounts to $583,100.

While the recent large expenditures have, for the time being, increased the rate of taxation, the advantages furnished by them cannot fail to result in a reduced rate in the near future. Situated, as our town is, in close proximity to the chief city in the Commonwealth, there is every reason why a liberal policy should be maintained towards the development of our territory and general improvements. A wise and liberal expenditure of money in any community is the greatest public economy—it arouses enthusiasm among the inhabitants and attracts the most desirable class of citizens—those who seek for pleasant and healthy surroundings rather than cheap lands.

It is admitted by all that a uniform rate of taxation from year to year is most desirable for the welfare of a town. In our opinion much could be accomplished in that direction if the appropriations for the large Highway expenditure, which partakes of the nature of permanent construction, were made in the form of a ten years' loan, a portion of which would be provided for each year. The entire length of Broadway should be rebuilt and graded at once ; it would also be a wise economy to put in several miles of paved gutters, on the steeply graded streets that suffer from washouts after every heavy rain ; but to carry out these two sug-

gestions would require an outlay of money entirely too great to be borne by any single annual appropriation. We present these suggestions for your careful consideration.

EDWARD S. FESSENDEN,
EDWIN S. FARMER,
GEORGE I. DOE,
*Selectmen.*

# REPORT

OF THE

# SUPERINTENDENT OF STREETS.

---

*To the Honorable Board of Selectmen:*

GENTLEMEN —I submit to you my annual report. I am able to report the completion of Massachusetts avenue and Mystic street widening, and, as you well know, they have been expensive jobs. The next street requiring a great outlay is Broadway. We have already commenced to get ready, by teaming the crushed stone removed from Massachusetts avenue in laying the double track and spreading upon the surface of the street near David Puffer's estate, and hauling the broken rock from Dr. Reed's cellar on Maple street, and piling along south side of the street ready for use when required. Before any great outlay is made, the drainage should be considered, not only for this street but also including a large section in this vicinity.

In starting to grade Franklin street, between Warren street and Lewis avenue, the question of drainage came up and it was found by taking levels that it would make a fill nearly to the sills of the houses already built so the grading was abandoned and a slight fill at the lowest place in centre of the street was made, throwing the water to the sides where it lays until it soaks into the ground. This whole territory requires a system of surface drainage and the demand for such increases every year.

I find, as our town increases in population, there is a greater demand for improvements, requiring better drainage, better streets and walks. There has been a great demand for sidewalk extensions this year and it will require liberal appropriations to keep up with the demand.

Upon the following named streets extensive repairs have been made:

## Academy Street

has been graded to a sub-grade three inches below the proposed grade, intending to finish with a coat of fine crushed stone, but owing to the delay in putting in the sewer it was thought best not to finish until spring. There has been edgestone set in front of the High School and on the west side from Massachusetts avenue to nearly opposite Ravine street, and a concrete walk five feet wide laid the same distance. There have been crossings put in at Massachusetts avenue, and across Maple street, consisting of two rows of eighteen inch granite flagging with blocks of paving between and on each side.

## Bartlett Avenue

has been graded from residence of Dennis Collins to the point accepted by the town near W. H. Webber's, and built under the betterment act, from this point, to land of Geo. I. Doe. A coating of crushed stone three inches thick was put on and well rolled and a light coat of screened gravel over the stone, the walks graded and covered with stone-dust.

## Central Street

from the avenue about 150 feet has been graded to conform to the grade of the avenue. A coat of fine crushed stone put on, rolled and covered with screened gravel and a granite crossing put in at the avenue end.

## Gray Street

from Pleasant street to residence of J. G. Leetch has been graded and gravelled. The sidewalk on south side graded from Pleasant street to Jason street, fine crushed stone to a depth of three inches put on and covered with stone-dust.

## Massachusetts Avenue.

There have been extensive repairs on the avenue this year requiring a large part of the appropriation. From Alewife Brook to Wyman street on the north side, it has been picked up by the steam roller, the surface carefully smoothed and a coating of crushed stone put on, from three to eight inches thick, well rolled and covered with screened blue gravel and again rolled until it became solid.

From Water street to Mill street, both sides have been lowered to conform to the grade of track. The lowering of the grade on the avenue is an expensive job, as the old macadam had to be removed and the street graded to a sub-grade, nine inches below required grade, before putting on crushed stone. The breaking up is done by putting the picks in one wheel of the steam roller and hitching a heavy steel plow behind the roller, thus plowing the street instead of picking by hand. The material removed in lowering the grade was screened and the stone used for the first coat of macadam, well rolled and covered with a coating of coarse crushed stone, this coating well rolled and covered with a coating of fine crushed stone, well rolled, and finally covered with screened blue gravel and rolled until solid. Edgestone has been set from Water street to Mill street on one side, and from the Library to Jason street on the other. The widening at the upper end has been completed as referred to, retaining wall and fences built and the roadbed macadamized from West End Car House to Lexington line, the sidewalk graded from the line to Park avenue and coated over with stone-dust. Between Mill street and Lowell street, in lay-

ing double tracks, the grade was changed so as to leave some places in the roadbed high and other places low. This part of the avenue should be regraded the coming season.

## Mystic Street.

But little has been done on this street besides finishing the widening. The surfacing of the sidewalks could not be done as the deep fills should remain one year and allowed to settle, and as a location for an Electric Road has been asked for, it was thought better to wait until that was decided before making repairs.

## Old Mystic Street

from Mystic street to Oak street has been straightened and graded, a coating of fine crushed stone put on through the centre, rolled and covered with screened gravel.

## Pine Street

has been crowned by scraping the high edges into the centre and then covering with a coating of gravel.

## Park Avenue.

As the high sides prevented the water from running from the street to the gutters, they have been removed and the material taken to make a sidewalk opposite the stand pipe. The walk on the west side has been coated over with stone-dust nearly its entire length, also from Appleton street to Florence avenue on the east side.

## Winter Street.

The sidewalk on the northwest side has been graded, a coating of fine crushed stone to a depth of three inches put on and rolled, and then coated over with stone-dust; an edge-stone set on this side from Massachusetts avenue to and in front of Crosby schoolhouse.

## Wollaston Avenue

has received a complete renovation, an edgestone set, and paved gutters of granite blocks four feet wide on both sides, from Park avenue to west side of Wachusett avenue, and the street well crowned with blue gravel. This makes a substantial improvement and adds greatly to the appearance of the street. Other streets in this vicinity should be treated in the same way and at this time, January 1st, I am teaming paving blocks and piling them ready to use on Appleton street, between Park avenue and Claremont avenue. Other streets have been repaired by filling low places and wheel ruts, repairing fences and rebuilding retaining walls. Most of the streets received their usual spring and fall cleaning.

## Sidewalks.

There have been 2628 yards of concrete walk laid, 591 yards repaired by top-coating and macadam and gravel walks extended where required. The stone-dust from crushed stone has been used to top-coat new and old walks. There have been six granite walks laid, one front of Grand Army Hall to West End track, one across Water street, one across Central street, one across Academy street on Massachusetts avenue, one across Maple street at Academy street end and one across the avenue at Medford street.

There should be crossings laid in many other places and if a few are added each year we will soon have the crossings in good condition.

There have been 8576 feet of edgestone set on the following streets: Academy street 1660, Claremont avenue 80, Jason street 200, Massachusetts avenue 1982, Mystic street 1095, Maple street 200, Medford street 95, Prescott street 137, Russell street 186, Winter street 650, Water street 191, Wollaston avenue 2100.

## Paved Gutters.

There have been 1640 yards laid this season. I think they will prove a saving to our streets. Paved gutters should be laid on one or more of our hilly streets every year, until every gutter is paved that has a grade of three per cent. or more.

## Watering Streets.

The same streets were watered as last year, requiring the same number of teams at a cost of $2500. Eli Fletcher furnished one double team, the Fire Department two, and the Highway Department two single teams.

## Offal and Ashes

have been removed under the direction of the Highway Department, same as last year. This coming spring an extra team will have to be put on to collect the ashes, as it will require one team all the time in order to make three collections a week instead of two.

## Stone Crusher.

The improvements that were under way at the close of last year were completed ready for use early in the season and we now have storage room for a day's crushing and with the revolving screen the stones are much better separated and each size falls into a separate bin and when a load of either size is needed, all there is to do is to pull a lever and fill a cart with the size wanted.

A new boiler will have to be purchased as the Insurance Company has reduced the pressure on the old boiler from ninety pounds to sixty, leaving hardly power enough to run the crusher to its full capacity.

## The Steam Roller

is in good condition, and besides doing our own work has been rented to other towns. The amount received for rental was $400.15.

## Teams.

There are now fourteen horses in the department. Five new ones added last spring, three old ones being disposed of; one was exchanged and two killed as they were unfit for use.

The carts are in good condition and will require but slight repairs. A new road machine should be purchased as the old one does not do good work. There should be more shed room provided as some of the carts have to remain out exposed to the weather.

Respectfully submitted.

SAMUEL E. KIMBALL,

*Superintendent of Streets.*

# ANNUAL REPORT

OF THE

# CHIEF OF POLICE.

---

*To the Honorable Board of Selectmen of the Town of Arlington:*

GENTLEMEN—I have the honor to submit for your information and consideration, my annual report as Chief of Police for the year ending Dec. 31, 1896.

## Arrests.

| | |
|---|---|
| Whole number of arrests for the year, | 160 |
| Males, | 152 |
| Females, | 8 |
| Adults, | 146 |
| Minors, | 14 |

**The offences for which arrests have been made are as follows:**

| | |
|---|---|
| Assault, | 8 |
| Adulterated Milk, | 1 |
| Assuming to be an officer, | 1 |
| Breaking and entering, | 2 |
| Capias, | 1 |
| Conveying mortgaged property, | 1 |
| Concealing mortgaged property, | 1 |
| Cruelty to animals, | 1 |
| Default warrant, | 1 |
| Disturbing the peace, | 15 |
| Drunkenness, | 92 |
| Disturbing a religious meeting, | 1 |
| Delirium tremens, | 1 |

| | |
|---|---|
| Insane, | 1 |
| Keeping unlicensed dog, | 1 |
| Liquor nuisance, | 5 |
| Larceny, | 7 |
| Malicious mischief, | 2 |
| Mutilating Town property, | 1 |
| Obtaining goods under false pretences, | 2 |
| Robbery, | 1 |
| Selling milk below standard, | 1 |
| Taking and driving team, | 4 |
| Vagrant, | 1 |
| Violation Town By-Law, | 1 |
| Walking on R. R. tracks, | 4 |
| Wilful trespass, | 3 |
| Total, | 160 |

## Lodgers.

| | | |
|---|---|---|
| Whole number of lodgers, | | 534 |
| Males, | 531 | |
| Females, | 3 | |
| Adults, | 528 | |
| Minors, | 6 | |
| White, | 533 | |
| Colored, | 1 | |
| Foreign born, | 432 | |
| American born, | 102 | |

As will be seen, we have entertained two hundred and ninety-one less lodgers than last year. Many appear to be tramps not from choice, but rather from stress of circumstances.

| | |
|---|---|
| Amount of property reported stolen, | $201 |
| Amount of property reported recovered, | $333 |

P. S. This report showing that more property was recovered than was reported stolen was where a team was stolen in Boston and property recovered here, thief arrested and turned over to Boston officer.

### Miscellaneous Business.

| | |
|---|---|
| Accidents reported, | 32 |
| Buildings found open and secured, | 42 |
| Cases investigated, | 73 |
| Contagious diseases reported, | 23 |
| Defective streets and sidewalks, | 51 |
| " water pipes, | 12 |
| " fire alarm box, | 1 |
| " street lamps, | 1950 |
| " wires (electric and telephone), | 25 |
| Dead animals found, | 5 |
| Disturbances suppressed, | 5 |
| Dogs killed, | 27 |
| Fire alarms given, | 6 |
| Fires extinguished without alarm, | 5 |
| Intoxicated persons helped home, | 1 |
| Lanterns hung in dangerous places, | 44 |
| Lost children restored, | 10 |
| Sick and injured persons assisted, | 5 |
| Stray teams put up, | 19 |
| Street obstructions removed, | 32 |

Police appropriation, $6700

For a detailed account of all expenses, see Town Treasurer's report.

### Police Organization.

Headquarters, Town Hall Building.

ALONZO S. HARRIMAN, Chief.

GARRITT BARRY, Sergeant.

## Patrolmen.

| | |
|---|---|
| Garret J. Cody, | John Duffy, |
| Daniel M. Hooley, | Andrew Irwin, |
| Charles H. Woods, | James E. Whitten. |

The Chief and one patrolman are on duty in the daytime; during the night, one sergeant and five patrolmen are on duty.

## Illegal Liquor Business.

We have done our best to enforce the liquor law and in every case where we could obtain sufficient evidence prosecutions have been made, but in order to successfully prosecute, we must have sufficient evidence, otherwise our efforts are worse than useless.

The liquor that has been seized and forfeited by the court, has been turned over to the Chief of the Massachusetts District Police.

## Changes.

During the past year two officers have been appointed, James E. Whitten and Charles H. Woods, thereby increasing the force by two men; two new night routes have been made and the new men assigned to them. I now think that the town is as well protected as any town in this vicinity.

## Recommendations.

I would recommend that one more telephone box be connected at the corner of Grove street and Massachusetts avenue, for telephone calls to the station.

I also recommend that the apartment now occupied by the postoffice, soon to be vacated, be utilized as police headquarters, as the small room so long used by this department for office and guard room is now inadequate for the growing demands of the service.

## Conclusion.

In conclusion I wish to thank your honorable board for the courteous consideration received from you officially, also all town officials for their assistance.

It gives me great pleasure to state that the members of this department have shown a desire to perform their duties faithfully at all times, and to assist me in the discharge of my duties, for which I wish to extend to them my hearty thanks.

Respectfully submitted.

ALONZO S. HARRIMAN,
*Chief of Police.*

# ANNUAL REPORT

OF THE

# CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

---

*To the Honorable Board of Selectmen:*

GENTLEMEN :—I herewith submit my annual report for the year ending Dec. 31, 1896, which contains several recommendations and suggestions, which I trust are of sufficient worth to receive favorable consideration. Fortunately, we have had no large fires to contend with during the past year, although the opportunity has been frequent. Owing to the promptness of the department, large fires have been averted. The men in the department are capable, faithful and deeply interested in the arduous duties which they are called upon to perform and deserve the confidence of the citizens of the town.

## FIRES AND ALARMS.

The fire losses this year have been very small. The department has answered 17 box and three still alarms, as follows :

Jan. 23d. 4.10 P. M. Box 36. Naphtha explosion in Finance Block. Value $4000. Insurance $3000. Loss $100. Stock value $500. Insurance $400. Loss $40.

Feb. 2nd. 2.15 A. M. Box 25. Lime fire at Mrs. H. C. Whittemore's, 207 Massachusetts avenue. Damage to Mrs. D. C. Rood's house, lime value $50. Loss $30. D. C. Rood's $2000. Insurance $1500. Loss $10.

March 7th. 3.55 P. M. Box 39. House of Mrs. E. L. Bartlett. Valuation $3000. Insurance $2500. Value of furniture $500. No loss.

March 14th. 9 P. M. Box 27. S. A. Fowle's mill. Valuation $7000, Insurance $5000. No loss. Stock and machinery $10,000. Insurance $6000. Loss $325.

April 11th. 4.50 P. M. Box 25. House of E. L. Wellington and Annie L. Proctor. Valuation $3500. Insurance $3000. No loss. Furniture valuation $1000. Insurance $800. No loss.

April 13th. 1.05 P. M. Box 46. Grass fire. J. Maloney's grass. Hotbed mats and planks. Valuation $800. Insurance $600. Loss $12.50.

April 15th. 2.50 P. M. Box 21. Board fence fire of Michael Coughlin. Valuation $25. Loss $10.

April 18th. 12.05 P. M. Box 61. Grass fire on Arlington Heights. No loss.

May 13th. 11.30 A. M. Box 36. Unfinished house of L. C. Tyler. Valuation $4500. Insurance $4000. Loss $20.

June 13th. 8.50 A. M. Box 36. Peirce & Winn Co.'s coal yard. No damage.

June 28th. 8.45 A. M. Box 36. F. P. Winn's store. No fire.

June 29th. 3.50 P. M. Box 15. Grass fire on J. P. Squire's estate. No damage.

July 4th. 12.15 A. M. Box 26. Stable of Mr. B. F. Russell. Valuation $3000. Insurance $2500. Loss $140. F. P. Winn's stock value $350. Insurance $200. No loss. J. O. Holt's stock value $350. Insurance $250. No loss.

Oct. 21st. 1.04 P. M. Box 45. R. T. Sawin's house, corner Brattle street. Valuation $1450. Stingle's furniture $300. No loss.

Oct. 29th. 7.10 P. M. Box 15. House on J. P.

Squire's estate. Valuation $1200. Insurance $1000. No loss. P. Quinn's furniture $200. No insurance. No loss.

Dec. 12th. 4 45 P. M. Box 54. New house of E. C. Bolles, Arlington Heights. Valuation $4500. Insurance $4000. Loss $82.

Dec. 23d. 11.45 P. M. Box 36. New block of Warren Sherburne. Valuation $20,000. Insurance $15,000. Loss $425.

We have had two fires of incendiary origin which have been investigated by the Fire Marshal.

### MEMBERSHIP.

The membership of the department remains the same as in last report, with the exception of one permanent man as driver of Hook and Ladder truck. We have now three permanent drivers. The pay of the call men has been raised from $35 to $50 per year, which I hope will have a tendency to keep the companies full of men, who are in town all or a greater part of the time. Our inability, heretofore, to do this, has been a great disadvantage.

### APPARATUS.

In accordance with the vote passed at the March meeting, we have placed in William Penn House a two-horse Hose Wagon capable of carrying 1500 feet of hose; also a two-horse Hook and Ladder truck. We now have five pieces of apparatus, and I think no town in this vicinity is better equipped.

### BUILDINGS.

Hose Houses 1, 2 and 3 have been thoroughly repaired as follows:—Hose 1—New floor has been laid, and some new sills. Repainted outside, and a room finished for a sleeping room. Hose 2—New floor and some new floor timbers. Some changes have been made making room for extra stalls. A large sleeping room has been added. This build-

ing is now in good condition and ought to be kept so for some years. William Penn House has had extensive repairs. Room has been made for four stalls back of apparatus with horses facing out. In order to make this change closets and stairway had to be removed. This is a convenient House with the exception of not giving quite enough room. William Penn House is now in good condition, but some new heating apparatus should be placed in it the coming year. The furnace now in use has been in the House twenty-three years.

Hose 4 at lower section of the town still remains in the same condition as last reported. I think the town will be called upon to place a building in this section in a short time.

### HOSE.

The hose is in the same condition as last reported. No new hose has been bought this year. Some small appropriations should be made each year for hose.

### FIREMEN'S RELIEF ASSOCIATION.

The association is in good condition. Through the generosity of the citizens who purchased tickets for our Annual Ball, we were able to place in our Treasury $300. This worthy institution not only helps members in sickness, but causes them to take a deeper interest in the department.

### FIRE ALARMS.

This branch of the system has been maintained in good condition by the superintendent. We have had two burnouts caused by electric currents, and I hope I shall be able to place in our line some apparatus which will take this current off.

### SUGGESTIONS.

I would suggest that the citizens acquaint themselves with the location of the nearest Fire Alarm box and where the key for the same is kept. Any responsible person liv-

ing near a box may obtain a key on application. I also suggest that the poles on which the boxes are placed be painted with a red band above the box, also that a small red incandescent light be placed on said poles.

I would suggest that a permanent man be employed as driver of Hose 2. A permanent man placed in this House would have a tendency to make the department much more efficient. Also that four pony fire extinguishers be purchased; two be placed on Hook and Ladder truck, and two on Hose 3. I think one of Eastman's deluge sets would be of service in case of a large fire, with plenty of water of good force, and its addition might have a good effect on insurance rates.

APPROPRIATIONS.

To meet the expenses of the department for the ensuing year, I would recommend the sum of $7500 be appropriated. I ask this appropriation for the following reasons: The pay of call and permanent men amounts to $5500 alone; and the cost of feed for horses is $800.

In closing I wish to express my heartfelt thanks to your Board for the courteous and gentlemanly manner in which they receive me in matters pertaining to the Fire Department. To my Associate Engineers,—accept my thanks for co-operation in all matters pertaining to the management of the Department. To the Captains and Members,—accept my thanks for the promptness displayed in responding to the alarms and the interest taken in striving to render quick and effective service.

Respectfully submitted.

CHARLES GOTT,

*Chief Engineer.*

# REPORT

OF

# BOARD OF HEALTH.

---

At the annual town meeting, March second, 1896, Edwin Mills was elected a member of the Board of Health for three years, to fill vacancy occasioned by the expiration of his previous term of office as a member of the Board.

The Board organized by choice of Edward S. Fessenden for Chairman, and B. Delmont Locke as Clerk.

We are pleased to be able to report that this year, like the last one, has been free from cause for alarm from any epidemic of dangerous or contagious diseases. Such favorable records indicating good sanitary conditions may well prove a source of great satisfaction to present or prospective residents of our town

Among occurrences of the year now closing, in a sanitary point of view, of greatest importance is the rapid progress which has been made in the construction of our public sewers and connection of same with the Metropolitan system which now serves a large portion of our town, as more fully set forth in reports of the sewer commissioners.

Spy pond has always been notable in the history of our town and of great interest to our citizens for purposes of recreation and the commercial value of its product of ice.

Of late years the problem of how to purify its waters has engaged the attention of citizens and local organizations.

Last summer Cambridge sewerage having been cut off from discharging into Alewife brook, as that stream is a natural outlet of Spy pond, our Board took action to improve the water course thereof. The city of Cambridge being called upon did a large amount of work clearing the bed and repairing the banks of the brook. Similar work within our town boundaries has been done at considerable outlay by parties interested. This Board paid $88.37 from the town appropriation for their use, towards the cost of said work. A portion of the borders of the pond has also been cleared from overgrown foliage, old brush, and other objectionable matter which, together with the work referred to of clearing the brook, has resulted in a very noticeable improvement of the condition of the pond.

Dumping grounds often become dangerous nuisances, especially when owners post notices, "Dump your dirt here." Garbage, rubbish and other offensive matter is apt to accumulate with astonishing rapidity day and night. Accidental fires therein, or attempted cremation thereof, creates odors, offensive and dangerous. Orders have been issued, which are enforced by the police department, to abate such nuisances.

Last October in compliance with request of our State Board of Cattle Commissioners a thorough examination was made of all the cattle and swine kept within the limits of our town. Dr. Alderman, veterinary surgeon, and Chief of Police Harriman attended to this duty. No case of disease was found.

The Plumbing Inspector reports that during the year 1896 there have been placed on file one hundred and twenty-four applications for permits and notices of plumbing work to be performed; also, by request, many dwellings and other buildings have been examined, and recommendations

made, especially concerning plumbing work to be connected with the town sewers.

The enforcement of our State plumbing laws in conjunction with city and town regulations relating thereto has resulted in very noticeable improvements in the quality of work performed and the sanitary conditions thereof.

Efforts are being made to secure by legislation or otherwise more uniformity in the rules and regulations adopted by cities and towns concerning the standard of materials to be used in plumbing; also, as to the qualifications needed and form of examination which must be passed to secure a license under the law as a master or journeyman plumber.

Plans and specifications for plumbing work under the law vary greatly, but still greater variations can be found in the execution thereof. No rules and regulations or inspections and tests can secure good plumbing work when unskilled labor is employed thereon, or unfair contracts made for the performance thereof.

All plumbing should be open and exposed, that sanitary defects may be promptly discovered and remedied. Progress is being constantly made in the production of improved materials and appliances for construction of open plumbing.

Owners, architects and plumbers, in plans for proposed plumbing, should provide for open work; especially that all traps, drain and vent pipes are placed to be always accessible for inspection.

Sewer connections, with plumbing, should always be made with utmost care to avoid sanitary defects.

The plumbing of each house differs more or less from every other. A special arrangement of vent pipes is needed to effect a circulation of air through every house system of drainage.

Plumbing without suitable traps and vents, or otherwise defective, must be altered to conform with our town plumbing regulations before connection is made with the public sewer.

In localities where town sewers are constructed ready for use, the entire plumbing of each building should be connected therewith, that defective drainage and cesspools may be dispensed with as dangerous to the public health.

In concluding this report we desire to express our appreciation of the aid and assistance rendered us in the discharge of our duties by town officials, local organizations and citizens generally.

We bespeak for the future the hearty co-operation of all interested in the adoption and enforcement of needed regulations for the preservation of public health, that improvements of sanitary conditions in our town may keep pace with the requirements of increasing population and the demand of the times for wise legislation and careful administration of sanitary regulations.

We herewith append copy of our town mortuary record for 1896.

EDWARD S. FESSENDEN,
EDWIN P. STICKNEY, M. D.,
EDWIN MILLS,
*Board of Health.*

## Deaths Registered during the year ending Dec. 31, 1896.

| Names. | Date of Death. | Age. | | |

# Report of Water Commissioners.

Last year upon the practical completion of the new High service works, the Board in its annual report gave a general history and description of the whole works, including a plan showing the Water Works property and the extent of the pipe system.

During the past year no great changes have taken place, but the pipe systems have been extended as required, and in four streets, viz., Coral and portions of Beacon and Park streets and Lewis avenue, new 6-inch and 8-inch cast iron pipes have been laid in place of 4-inch pipes which it was necessary to remove on account of the construction of the sewer in those streets.

**Pipe Extensions and Renewals.**

In all 1025 feet of 6-inch and 389 feet of 8-inch pipe have been laid to replace old 4-inch pipe, and 4333 feet of 6-inch and 642 feet of 8-inch pipe have been laid in extending the pipe system, 1361 feet of the 6-inch being on the Low service, the balance of the 6-inch and all the 8-inch being on the High service, the necessary gates and hydrants have been set in connection with the pipe. One new hydrant was set on Winter street on the line of cement-lined pipe.

The following tables show the amount of the extensions and renewals in detail.

To replace cement-lined pipe which was removed:

| | Length, ft. | Size, in. | Hydrants. | Gates |
|---|---|---|---|---|
| Coral St., | 293 | 6 | 1 | 0 |
| Park St., | 272 | 8 | 1 | 1 |
| Beacon St., | 117 | 8 | 0 | 1 |
| Winter St., | 40 | 4 | 0 | 1 |

To replace 4-inch iron pipe which was removed to make way for the sewer:

| | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Lewis Ave. | 732 | 6 | 2 | 2 |

To extend the Low Service:

| | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Grove St., | 278 | 6 | 0 | 0 |
| Chapman St., | 296 | 6 | 1 | 1 |
| Devereaux St., | 319 | 6 | 1 | 1 |
| Pond Lane, | 468 | 6 | 1 | 1 |

To extend the High Service:

| | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Harvard St., | 312 | 6 | 1 | 1 |
| Oakland Ave., | 973 | 6 | 2 | 1 |
| Elmore St., | 190 | 6 | 0 | 1 |
| Cliff St., | 302 | 6 | 0 | 1 |
| Irving St., | 262 | 6 | 0 | 1 |
| Bartlett Ave., | 516 | 6 | 1 | 2 |
| Westmoreland St., | 285 | 6 | 0 | 1 |
| Dundee Road, | 642 | 8 | 1 | 1 |
| Ashland St., | 120 | 6 | 0 | 0 |

In all 5346 feet of 6-inch and 1031 feet of 8-inch pipe, 12 hydrants and 16 gates.

The pipe which was removed is as follows, all being from the Low service:

| | Length, ft. | Size, in. | Hydrants. | Gates |
|---|---|---|---|---|
| Coral St., | 293 | 4 | 0 | 0 |
| Beacon St., | 107 | 4 | 0 | 0 |
| Park St., | 262 | 4 | 1 | 0 |
| Lewis Ave., | 732 | 4 | 1 | 1 |
| Winter St., | 40 | 4 | 0 | 1 |

In all 1434 feet 4-inch pipe, 2 hydrants and 2 gates.

## Present Pipe System.

Length of main pipe in use January 1, 1897:

LOW SERVICE.

| | Size, in. | Length, ft. | | Hydrants. | Gates |
|---|---|---|---|---|---|
| Cement-lined pipe. | 12 | 10,991 | | | |
| | 8 | 6,121 | | | |
| | 6 | 16,796 | | | |
| | 4 | 24,484 | | | |
| | | | 58,392 | 84 | 56 |
| Iron pipe. | 12 | 150 | | | |
| | 8 | 6,480 | | | |
| | 6 | 4,636 | | | |
| | 4 | 12,207 | 23,473 | 50 | 44 |
| Total both kinds, | | | 81,865 | 134 | 100 |
| | | 15.505 miles. | | | |

HIGH SERVICE.

| | Size, in. | Length, ft. | Hydrants. | Gates |
|---|---|---|---|---|
| Iron pipe. | 12 | 16,503 | | |
| | 10 | 17,180 | | |
| | 8 | 9,213 | | |
| | 6 | 24,646 | | |
| | 4 | 494 | | |
| | | 68,036 | 140 | 99 |
| | | 12.885 miles. | | |

Total of both services 28.39 miles of pipe, 274 hydrants and 199 gates.

In addition to the above there are 3436 feet of smaller pipe, 2-inch to 1¼-inch, which is laid in places where hydrants were not needed and the amount of water desired was small.

The details of the cost of the pipe extensions will be found in the report of the Superintendent. Records and sketches showing the location of the pipes and connections have been made and arranged in convenient form for use and reference.

## Quantity and Quality of Water.

The supply of water for the High service has been taken from 20 of the driven wells, the five wells which were shut off in 1895 have remained so. No difficulty was had at any time during the year in obtaining all the water needed from 20 wells. Analyses were made of this water about every other month throughout the year. The results are given in Table III. attached to this report, which also gives the results of two analyses of the water from the Low service reservoir. These show very little change in the quality of the water.

The supply for the Low service was taken from the filters alone 240 days; when this was insufficient, the brook which supplies the reservoir was turned into the filters and these were sufficient for 54 days, when these were insufficient the water stored in the Great Meadows was also turned into the pipes for 72 days, as shown in the following table.

Dates on which water was taken from the various sources:

| | |
|---|---|
| January 1 to May 2, | Filters. |
| May 2 to June 8, | Filters and Brook. |
| June 8 to June 18, | Filters. |
| June 18 to July 2, | Filters and Brook. |
| July 2 to Sept. 12, | Filters, Brook and Great Meadows. |
| Sept. 12 to Sept. 14, | Filters and Brook. |
| Sept. 14 to Dec. 31, | Filters. |

On September 12 all the water obtainable directly from the Great Meadows had been used and we made preparations for turning part of the water from the High service into the Low service by laying a 2½-inch pipe from the High service pipe in Lowell street into the filter at the side of the reservoir. About the time that this was completed the heavy rains of last September began and relieved us of the danger of a water famine for the season. The Board early

in the season issued the usual notice, calling the attention of consumers to the hours to which the use of water through hose is restricted, and on July 22 issued a notice restricting the use of water through hose on lawns to 1½ hours and on hotbeds to three hours a day. When it found that even then the supply was rapidly decreasing, it issued, on August 28, a notice prohibiting the use of water through hose for all purposes, but even then it found the supply very rapidly decreasing, and there is no doubt that but for the very unusual rains which we had in September, the quantity available would have been utterly inadequate for the domestic supply, unless the very impure and offensive water in the reservoir had been turned into the pipes.

For the purpose of studying this question, as we have no records of rainfall on our water-shed, we have taken the records of the Mystic water-shed, which adjoins ours, and the table of the rainfall on that water-shed since 1877, taken from the report of the Boston Water Commissioner, is appended to this report as Table II. From this table it will be seen that the total rainfall last year was 39.805 inches, nearly 4 inches less than the average for the nineteen years since 1877, about 8½ inches greater than the least, and nearly 17 inches smaller than the greatest yearly rainfall in that time. It will also be seen that the rainfall in last September was one of the greatest recorded and was more than double the average for the 19 years; also that the total for the four dry months, July to October, was more than an inch above the average, showing that in case we had a year like 1881 or 1883 or 1892, we should be hard pushed for water, with our increased number of consumers. In the last two years the number of new services put in on the Low service has more than equalled the number transferred from the Low to the High service. We must also remember that with the advent of sewers more water will be used by consumers and

considerable quantities will be required for flushing and cleaning the sewers.

## Recommendations.

When the town voted last spring not to apply for admission to the Metropolitan Water District, the Board at once began to investigate as to what should be done to place our present works in the best possible condition, and the results of the investigation and the recommendations of the Board were given to the town in a special report dated May 23, 1896. In brief, these recommendations were:

First. To build additional filters on the westerly banks of the reservoir and to connect them with our distributing pipe system at an expense of $10,000.

Second. To protect the purity of the waters of North Brook at an expense not exceeding $15,000.

Third. To divert Village Brook in East Lexington at an expense of $2500.

Fourth. To lay a larger main pipe from the reservoir to the corner of Massachusetts avenue and Brattle street, at an expense of $17,000.

The Board also stated that in addition to the improvements already referred to, that it would be necessary in the near future to provide large additional storage capacity to retain at least a portion of the water which now goes to waste each spring. Up to the present time the Board has made no investigation as to the best manner of providing any additional storage basins. None of the recommendations were adopted by the town, but the narrow escape which we had from a water famine on the Low service the past season demonstrated to the Board that the time has come when something should be done without delay.

In our opinion, the first recommendation as to the additional filters should be carried out this season.

The necessity for carrying out the second, which relates

to North Brook, is not as urgent because the flow from this source is very small at the season when the water of the brook is being taken directly into the pipes, but the supply will never be satisfactory until some action is taken in regard to it, especially after additional storage capacity is provided. We recommend that the Board be authorized to arrange with the owners of the land near the brook or their tenants for the removal of some of the worst causes of contamination, and that a small appropriation be made for this purpose.

The third, in regard to Village Brook, is the least important, but nevertheless the brook in its present condition is a menace at times to the health of the town.

The necessity for the fourth, the larger pipe from the reservoir, is increasing each year.

The quantity of water used from the High service system has increased so rapidly, as will be seen from a comparison of the table in this report with that in the report of last year, that it seems to the Board that the time has come when a second pump should be placed in the pumping station as an emergency pump to be used whenever for any cause it may be necessary to lay off the regular pump. From bids which we have received, we find that such a pump with its foundation and appurtenances will cost us about $1500, set up and connected ready for use. This will not be a high duty pump like our present one, which cost about three times as much, but is a pump which will raise as much water as the present one by burning more coal, and as the new pump will only be used when the old one is laid off for repairs, the interest on the additional cost of the high duty pump will more than offset the cost of the extra coal burned while running the low duty emergency pump. We therefore recommend that the sum of $1500 be appropriated for placing a second pump in the High service pumping station.

## Pumping Station.

Table I. gives the statistics for the Pumping Station for the year 1896. At the right of this table are appended corresponding statistics of water pumped and water used for the last seven months in 1895. On comparing these tables it will be seen that the consumption of High service water has increased very much. The average daily consumption for the last seven months of 1895 was 108,376 gallons, while for the corresponding period this year it was 192,341 gallons, an increase of over 77 per cent.

In 1895 there were 190 services on the high service system and 72 were added during 1896, an increase of nearly 38 per cent. Assuming the average number of services in 1896 as 226 the consumption of water per day per service was 727.5 gallons, and assuming five persons to an average family this gives a consumption of 145.5 gallons per day per person. This estimate includes all leaks of the system, but it shows also that much water is unnecessarily wasted.

The average duty for 100 lbs. coal as used, making no allowance for moisture, banking fires, etc., was, for the entire year, 38,943,000.

The following table shows the change in level of the Great Meadows from May 1st to October 1st inclusive and gives the rainfall as observed on the Mystic Water Shed. As previously stated, water was drawn from the Great Meadows from July 2nd to September 12th to supply the low service system.

| | Surface of water in Great Meadows below centre of pump cylinder, in inches. | Drop of water-level during preceding month, in inches. | Inches of rainfall as observed on Mystic Water Shed. |
|---|---|---|---|
| May 1 . . . . . | 65 | — | 2.010 |
| June 1 . . . . . | 70 | 5 | 2.345 |
| July 1 . . . . . | $75\frac{2}{5}$ | $5\frac{2}{5}$ | 2.420 |
| August 1 . . . . . | 84 | $8\frac{5}{8}$ | 2.610 |
| September 1 . . . . . | $89\frac{7}{5}$ | $5\frac{7}{5}$ | 7.885 |
| October 1 . . . . . | $85\frac{1}{2}$ | $-4\frac{3}{5}$ | 3.220 |

### Stand Pipe.

The final settlement for the building of the stand-pipe was made early in the year. During the summer two small leaks developed in its bottom and we found that it needed painting. In October a contract was made with J. P. Wahlstrom & Son of Somerville to clean and paint the stand-pipe for the sum of $175, and at the same time the water was drawn off and the tank cleaned out and the bottom caulked and made tight, so that now the whole structure is in good condition.

### Shop Building and Stable.

It was found advisable not to keep our wagon in the stable near the horses, and a shed was built for its protection attached to the rear of the water works' building on Mill street. A cart and an additional horse has been purchased this year for the use of the department.

### Reservoir and Brook.

The riprap around the reservoir and the brook from the reservoir up to the upper limits of the part controlled by the town have been cleaned and put in good condition. The fences on the westerly side of the reservoir lot have been put in good condition and a portion of them have been rebuilt.

### Leaks in Main Pipe.

Two small leaks which we had been unable to locate were found this fall when the water flowing from them finally showed itself at the surface of the ground. One of these was in Appleton street and one on Park avenue. They were caused by insufficient caulking of the joints and were easily repaired. A number of leaks have also developed in the old cement-lined pipes.

### Brown's Brook Culvert.

Complaint was made early in the spring that the water of Brown's Brook in East Lexington was being dammed back by

the culvert built by the town of Arlington and was flooding the low land just above the railroad. Upon investigation we found that a large trough had floated into the culvert under the railroad, and immediately upon its removal the water began to subside. The Railroad Company was notified, and they at once placed a grating in front of their culvert to prevent the recurrence of the trouble. At the same time the complainants stated they thought that the brook below the outlet of the town's culvert was so obstructed that it prevented the free flow of water from the culvert. In order to remove any possible chance for complaint, we had the brook through the upper Slocum Mill Pond cleaned, straightened and deepened, and the culvert is now in good condition throughout.

## Applications for Pipe Extensions.

At the last annual meeting the town passed a vote prescribing the regulations governing the future extensions of the pipe system. The Board has had the necessary blanks prepared and finds that the prescribed regulations work in a very satisfactory manner. At the same meeting an appropriation of $1000 was made to extend the main pipe in Mystic street to the house of Mr. Cronin, provided certain guarantees were given by him. At Mr. Cronin's request, the necessary papers were prepared and preparations for laying the pipe were made, but before anything further was done Mr. Cronin notified the Board that he had made other arrangements and did not care to have the pipe laid, so that the appropriation remains in the treasury. At various times during the past two years the residents on Lowell street, between Massachusetts avenue and the Railroad bridge, have requested the Board to extend the High service pipes to supply their houses, but the Board has felt that it was not warranted in doing it without further authority from the town, as the increase in water rates will be very

small. At present the houses are supplied from the Low service, but they are so near the level of the reservoir that a large part of the time they cannot get any water, and at times air is sucked into the main through their service pipes, owing to the great draft of water in the lower sections of the town; this is dangerous since if a large amount of air is allowed to enter the main, it will seriously interfere with the flow of water through it. For this reason the Board thinks that it would be advisable to lay the pipe asked for, although the increased water rates will not pay the percentage on the cost required in ordinary cases. The cost of the work will be about $1000.

## Meters.

During the year the Board has placed meters on a few services by arrangement with the consumers; they are nearly all on services supplying High service water to greenhouses; a rate of 30 cents per 100 cubic feet (which is equivalent to 40 cents per 1000 gallons) has been established; in addition a rental of $3 per year is charged. It is too early as yet to express a definite opinion in regard to them, but they appear to be satisfactory. Meters have also been placed on a few services which were put in for temporary use.

Two meters have also been placed on the services supplying two dwelling houses where they can be carefully watched for the purpose of learning as nearly as may be how our water rates would be affected if meters should be placed on all our services. We think that this will have to be done before many years, and we are getting all the information we can in regard to it.

## Stock.

We have on hand, in addition to the small quantities of pipe and fittings of all sizes and the necessary tools and

fixtures required to make repairs and carry on the works, about 5000 feet of 6-inch iron pipe with the necessary fittings and about 1900 feet of service pipe, and we have enough coal at the pumping station to last till about May 1.

## Uses and Income.

From the books of the Registrar and Superintendent the following tables have been prepared, showing the number of fixtures supplied by the water works and the income which will be received the coming year at the present rates.

| | |
|---|---|
| Houses paying the maximum charge of $25, | 189 |

In addition to the above there are the following fixtures on which charges are made:

| | |
|---|---|
| Faucets, | 1856 |
| Bath-tubs, | 328 |
| Water-closets, | 491 |
| Hand-hose, | 498 |
| In stables, horses, | 346 |
| cows, | 97 |
| Can-rooms and wash-houses, | 18 |
| Greenhouses, | 25 |
| Hotbed sash at 10 cents each, | 14,864 |
| School houses, | 6 |
| Water motors, | 5 |
| Stand-pipes for street watering, | 18 |
| Fire hydrants, | 274 |
| Drinking fountains, | 5 |

The income which it is expected will be received the coming year from the above-described fixtures, at the present rates, is as follows:

| | |
|---|---|
| Houses, school houses and motors, | $18,945 00 |
| Stables, | 1,192 00 |
| Can-rooms, wash-houses and greenhouses, | 722 70 |
| Sash or hotbeds, | 1,486 40 |
| Total, | $22,346 10 |

This amount will probably be increased by the income from the new services which will be added during the year.

The details of the work of the past year are given in the reports of the Superintendent, Treasurer and Registrar, which are annexed.

Respectfully submitted.

FRANK W. HODGDON,
GEORGE W. LANE,
PETER SCHWAMB,
*Water Commissioners.*

The color of water is expressed by numbers which increase with the amount of color. Boston water, as drawn from a tap at the Institute of Technology, had an average color in 1895 of 0.72. Other water supplies in the State had an average color of from 0 to 1.30.

All waters containing suspended matter, excepting ground waters which contain a large quantity of iron, are filtered through filter paper before determining the color and residue on evaporation. Occasionally the determinations are also made on the unfiltered water, the results in such cases being indicated by an asterisk.

# REPORT

OF THE

# SUPERINTENDENT OF THE WATER WORKS

---

*To the Arlington Water Commissioners:*

GENTLEMEN — I herewith respectfully submit my report for the year ending Dec. 31, 1896.

## CLEANING OUT PONDS WEST OF RESERVOIR.

On April 30, in compliance with your instructions, we commenced to pump and dig out the two little ponds that lie westerly of the reservoir, and to test their capacity as a filter basin, with the intention of using the water in conjunction with the present low service system which we find inadequate at the time that it is needed most.

An engine, boiler, and 8-inch centrifugal pump were used during the time required to clean and dig out the ponds, which showed a large and increasing supply of water from day to day flowing apparently from the high lands above, there being but a small quantity from the side next the reservoir; the water is cool and clear and if added to the present gravity system would greatly aid in supplying the inhabitants of the town for some time to come.

Test wells were also dug on the reservoir bank in six different places and in every instance we found a copious flow of water; so much so, that in several wells the 2½ inch diaphragm pump could not exhaust it when about eight feet deep. Total cost $684.37.

## EXTENSION OF MAINS.

There has been 6377 feet of pipe laid during the year, 5346 feet of 6-inch pipe and 1031 feet of 8-inch pipe, gates established and hydrants set at the regular distances.

Cost of material and labor as follows:

**Harvard Street.**

| | | |
|---|---|---|
| labor, including rock excavation, | $326 75 | |
| 1 6-inch gate, | 10 80 | |
| 1 4-inch hydrant, | 25 00 | |
| 312 feet 6-inch pipe, | 99 84 | |
| lead, | 10 08 | |
| specials, | 3 50 | |
| | | $475 97 |

**Oakland Avenue and Elmore Street.**

| | | |
|---|---|---|
| labor, | $425 72 | |
| rock excavation, | 374 51 | |
| 2 6-inch gates, | 21 60 | |
| 2 5-inch hydrants, | 56 00 | |
| 1163 feet 6-inch pipe, | 372 16 | |
| lead, | 35 42 | |
| specials, | 14 75 | |
| | | $1,300 16 |

**Grove Street.**

| | | |
|---|---|---|
| labor, | $112 62 | |
| 278 feet 6-inch pipe, | 88 96 | |
| lead, | 8 12 | |
| special, | 1 75 | |
| | | $211 45 |

**Irving Street.**

| | | |
|---|---|---|
| labor, | $58 94 | |
| 1 6-inch gate, | 10 80 | |
| 262 feet 6-inch pipe, | 83 84 | |
| lead, | 9 40 | |
| | | $162 98 |

**Bartlett Avenue.**

| | | |
|---|---|---|
| labor, | $167 00 | |
| 1 5-inch hydrant, | 28 00 | |
| 2 6-inch gates, | 21 60 | |
| 516 feet 6-inch pipe, | 165 12 | |
| lead, | 16 57 | |
| specials, | 7 00 | |
| | ——— | $405 29 |

**Park Street.**

| | | |
|---|---|---|
| labor, | $47 81 | |
| 1 8-inch gate, | 16 50 | |
| 1 4-inch hydrant, | 25 00 | |
| 272 feet 8-inch pipe, | 133 28 | |
| 6 feet 6-inch pipe, | 1 92 | |
| lead, | 12 60 | |
| specials, | 12 50 | |
| | ——— | $249 61 |

**Coral Street.**

| | | |
|---|---|---|
| labor, | $43 75 | |
| 1 5-inch hydrant, | 28 00 | |
| 293 feet 6-inch pipe, | 93 76 | |
| lead, | 9 80 | |
| special, | 3 50 | |
| | ——— | $178 81 |

**Beacon Street.**

| | | $79 55 |

Total amount expended on main pipe, $5,721 54

**Service Pipes.**

107 services have been put in during the year, seventy-two connected with the high, and thirty-five with the low service systems, at an average of $11.40 each, the total cost being $1219.80.

**Hydrants and Gates.**

One Chapman valve hydrant has been set on Winter street near Broadway, and one on Warren street to replace an old Boston Machine Co. hydrant that was broken. A Boston Machine Co. hydrant on Dudley street has been taken up and replaced by one of the same pattern which had been repaired and put in good working order. The hydrants were all painted early in the year, and a number of the gates were packed and all are now in good condition.

**Leaks in Main Pipes.**

We have had the usual number of leaks, the most serious, because the worst to get at, occurred on May 18th, on Brattle street, where the pipe passes under the brook; the water being high at the time we had to plug the pipe in each side of the brook and wait for a more favorable opportunity to repair it. On Sept. 28th we dug up the old cement pipe and replaced it with a six-inch cast-iron pipe laid below the bed of the brook. I believe it is now secure from accident for some time to come.

**Reservoir and Brook.**

The usual attention has been given to the reservoir and brook during the season. Weeds have been pulled up, and brush cut down and all floating matter collected and burned.

**Stand-Pipe.**

The inside of the stand-pipe has been cleaned out, the bottom recaulked, and all leaks stopped, the outside painted with two coats of paint and it is now in first-class condition.

**Repairs on Services.**

Fifty Service Pipes have been repaired during the year, three have been lowered on account of changes in street grade. A few have been partly relaid with new pipe, but the greater number simply required retapping and cleaning out to put them in good condition.

**Meters.**

Seven meters are now in use; of these two have been put in as an experiment, one on the high and one on the low service system, to determine the amount of water used in an average family. The result has been very satisfactory so far. I am convinced it is the only method that can be adopted to save the large amount of water that is wasted through imperfect plumbing and careless takers.

**Pumping Station.**

The Boiler and Pumps are in good condition, and the water in the wells seems to be inexhaustible. You are aware that only twenty wells were used all last year, the five wells next the meadows having been shut off in 1895, and there seems to be no diminution in the quantity of water.

The Pumping Station and grounds around it are kept neat and clean—thanks to Mr. Smith, the engineer.

**Connecting High Service with Low, at Lowell St.**

Owing to the scarcity of water in the low service system a 2½-inch pipe was, by your directions, laid from Lowell street into the upper filter gallery, but a heavy rainfall made its use unnecessary.

**Recommendations.**

I respectfully renew my recommendations of last year, in regard to the North and East Lexington brooks which are a menace to the health of the inhabitants of the town.

Respectfully submitted.

THOMAS RODEN,
*Superintendent.*

# WATER WORKS.

# TREASURER'S REPORT.

## RECEIPTS.

| | | |
|---|---|---|
| Balance of cash on hand, Dec. 31, 1895, | | $114 21 |
| Amount received during the year 1896, viz.: | | |
| For water rates for 1896, | $22,177 96 | |
| From town for use of street hydrants for 1896, | 4,580 00 | |
| From town for water for drinking fountains, | 200 00 | |
| | | 26,957 96 |
| Amount received of Faneuil Hall National Bank, interest on deposits, | | 34 73 |
| Received of Estate of H. A. Pitts, interest on cost of laying pipe, | | 13 50 |
| Amount received of town, balance interest on temporary loans, | | 34 67 |
| Received of Frank Alderman for pasturing for 1896, | | 125 00 |
| Received of S. E. Kimball for hay, | | 16 00 |
| Received of C. F. Winship for grass, | | 20 00 |
| Received of town, amount loaned, | | 6,500 00 |
| Received of town, amount appropriated for maintenance and extension, | | 5,000 00 |

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1896.

## Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely :

DWELLING HOUSES.

| | |
|---|---|
| Occupied by one family, for the first faucet, | $6 00 |
| For each additional faucet, to be used by the same family, | 2 00 |
| Where a house is occupied by more than one family, one faucet only being used for all, for each family, | 4 00 |
| Where a house is occupied by more than one family, the highest rates will be charged for each family, having the water carried into their part of the house : | |
| For the first bath-tub, | 5 00 |
| For each additional bath-tub, | 3 00 |
| For the first water-closet, | 5 00 |
| For each additional water-closet, | 3 00 |
| For hopper water-closets, | 8 00 |
| Where bath-tubs or water-closets are used by more than one family, for each family, | 4 00 |
| Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than | 25 00 |

BOARDING HOUSES.

| | |
|---|---|
| For the first faucet, | 10 00 |
| Each additional faucet, | 2 00 |
| Water-closet or bath-tub, when used by boarders, | 10 00 |
| Each additional bath-tub or water-closet, | 3 00 |

STORES, OCCUPIED AS OFFICE, SHOP OR SIMILAR PURPOSE.

| | |
|---|---|
| First faucet, | $6 to $20 00 |
| For each additional faucet, | 2 50 |
| For water-closet or urinal, | 6 00 |

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

| | |
|---|---|
| For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, | $6 to $25 00 |

HOTELS.

| | |
|---|---|
| For each bed for boarders and lodgers, | 3 00 |
| For each bath-tub in a hotel, | 10 00 |
| For each water-closet in a hotel, | 10 00 |

PUBLIC BATHS.

| | |
|---|---|
| For one tub in a public bath-house, | 10 00 |
| For each additional bath-tub, | 5 00 |
| For one water-closet in public bath-house, | 10 00 |
| For each additional water-closet, | 3 00 |

STABLES.

| | | |
|---|---|---|
| Private Stables. | For the first horse, | 5 00 |
| " | For each additional horse, | 3 00 |
| " | For one cow, | 2 00 |
| " | For each additional cow, | 1 00 |
| Livery, Club and Boarding Stables. | For each horse, | 3 00 |
| Car and Omnibus Stables. | For each horse, | 2 00 |
| Truck and Cart Stables. | For each horse, | 2 00 |
| *Provided*, that in no case shall any stable be charged less than | | 5 00 |

The rates for stables include water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

| | |
|---|---|
| For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than | $3 00 |

STEAM BOILERS.

| | |
|---|---|
| For each boiler in use not over twelve hours a day, for each horse-power, | 6 00 |

BUILDING PURPOSES.

| | |
|---|---|
| For each cask of lime or cement, | 6 cents |

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than four months a year:

| | |
|---|---|
| For a jet of 1-16 of an inch, | $3 00 |
| " " 1-8 " " | 5 00 |
| " " 1-4 " " | 8 00 |

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners whenever in particular cases in their judgment the interests of the town shall require.

B. DELMONT LOCKE,
*Water Registrar.*

# AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. Delmont Locke, as Treasurer and Collector of the Town of Arlington, also as Treasurer of the Arlington Water Works, for the year 1896, and find the same correct, with vouchers for all payments, and the balances of cash, as stated by him.

Clarence T. Parsons, }
Leander D. Bradley, } *Auditors.*

Arlington, February 2, 1897.

J. HOWELL CROSBY,
EDWIN PRESCOTT.

FOR ONE YEAR.

GEORGE D. MOORE, TIMOTHY O'LEARY,
FRANKLIN WYMAN.

---

Committee Meetings, third Tuesday of each month, at 7.30 P. M.

Permanent Chairman not elected since Mr. Smith's retirement.

# SCHOOL COMMITTEE'S REPORT.

*To the Town of Arlington:*

As required by statute the School Committee present their Annual Report.

**Change in membership of the Committee.**

Much to the regret of the other members of the Board, our Chairman, Mr. Samuel H. Smith, on account of ill health, felt compelled to resign from the Committee in September.

We have thus lost a member specially well fitted for the position, and the town loses the services of a valuable and faithful servant.

Mr. S. Fred Hicks was elected to fill the vacancy on the Board, in a joint convention of the Selectmen and School Committee.

**Crosby School Building.**

Perhaps the most important event of the school year, was the completion of the New Crosby School Building.

By all acquainted with the former lack of school accommodations in this district, together with the crowded condition of the Russell school building, the achievement of this result will be received with satisfaction. Standing near the eastern portals of our beautiful town, on a quiet street, removed from the distractions incident to a greatly travelled thoroughfare, the building impresses the beholder as being a model of beauty and utility and a monument to the zeal and efficiency of the committee having its construction in charge.

As the features of the new building are doubtless familiar to the citizens of the town, no elaborate description need be attempted at this time. As a modern school building, the structure is all that could be desired. Its heating and ventilating apparatus seem efficient and ample, while its sanitary arrangements from their location and construction must preclude any detriment to the best health of our children.

The building contains eight class rooms, two smaller rooms for principal and teachers, and a large hall on the third floor, remaining at present unfinished. The class rooms all have a southwesterly exposure, thereby obtaining ample light and sunshine. Six of these are furnished with all that pertains to the proper equipment of a school room.

In the basement are two large and airy rooms for the boys and girls, where recess time is passed in cold or inclement weather. Out of doors the well graded grounds and walks of rock asphalt and artificial stone form a fitting setting for such an edifice.

Miss Mary F. Scanlan, who has served the term of years as a teacher, in this district, proving herself both broad minded and capable, was made principal of this building.

The building was dedicated on the afternoon of Labor Day, September 7, 1896, with the following

## ORDER OF EXERCISES.

---

1. PIANO SOLO,

   MRS. S. B. WOOD.

2. PRAYER,

   REV. S. C. BUSHNELL.

3. SOLO,

   MRS. G. W. KIMBALL.

4. DELIVERY OF KEYS,

   WARREN W. RAWSON,
   Chairman of Building Committee.

5. ACCEPTANCE OF BUILDING AND TRANSFER TO SCHOOL BOARD,

EDWARD S. FESSENDEN,
Chairman of Board of Selectmen.

6. ACCEPTANCE OF BUILDING FOR SCHOOL BOARD,

SAMUEL H. SMITH,
Chairman of School Board.

7. ADDRESS,

HON. JOHN H. HARDY.

8. SOLO,

MRS. G. W. KIMBALL.

9. PRESENTATION OF FLAG,

W. W. KIMBALL.

10. ACCEPTANCE OF FLAG,

MISS M. F. SCANLAN,
Principal.

11. ACCEPTANCE OF PORTRAIT OF WASHINGTON PRESENTED BY THE REV. P. M. O'CONNOR,

SAMUEL H. SMITH,
Chairman of School Board.

12. SINGING OF AMERICA,

AUDIENCE.

Two pleasing features of the occasion were the presentation to the school of a beautiful flag by Mr. W. W. Kimball, and a fine portrait of Washington tendered by the Rev. P. M. O'Connor. The committee desire at this time, to make due acknowledgment on behalf of the school for these gifts.

At the present time there are 207 pupils attending school in this district. Stimulated, doubtless, by their environment, a feeling of commendable and wholesome pride is noticeable among both teachers and pupils and a determination is apparent to preserve to the best of their ability, the beautiful structure that the town has placed in their keeping.

The Committee believe, by the construction of the Crosby School building, the town has afforded adequate school accommodation to a large and growing section and has also relieved the pressure in the Russell school building, thereby securing

to both these districts ample school facilities for years to come.

**Superintendent.**

In our June meeting, owing to existing circumstances it was deemed inadvisable to elect a Superintendent at that time, but the committee feel convinced that trained superintendence is indispensable if the best results are to be attained in our schools.

**High School.**

Miss Ella J. Holmes resigned in March to accept a position at a larger salary in the City of Somerville. Miss Susie L. Austin was elected to fill the vacancy, beginning her services with opening of the spring term in April.

Miss Greenman declining re-election, Miss Grace H. Perkins was promoted from the ninth grammar grade to fill the vacancy.

The number of pupils and arrangement of classes rendered it necessary to have another teacher in the High School, so Miss Austin was advanced from the ninth grammar grade leaving a vacancy which was filled by the appointment of Miss Caroline H. Weeks.

Through the changes in the Grammar School course, introducing Algebra and Latin in the ninth grade, the High School course of study has been revised, distributing the work more evenly through the four years, thus lightening the burden which seemed to rest too heavily on the junior class, the present juniors being the last third year class to take the old course. Hereafter the requirements of that year will not be so exacting.

**Russell School.**

Miss Stella M. Grimes, we are very sorry to say, has not recovered her health. Her illness being serious, she felt obliged to resign her position in October.

The town loses, through the retirement of Miss Grimes, one of its most faithful and efficient teachers.

Miss Lena H. Abbott who was placed in the school as substitute for Miss Grimes is continuing to fill the position very acceptably.

Miss Lila M. Taylor's resignation to take effect at the end of the June term was received and accepted in our June meeting.

Miss M. Evelyn Potter was transferred to the new Crosby building at the opening of the fall term.

**Crosby School.**

At the opening of the fall term five rooms in the new Crosby School building were occupied. Miss Mary F. Scanlan for many years at the head of the school in this district, taking the position of principal and teaching the third grade.

Two new teachers were required, therefore Miss Potter was transferred from the Russell School to take charge of the fifth and sixth grades, Miss Florence Faxon being appointed to the fourth, Miss Snell taking the second, and Miss West the first grade.

The Committee deem it advisable to continue the present seventh and eighth grade scholars of this district in the Russell School till they enter the ninth grammar grade in the High School building

**Cutter School.**

No changes of teachers have taken place in this district.

**Locke School.**

Miss Emma Sawyer resigned at the close of the June term. Miss Stella C. Allen was appointed to fill the vacancy, but was able to teach only one week, resigning on account of sickness in her family.

Miss Nellie J. Wentworth as temporary supply continued to fill the position up to the Thanksgiving vacation, when

Miss Martha Wentworth received the permanent appointment.

The primary rooms at both the Cutter and Locke schools continue crowded. During the fall term the number of scholars in Miss Glidden's room reached sixty. The rooms in that building being rather small, and the ventilation unsatisfactory the committee deemed it advisable to divide the school.

A room in Union Hall has been hired, and it is proposed at the beginning of the January term to open a school there, consisting of the first grade pupils.

This arrangement will afford temporary relief to the Locke school, but the increasing population in these districts, will render it necessary for the town to provide additional school accommodations in the near future.

**Reading.**

The Pollard System of reading has been continued through the year.

The conditions under which the work has been carried on since the opening of the fall term have been more favorable, for many reasons, than during the former year.

We believe the results justify the action of the committee in deciding to retain the system in our schools. We understand that many of the citizens of the town believe that we are sacrificing number work, writing, and expression in reading for the sake of the Pollard System. We desire to correct this erroneous impression. We are giving these subjects their due consideration. In the grades where the Pollard System is used, the average amount of time given to reading is no more than was formerly devoted to that branch.

Many of the teachers from neighboring towns who have visited our schools during the year have expressed surprise and pleasure upon seeing the results which have been obtained.

We would take this opportunity to earnestly invite all citizens of the town to visit our schools and thus be able to judge for themselves as to the merits of the system.

The following is a minority report on the "Pollard System" prepared by one member of the Board who dissents from the Committee's report on this subject.

## THE POLLARD SYSTEM.

This system for teaching reading was introduced into the first four grades of our schools a year ago last September and has now been in use nearly fourteen months. Since the opening of the fall term in September, we have had an opportunity to judge of the result of nearly a full school year's instruction under this system.

More than usual importance might be placed on these observations for two reasons, first:—because during nearly the whole school year the work was under the direct supervision of its author, Mrs. Pollard, and second:—because much more time was given to it. Each teacher has stated that more time was given by her last year in teaching this system, than she had ever given in any previous year in her experience to teaching the same subject under the previous methods. The experience of our teachers varies from one to twenty-five years.

Visiting the schools frequently in September and October the work was observed and the teachers questioned relative to its effects upon the course of study as a whole, as compared with the work of previous years. Not only were those consulted who had taught the Pollard System, but also the principals of the schools and the fifth grade teachers, who, for the first time, had received pupils after a year's instruction in this system. Much dissatisfaction was expressed in regard to continuing the system, and many suggestions were given for its modification if it were to be

retained. All the teachers were unanimous in their opinion that, if left to follow their own discretion, they would not follow Pollard, pure and simple.

As it was recommended that the best results would be obtained by following the Pollard books closely, this was done with few exceptions. During the spring term, supplementary reading was used to some extent.

The pupil begins with the sounds of letters, and as soon as possible learns rules for pronunciation. There are a great many rules, and almost as many exceptions.

The spellers contain lists of words adapted to these rules, and the readers also contain adapted lessons. It can readily be seen how the child's vocabulary is affected. The words are selected from all sources as long as they contain the proper sounds and illustrate the rules. In a great many cases they represent no idea to the child's mind. These words he is required to learn, and thus is deprived of many suitable to his age and which he can understand and use intelligently in expressing his own ideas. As a prominent educator has said, "It reaches the wrong end by the wrong means, and the greater the apparent success, the greater the mischief."

The language work depending upon the child's vocabulary is thus affected. Not having at command as many intelligent words, he is unable to express his thoughts as freely in sentences, exercises and stories.

As most of the schools had little or no script writing, but the majority had printing, the expression of the language work on slate and paper occupied more time, thus less could be accomplished in a given period. We do not spell as we pronounce nor pronounce as we spell, therefore the spelling is affected by learning rules for pronunciation.

The aim of any method or system of teaching reading, should be to enable the pupil to acquire the art of perusing written or printed matter to obtain the thought expressed.

The result of Pollard has been that the pupil loses the thought in his effort to pronounce each word.

Clear, distinct pronunciation is an important element in good reading and should be sought.

All the teachers have appreciated the phonic drill which is given in Pollard, and would prefer to use it in the future.

A great deal might be said in reference to the readers used in the school room. Instead of readers planned with lessons containing words adapted to rules, we should have other readers designed to bring to the child, the best of heart and mind in the child's language; to guide his thoughts in the proper channels, and lay foundations for forming his character at a time when he is most easily influenced. General information obtained from the reading of books is no slight acquisition.

All the teachers agree, that reading, writing, spelling, language and general information are poorer for having Pollard in our schools last year. The only exceptions being in the case of teachers who, in some respects, did not follow this system as closely as the others, thus proving that the more closely it is followed, the more harmful the results. The Pollard System is a mechanical device for pronouncing words, and while agreeing with the teachers that we should continue a strong phonic drill for pronunciation, I earnestly recommend that it be dropped at once from our schools, and another system adopted by which good reading may be taught without sacrificing to it alone all the other branches of study.

Finally,—without going further into detail, I object to the Pollard System, as laid out, for the following reasons:

1. It exaggerates the importance of pronunciation.
2. It largely neglects all other elements of good reading.
3. It demands too much time on the part of both pupil and teacher.

4. It crowds out or seriously interferes with all other school exercises.

5. It is ill adapted to children of tender years, and therefore misplaced.

6. It recognizes little or no supplementary reading, and thus denies access to that fund of beautiful and uplifting literature, so well adapted to child nature.

7. It gives little or no attention to the meaning of words or to the thought expressed.

8. It wastes valuable time and labor on non-essentials.

9. It adds little to the child's vocabulary, and is exceedingly barren in the use of words already known.

10. It falsely teaches children that reading is pronouncing words.

11. It violates nature's method; for children, at first, should learn to read as they learn to speak, i. e., grasp the word as a whole.

12. It restrains the freedom and cramps the individuality of the teacher.

13. The consensus of opinion among educated bodies is to the effect that it is of little or no educational value.

14. It reduces to a minimum oral and written language work.

15. The judgment of teachers when given without reservation and when they are protected in an honest expression of opinion is generally against the system.

16. It burdens the child mind with complicated and somewhat contradictory rules and attempted application at an unreasonable age.

17. The good effects whatever they may be are so largely overbalanced by the ill effects, that if the former cannot be carried on without the latter, the whole should be dropped.

18. Monopolizing both time and labor, it prevents

further enrichment of school course, by subjects demanded by the times,—such as Nature study, etc.

19. Finally, because better reading can be secured by other methods, without such an extravagant waste of time and energy and without detracting from other school work.

Respectfully submitted.

MRS. JOHN I. PEATFIELD.

**Music and Drawing.**

The Music in our schools continues under the supervision of Miss Blanche E. Heard and the results are excellent. Miss Emma K. Parker, Supervisor of Drawing, tendered her resignation, to take effect Jan. 1, 1897. A successor to Miss Parker will probably be appointed soon.

The Sub-Committee on this subject have under consideration plans which we hope will make Drawing of much more value to our schools than it has been.

**Manual Training and Sewing.**

In view of the success achieved and the growing interest manifested in these departments, the advantages have been extended to the pupils of the seventh grade.

In order to accommodate these new scholars in manual training it has been necessary to put in fifty new drawers or lockers, and purchase tools for two additional benches.

**Kindergarten.**

The Committee are of the opinion that a Public Kindergarten would be of great benefit to the children in the town.

In both the Russell and Crosby school houses there is room for such a school, but the crowded conditions in the Cutter and Locke districts render it impossible to accommodate those sections of the town, therefore, we have no recommendation to offer in this matter at present.

**Decoration of School Rooms.**

We are pleased to note that a movement emanating from the Woman's Club, with a view toward the beautifying of our school rooms, has taken form and gained considerable progress.

**Buildings and Repairs.**

Aside from the customary minor repairs to the school houses and grounds, a new boiler has been placed in Russell School, the old boiler has been reset on a lower foundation, and much of the piping has been changed, making it possible to thoroughly heat the whole building. Considerable work has been done in pointing up the outside walls.

The walks and that portion of the grounds which is concreted have received a top-dressing of rock asphalt. On the Medford street side the grounds have been re-graded and seeded down. A line of curbstone has been set on the outer edge of the Medford street sidewalk.

**Cutter School.**

The grounds here were given a coat of gravel during the summer vacation. No other repairs have been necessary except recoating the blackboards.

**Locke School.**

A new furnace has been put in to replace the old one which was worn out.

**Crosby School.**

Here, as soon as the newly graded grounds froze and thawed a little it was found necessary to gravel a space for a small playground for the children.

No provision having been otherwise made for fencing the grounds here, it has been paid for from our appropriation.

Respectfully submitted.

HERBERT H. CEILEY,
JOSEPH C. HOLMES,
J. HOWELL CROSBY,
*For the Committee.*

# STATISTICS.

The table at the end of this report indicates 1341 pupils enrolled during the year, 1176 average membership, 1092 average attendance, and 94 per cent. attendance. In 1895 the record was 1259 enrolled, 1035 average membership, 996 average attendance, and 94 per cent. attendance. The number of different pupils attending school in town during the year 1896 appears to be 82 more than in 1895, and 138 more than in 1894. The difference shows considerable increase in school population and further growth on the part of the town.

At the end of the year, December 23, 1896, there were 1128 pupils divided as follows:

High School, 109; Grade IX, 62,— making 171 in the High School Building. A year ago it was 181.

Russell School, 420. A year ago it was 433. The Crosby School, when the new building was completed, took about 80 pupils from the Russell district:—notwithstanding this, the increase at the Russell has nearly made up the loss.

Crosby School, 203. A year ago 112.

Cutter School, 169. A year ago 162.

Locke School, 185. A year ago 147.

The Crosby and the Locke appear to have quite an increase while the Cutter a little more than holds its own.

The per cent. of attendance for the year is the same as for the year before, i. e., 94 per cent.

## SCHOOL STATISTICS, 1896.

| SCHOOLS. | Number Enrolled | Number Dec. 23, 1896 | Average Number for the year | Average Daily Attendance | Per cent. of Attendance |

*(a)* Winter and Spring terms only. *(b)* Fall term only. *(c)* Including part of Grade II. for Winter and Spring terms.

# REPORT

OF THE

# TRUSTEES OF THE ROBBINS LIBRARY.

---

*To the Town of Arlington:*

The Trustees of the Robbins Library submit their annual report:

There has been a gratifying increase in the use of the Library during the past year: the number of books and magazines taken out being 42,348. In 1895 it was 38,579. This number, it should be remembered, does not include the books and periodicals examined in the Reading Room and not taken from the Library.

Since April 1, 1896, the Reading Room has been open on Sunday afternoons from 2.30 to 5.30 o'clock, and on the forenoons of week days from 10 to 12 o'clock. The number of Sunday readers, especially during the colder months, has been sufficient to show the existence of a real demand for opening the room. Furthermore, many visitors from other towns have found Sunday a convenient day on which to see the Library. The attendance in the forenoon has naturally been small, as few people have leisure to visit the Library at that time of the day. Those who are able so to do, apparently, much appreciate the opportunity.

The Library, since April 1, has been opened in the afternoon for the delivery of books at one o'clock instead of at

three, as formerly. This change has proved convenient to those who prefer to visit the Library during the earlier part of the afternoon, particularly to scholars in the High and Russell Schools, and relieves to some extent the demand and consequent delays at later hours. There appeared to be a considerable desire for the foregoing changes as was manifested by discussion in the Improvement Society and by vote of the Woman's Club, and we believe the results have fully justified them.

In a Library like ours, in the absence of means for the purchase of a large number of volumes, it is especially desirable that the books which we have should be made as useful as possible. To this end, the plan has been adopted of reserving books for special purposes, and placing them in the Reading Room where they may be freely consulted, but may not be taken away. As the reservation, ordinarily, continues for not more than two or three weeks, no particular inconvenience is caused by such temporary withdrawals of books from circulation. When new books are put into the Library they are kept in the Reading Room for a short time before they are placed on the shelves, in order that the public may examine them, and so keep well informed as to additions. Another application of the plan is in connection with two debating clubs. Notice of the proposed question for debate is sent to the Library. The books that can be found relating to the topic are gathered together and the members of the club may, and do, consult them. Books on subjects of more general interest are reserved for several weeks and placed on a table in the Reading Room. Some of these subjects have been "Kindergarten," "Thanksgiving Day," "The Money Question," "Columbus," "Washington." It has been found that many people are much interested in looking over the collection, and often note down titles and numbers so as to take out the books when they again go into circulation.

Apart from this more general work much assistance is given to individuals who are investigating special topics. This function of the Library is peculiarly interesting and important, and its extension and improvement are always to be sought.

In the fall it was decided to limit the time of retaining new novels to one week without the right to renew. Books of this class are in especial demand for the first few months after their issue, and by restricting the time more people have an opportunity to read them.

At the beginning of the year the plan was introduced of issuing to any person already holding a card a second card permitting him to take out books not of fiction. This two-card system enables the holder to take out two books at a time provided that both books are not novels. Five hundred and twenty-one of these cards have been issued during the year. At first some cards were applied for by persons who made little use of them, but as the system has become better understood there is a steady growth in the number of applications from those who properly appreciate the privilege. It will readily be seen that to any one using the Library for purposes of study the right to take out two volumes at a time is often valuable. Others find it convenient to use the ordinary card to take out works of fiction and reserve the extra card for more serious reading. The privilege is evidently becoming more and more appreciated, and we hope that the use of the second cards may continue to increase.

An intelligent use of this system has been made by one of the teachers in the Russell School, who has encouraged her pupils to obtain extra cards and to use them in taking out books of history, biography, etc., connected with their studies. As this does not interfere with the children's use of their ordinary cards it is regarded by them as a privilege and not as a burden. It is to be hoped that other teachers

will make more systematic use of this means of bringing the resources of the Library into connection with the work of the schools.

We are indebted to Mr. Winfield Robbins for the gift of five large pictures to adorn the Reading Room. These are copied from paintings by distinguished French artists. The subjects are "At the Fountain," "Alexander and Porus," "Columbus Received by the Sovereigns of Spain on His Return from the Discovery of America," "Washington at the Siege of Yorktown," "Napoleon after the Battle of Eylau." At Christmas two other very interesting gifts were received from Mr. Robbins,—a miniature of Franklin painted during his residence in France, by Mme. LeBrun, and a series of pictures on vellum, dating from the fifteenth century, representing the parable of the Prodigal Son.

Books have been given during the year by Mr. Winfield Robbins, Mr. R. C. Winthrop, Hon. S. W. McCall, Women's Relief Corps No. 43 and others. Messrs. C. S. Parker and Son have continued their gifts of the *Arlington Advocate*, so that the Library now has a complete file of the paper from its establishment. With the recently issued "Souvenir" to serve as an index, this record of the town's history during the last twenty-five years has become much more accessible than heretofore

The walls of the building have been carefully examined and the joints between the stones have been pointed in many places. More work of this nature should be done during the coming year to put the outside into thoroughly good condition. The concrete walk between the first and second flights of steps in front of the Library has been relaid. The lighting of the Reading Room and Catalogue Room has been much improved by the introduction of several Welsbach burners. A bulletin frame has been placed in the vestibule. Other small repairs have been made as needed.

Miss Angie Adams, one of the assistants, resigned in

September and was succeeded by Miss Helen H. Learned. Otherwise, the Library staff remains as before and continues to do excellent work.

The Reading Room and the system of delivery of books at the Heights have been continued with good results as shown by an increase in attendance and number of books delivered.

In the appended Statement of the Librarian will be found the statistics for 1896, a list of periodicals now taken, and a statement of the hours during which the Library and Reading Room are open.

Respectfully submitted.

# REPORT

OF THE

# ARLINGTON PARK COMMISSION.

---

At a town meeting held December 19, 1895, it was

VOTED, That it is the sense of this meeting that the Park Commission take, by purchase or otherwise, lands in the vicinity of the "Devil's Den," so called, in amount not exceeding thirty acres, and that they take, by purchase or otherwise, the swamp lands, situated northerly of Mount Pleasant Cemetery, in amount not exceeding ten acres, exclusive of any land now owned by the town. All of the above land to be acquired and held for Park purposes.

It was also

VOTED, That the town appropriate the sum of $15,000, the same to be expended under the direction of the Park Commission for acquiring land by purchase or otherwise for Park purposes, said sum or any other sum that may hereafter be appropriated by the town for Park purposes, to be raised by the issue of bonds, notes or scrip of the town to be called the Arlington Park Loan, as may hereafter be authorized by the Legislature. Said bonds, notes or scrip to be issued from time to time at the discretion of the said Park Commission, and to be payable in not exceeding fifty years from date of issue, and to bear interest payable semi-annually at a rate not exceeding four per cent. per annum,

and that the Selectmen be, and hereby are authorized to petition the next Legislature for such authority and for all other legislation necessary to enable the town to appropriate additional moneys for the purpose of acquiring lands for one or more Public Parks.

Under the vote authorizing the Selectmen to petition the Legislature for authority to issue bonds, a petition was made to the Legislature and this authority was granted on April 13, 1896, by Chapter 267, Acts of 1896.

On November 18, 1896, the Commission made a formal taking of about thirty acres of land within the section bounded by Spring street, Highland avenue, Gray street and the extension thereof, and Pleasant street. This taking includes eight parcels of land, owned, or supposed to be owned, by the following:

Parcel No. 1, by Heirs of George Hill, Arlington,
" " 2, " Sylvester C. Frost, Belmont,
" " 3, " Thomas C. Morton, Belmont,
" " 4, " Everett A. Frost, Belmont,
" " 5, " Artemus Frost, Belmont,
" " 6, " Harrison Swan and Heirs of Henry Swan,
" " 7, " Henry J. Locke, Arlington,
" " 8, " Edward F. Morton, Arlington.

Parcels are shown on plan duly recorded with Middlesex South Dist. Deeds.

As the section of the town in which this Park is located was sometimes referred to in ancient deeds as Menotomy Rocks, the Commission suggest as an appropriate name for it, Menotomy Rocks Park.

The Commission is now considering the taking of the authorized amount of land within the specified section, bounded by Medford street, Mount Pleasant Cemetery and other lands of the town, Lower Mystic Pond and land of Niles estate, Mystic and Chestnut streets.

The expenditures of the Commission have been for

| | |
|---|---|
| Engineering, | $216 51 |
| Stone Bounds, | 125 00 |
| | $341 51 |

Respectfully submitted.

J. Q. A. Brackett,
W. W. Kimball,
S. F. Hicks,
*Park Commissioners.*

# REPORT

OF THE

# SELECTMEN.

---

The Selectmen submit the following report for the year ending December 31, 1897: —

The streets that required the largest expenditure of money have been placed in good condition, with the exception of Broadway. The County Commissioners ordered the rebuilding of Vine street, which has been done at an expense exceeding the appropriation, and the extra cost has been charged to the highway account, as much of the material removed from this street was available for use on other streets of the town. Gutters have been paved in many places, and much work of this nature will be required each year.

Edgestones have been set in connection with the paved gutters and in other places where requested.

An underground drain has been laid in Park avenue, between Massachusetts avenue and Appleton street, and connecting with side streets. This drain cares for most of the surface water in that locality, which was very troublesome and caused considerable expense to the town each year by reason of wash-outs. Another drain has been laid in Pleasant street to carry the water from Kensington Park.

Similar work is needed in other streets. The cost of repairs made necessary by wash-outs caused by the frequent and heavy showers has been large.

The Board of Survey Act having been accepted by the Town, we hope for a more uniform laying out and building of streets in the future.

The Arlington and Winchester Street Railway Company has been granted a location for its tracks in Mystic street, from Massachusetts avenue to the Winchester line. Locations have also been granted to the West End Street Railway Company for a double track on Massachusetts avenue, from Park avenue to a point beyond the car house; also to the Lexington Street Railway Company on Massachusetts avenue, from near the car house of the West End Street Railway Company to the Lexington line.

## SHADE TREES.

The elm trees on Pleasant street and Massachusetts avenue, between Forest and Pleasant streets, have been carefully trimmed, and will not need much care for a number of years.

We recommend an appropriation each year until all the trees have been cared for. Maple trees have been placed, as far as possible, wherever the young trees have died or been broken, and also in several new locations.

## STREET SIGNS.

During the year street signs have been placed on the following streets: — Chestnut, Warren, Hamlet, Parallel, Franklin, Mill, Acton, Vine, Appleton, Devereaux, Chapman, and Henderson, and old signs have been replaced where needed; also at the entrance to six private ways.

## STREET NUMBERING.

As the larger portion of the town has, during the past year, been included in the free postal delivery system, it

was necessary that all houses and lots covered by such system be numbered. This work has been carefully done, and the remainder of the town will soon be numbered, as the free delivery will, after January 1, 1898, include the whole town. Any person can obtain the correct number of a house or lot by applying to the Town Clerk.

## GRADE CROSSINGS.

This Board has attended several meetings of the Commission appointed to investigate the matter of grade crossings in this town, and it is expected that during the coming year work will be commenced on the crossings at Park avenue, Bow street, Forest street, Brattle street, and Grove street.

## STREET LIGHTING.

At present there are on the streets of the town 81½ Arc and 129 Incandescent Lights. During the year the following have been added: —

| | | |
|---|---|---|
| 1 | Incandescent | on Jason Street, |
| 2 | " | " Bartlett Avenue, |
| 1 | " | " Robbins Road, |
| 1 | " | " Acton Street. |

The appropriation would not permit the placing of additional lights. With but few exceptions the service has been satisfactory.

As the contract with the Somerville Electric Light Company expires December 31, 1898, it will be necessary to take some action in the matter during the coming year.

## ALMSHOUSE.

Mr. and Mrs. B. F. Durgin have had charge of this Institution the past year, and it is in excellent condition. Some

necessary repairs have been made, and we would recommend the building of another bath-room, as there is only one in the building.

One inmate has been removed by the Little Sisters of the Poor of Somerville, thereby relieving the town of further expense. One inmate has been placed in the Danvers Lunatic Hospital. At present there are six inmates, two females and four males. Two of the latter are very feeble and require a great deal of care.

## TELEPHONES.

The telephone rates have been reduced the past year. A box has been placed at Grove street and connected with the Police Station, making three boxes now directly connected with this department. Hose houses 2 and 3 have been connected by an independent line.

## POLICE AND FIRE DEPARTMENTS.

You are referred to the reports of the Chiefs of these departments.

## TOWN HOUSE.

By order of the Board of Health, this building has been connected with the sewer, and sanitaries have been placed in the cells. This was an unlooked-for expense. Other necessary repairs have been made. As the Post Office has been removed and the room so occupied is being now used for town purposes, the rents from the building have decreased. A large safe has been purchased, as the ones in use were over crowded.

We would recommend that some action be taken toward securing a site for a new Town Building.

## CONTRACTS FOR COAL.

The contract for coal was awarded to the Peirce & Winn Company at the following prices: —

| | |
|---|---|
| Furnace, Egg and Stove, | at $4.92 per ton. |
| Honey Brook Lehigh, | at 5.42 " |
| George's Creek Cumberland, | at 3.47 " |

## ENGINE AND BOILER AT STONE CRUSHER.

Under the direction of Mr. Peter Schwamb a new engine and boiler have been purchased for the stone crusher and are giving perfect satisfaction.

## MOTOR FOR FIRE ALARM.

An electric motor has been placed in the Town House, to be used in connection with the Fire Alarm whistle. This work also has been done under the supervision of Mr. Schwamb, and we tender him our sincere thanks for the able and faithful services rendered. The cost has exceeded the appropriation, but we think the additional expense has been warranted by the results obtained. The water for the old motor was supplied from the high service, and the cost of pumping will now be saved. This old motor remains for the present in case of an emergency.

# REPORT

OF THE

# SUPERINTENDENT OF STREETS.

---

*To the Honorable Board of Selectmen:*

GENTLEMEN — I submit to you my annual report, showing upon which streets the greater part of the Highway Appropriations has been expended, and calling your attention to work most needed the coming season.

## Acton Street.

This was the first work done at the beginning of the season and consisted in blasting the ledge near Albert Blanchard's. The street has been filled to grade in many places, patched with crushed stone, and gravelled where it was needed. The sidewalk on the west side have been graded, and both walks coated over with stone dust.

## Appleton Street.

This street, from Park avenue to Claremont avenue, has been put in good condition by paving the gutters, and a heavy coat of blue gravel put on, giving the street a good crown. In paving the gutters, the abutters, with one exception, were not willing to pay for curbstone, so a curb line was formed by selecting large boulders and placing them along this line. This made a substantial curb, and by

paving to them, it left the boulders to show about eight inches, the same as edgestone.

### Ashland Street.

This street has never been accepted by the Town. It was in a very dangerous condition, so it was thought best to make it safe for travel, as the expense would be slight. It was repaired by plowing and picking the edges of the street and scraping to the center with the road machine.

This street should be accepted by the Town requiring the abutters to furnish edgestone, the Town to pave the gutters. The grade is very steep, and in no way can be kept a good street but by making substantial gutters.

### Broadway.

This street has required constant patching to keep it in a safe condition, and it now looks as though it would receive attention the coming season.

As the plan now talked of is to drain a considerable portion by laying drain pipe, it would be well to secure the pipe as soon as possible, as there is likely to be an advance in price.

### Bartlett Avenue.

Eight hundred feet of edgestone have been set on this street, 200 yards of gutter paved, and the sidewalks on both sides have been coated over with stone dust for quite a length.

### Claremont Avenue.

The entrance of this street to Wollaston avenue was in a dangerous condition owing to the steep grade, and last winter, during icy times, there came near being several accidents. The road-bed has been lowered about two feet at the Wollaston avenue end and extending back past Mr. W. O.

Partridge's driveway, where the grade will remain about the same. The material from this cut was good gravel and was used on Vine and Appleton streets. From this point to Appleton street should be fixed the coming season. In building this street the loam was not removed, a light coat of gravel being spread over it, making the street almost impassable in the spring of the year, when the frost is coming out. The sidewalk on Mr. Partridge's side of the street has been graded to his driveway and coated over with screened gravel.

### Draper Avenue

has been coated over with crushed stone and screened blue gravel, which has been well rolled with the steam roller.

### Forest Street.

This street has been gravelled for a considerable distance near the Winchester line. The gravel was obtained by widening a portion of the street nearly to the County Commissioners' line.

### Franklin Street.

This street has been graded and coated over with screened blue gravel from Warren street to Parallel street. The sidewalks have been covered with stone-dust. A drain has been laid to connect with the Warren street drain and two catch basins have been built.

### Gray Street.

This street has received considerable attention in repairing gutters after every heavy shower, and consisted in carting the material washed down to Pleasant street back again, and filling the washed places. This street should be fixed by putting in edgestone and paving the gutters.

### Jason Street.

About 1,200 feet of edgestone have been set, and 900 yards of paved gutters laid on this street. The walks on both sides, from Gray street to Geo. I. Doe's on one side and to Wm. P. Nightingale's on the other, have been coated over with stone dust.

Nineteen single loads of fine crushed stone have been put on the avenue end of the street and left for the travel to wear in. I think the experiment has been satisfactory, for it is now a dry, solid piece of street.

### Lake Street.

This street, from Massachusetts avenue to the railroad, has been repaired by picking up the surface with the steam-roller. The street was then coated over with a light coat of crushed stone and well rolled, a coat of screened blue gravel was put over the stone and rolled again. The sidewalk on the northwest side has been coated over with stone dust.

### Lewis Avenue.

This street has been graded its entire length and coated over with screened blue gravel. The sidewalks have been coated over with stone dust for nearly their whole length.

### Massachusetts Avenue.

This avenue has been built over nearly all the way from near Forest street to Mill street on the east side. In making this repair the old road-bed was removed to a depth of nine inches below the grade by first picking and plowing it with the steam roller. This material was screened, the stone being used for the first coat of the new macadam and the screened gravel to cover the crushed stone. After coating over with screenings they were well rolled, then a coat of coarse crushed stone put on this and rolled, a fine coat of crushed stone put on this and rolled again, then this was

gravelled and rolled until it became solid. Other portions of the avenue have been patched. During the coming season the avenue on the west side, from Alewife Brook to the centre of the town, should be coated over with crushed stone.

### Mystic Street.

Owing to the building of the Electric Road on this streets considerable more work was done than was intended early in the season. From Old Mystic street to the Winchester line the grade was changed, making it necessary to build a new road-bed, this was done by thoroughly macadamizing both sides. From Summer street to J. Howell Crosby's was the part proposed to do this year. It has been macadamized on the west side to his place and on the east side as far as John S. Crosby's. The material taken from this street in putting in the Electric Road was teamed at the company's expense to Old Mystic, Prescott, Franklin streets, and Lewis avenue.

### Oak Street.

This street has been gravelled from Old Mystic street to Wm. Welch's.

### Old Mystic Street

from Oak street to Mystic street, near the Winchester line, has been put in a good condition by filling the deep washouts and crowning with the material taken from Mystic street in putting in the Electric Road. This work was done by order of the County Commissioners.

### Park Avenue

from Florence avenue to Oakland avenue has been improved by crowning it with the material taken from Massachusetts avenue in putting in the double track from Lowell street to Park avenue. This was well rolled with the steam

roller and later covered over with screened blue gravel. The sidewalk on the east side, for some distance, has been filled, ready for a coat of stone dust. About 500 feet near Appleton street has been coated over with blue gravel.

### Prescott Street

has been filled to grade and coated over with screened blue gravel. The sidewalk on the west side has been graded and coated with stone dust.

### Vine Street

from Park avenue to Massachusetts avenue has been widened to the line ordered by the County Commissioners and put in a good condition by grading and gravelling. An eighteen-inch drain has been put across near the West End car house with two catch basins. The gutters were paved from the car house to Munroe's road. The sidewalk on the east side has been graded and covered with screened blue gravel.

### Warren Street

has been coated over with fine crushed stone, well rolled, and then a coat of screened blue gravel put on. An edge-stone has been set in front of Miss Josephine Robertson's and the estate of James M. Chase. The sidewalk on the east side has been coated over with stone dust.

### Wollaston Avenue.

The road-bed has needed no repairs. This shows the advantage of paved gutters. Had the gutters not been paved quite an outlay would have been necessary after every heavy shower, as we have had four showers, causing many washouts on other streets. The gutter at the entrance of the street, from Park avenue and along Park avenue to Vine street, has been paved. The grading of the sidewalks has been finished, and the walk on the northeast side has been coated over with stone dust.

### Drainage.

Considerable attention has been paid to surface drainage this year, in cleaning old drains and putting in new ones. The drain from Franklin street, along Warren street, across Medford street and the Cemetery driveway to the brook has been taken up and lowered about four feet in order to drain Franklin street and a portion of Broadway. A drain has been laid on Park avenue, from Appleton street to Massachusetts avenue, consisting of a 15-inch pipe from Appleton street to Wollaston avenue, and an 18-inch pipe from Wollaston avenue to Massachusetts avenue, with suitable connections and catch-basins at Vine street, Wollaston avenue, and Appleton street. A 15-inch drain has been laid on the east side of Pleasant street, from Kensington Park to the drain through G. H. Bartlett's, with branches and catch-basins to catch the surface water from Kensington Park and Glen road.

### Crusher.

There was on hand, December 31, about 3,000 tons of stone suitable for crushing. We are buying and piling stone at this time, intending to have 7,000 tons ready for crushing at the opening of the season. I believe it to be economy to have the stone in the yard ready to crush, as it can be bought ten cents per ton cheaper in winter than in summer. The engine and boiler purchased this season are giving good satisfaction, and are furnishing all the power needed at less expense than the old ones.

### Tools.

The tools are in a fairly good condition. New ones are purchased to replace those worn out, thus keeping them about the same.

### Offal and Ashes.

As last year, the offal and ashes have been under the management of the Highway Department. Through the summer months the offal wagon collected every day, making three collections a week on each route.

### Teams.

There are at present fifteen horses, one horse having died this fall, two more should be purchased early in the spring. There are five double carts, four single carts, jigger, four double and two single watering-carts. The single watering-carts are in a poor condition and are hardly worth repairing. The other carts need some slight repairs, and will be painted this spring.

Respectfully submitted.

S. E. KIMBALL,

*Superintendent of Streets.*

# TREASURER'S REPORT.

## EXPENDITURES.

**Highways and Bridges.**

# REPORTS OF CONSOLIDATED BOARD OF TRUSTEES OF ROBBINS FUND

AND

# SOLDIERS' MONUMENT FUND

AND

# TRUSTEES OF CEMETERIES.

## ROBBINS FUND.

This fund is deposited in the Arlington Five Cents Savings Bank.

| | |
|---|---|
| January, 1897, it amounted to | $5,202 00 |
| " 1898, dividend added | 210 16 |
| | $5,412 16 |
| Amount drawn to be expended on cemeteries, | 105 00 |
| Total, January, 1898, | $5,307 16 |

## SOLDIERS' MONUMENT FUND.

| | |
|---|---|
| The amount of this fund, January, 1897, deposited in Arlington Five Cents Savings Bank was, | $2,568 88 |
| Interest added to January, 1898, | 103 76 |
| | $2,672 64 |
| Less amount drawn out for expenses, | 44 90 |
| Total, January, 1898, | $2,627 74 |

## CEMETERIES.

Early in the year, Mr. J. H. Hartwell resigned his position as superintendent, after having faithfully served the town, in that capacity, for ten years.

Your Trustees have for some time had under consideration the advisability of the town caring for the lots and grounds by direct employment of its own men; electing a working superintendent whose entire time should be given to the oversight of the grounds and the increased duties which each year adds to that position.

Mr. Everett S. Chapman was duly elected superintendent of our cemeteries and with him were employed two men from April to December with such additional help, from time to time, as circumstances required.

The public burial lot, commonly known as "Potter's Field," which for years has been neglected, has been regraded and a system of numbering the interments has been adopted, making a complete record of the same, so far as any data can be obtained.

We have also opened, in a suitable ledger, an account with each lot and owner with diagram of all interments thus far made.

Every season for the past three years trees and shrubs have been set out in both cemeteries. Some have suffered from drought, but for the most part have done fairly well and in a few years will make a very effective addition to these "gardens of the dead." Your Trustees have removed free of expense to the lot owners, several of the iron fences and have discouraged the setting of curbstones around the lots.

The marking of each lot by granite posts, sunk slightly below the level of the turf is not only a great aid to landscape effect but also materially lightens the labor of caring for the lots.

The old hearse house has been repaired and is at present used by the superintendent as an office and general storehouse for tools, carts and materials used in cemetery work. It is ill adapted for office work or as headquarters for receiving orders from our people visiting the cemetery.

The Trustees would recommend that each year the town set apart the unexpended balance of cemetery appropriation as a separate fund, the same to be used hereafter, at the pleasure of the town, for the erection of a suitable office for the use of the superintendent, the preservation of plans, records and books connected with the cemetery.

A suitable site for a stone building or brick and stone, is available on the northerly main path, not far from the entrance. Such a structure would not only be a great convenience to those having business with the superintendent but an ornament to the grounds.

**Perpetual Care of Cemetery Lots.**

| | |
|---|---|
| The amount of this fund, January, 1897, deposited in the Arlington Five Cents Savings Bank was, | $5,925 96 |
| Interest added to January, 1898, | 240 58 |
| Amount received during the year 1897, | 440 00 |
| Total, January, 1898, | $6,606 54 |

## Police Organization.

Headquarters, Town Hall Building.

ALONZO S. HARRIMAN, Chief.
GARRITT BARRY, Sergeant.

### Patrolmen.

Garret J. Cody, John Duffy,
Daniel M. Hooley, Andrew Irwin,
Charles H. Woods, James E. Whitten.

The Chief and one patrolman are on duty in the day time; during the night, one sergeant and five patrolmen are on duty.

## Illegal Liquor Business.

My report on the matter of the liquor traffic of last year is applicable this year. Several seizures have been made the past year, and convictions made in court.

## Recommendations.

I would recommend that a horse and wagon be procured for the use of this department. It could be utilized in many ways for this and other departments. The time is not far distant when all prisoners will have to be taken to court by team, as there is already a question about our right in taking them in the street cars. The cost of a team would not be much and would add efficiency to the department.

## Changes.

As recommended last year, a telephone box has been connected at the corner of Grove street and Massachusetts avenue for police calls, making three boxes in all,—one at the corner of Lake street and Massachusetts avenue, another at the corner of Massachusetts avenue and Park avenue, all connected with this station by private wires. The officers on those routes have stated hours for calling up the station and reporting anything that may have occurred during their hours of duty. During the past year the room formerly occupied by the post office has been remodelled and fitted up as an office and guard-room for the department, and we now have very excellent quarters. A water-closet has been put into each cell and connected with the sewer. This was very much needed. The sanitary condition of the room is now good.

## Remarks.

A police officer should be civil and courteous at all times, and so conduct himself as to insure the moral support of all law-abiding citizens. Many of our citizens have but remote ideas of the duties that a police officer is called upon to

perform. He is expected to guard your lives and property, give assistance and preserve order, attend to the wants of all injured persons and lost children. He must report all street lights not burning, look after the violation of all Town Ordinances or By-Laws. In fact, from no other department of municipal government is so much expected, nor is there any that so much needs the encouragement of all law-abiding citizens.

Our town has been comparatively free from crimes of a serious nature, although this year brings the department to its highest in the number of arrests.

The Sunday travel to Arlington the past year was greater than ever before, making it necessary to put all night officers on duty Sundays. The greatest trouble has been from the large crowd of boys coming from Boston and vicinity raiding the orchards.

One special officer has been on duty every Sunday through the summer months, at Menotomy Park, this service being paid for by the Park Commissioners.

## Conclusion.

In conclusion I wish to thank your honorable board for the courteous consideration received from you officially, also all town officials for their assistance.

Respectfully submitted.

ALONZO S. HARRIMAN,

*Chief of Police.*

# ANNUAL REPORT

OF THE

# CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

---

*To the Honorable Board of Selectmen of the Town of Arlington:*

GENTLEMEN:—I respectfully submit my annual report for the year ending December 31, 1897, offering suggestions and recommendations which I trust are for the benefit of the department.

I again congratulate the town on its immunity from fires. I think our fire loss has been smaller than that of most towns of our size in this vicinity, if not in the Commonwealth.

FIRES.

The department has answered twenty-six alarms,—twenty-five bell alarms, and one still alarm December 3, 1897.

The alarms were as follows:

Jan. 15. 12.50 A. M. Box 47. Small house on Forest street, owned by W. B. Husband. Valuation $200. Furniture valuation $50. Insurance $100. Loss $250.

Jan. 19. 4.45 P. M. Box 36. Building owned by Joseph A. Merrifield, occupied by J. W. Ronco, cause, electric wire. Valuation $2500. Insurance $800. No loss. Stock $300.

Jan. 23. 6.55 P. M. Box 17. Fire in chimney, at C. E. Beard's, 99 Lake street. Owned by Maria D. Newell and Helen Hopkins. Valuation $2000. Insurance $1800. Furniture valuation $1000. Insurance $450. No loss.

Jan. 26. 1.15 P. M. Box 21. Chimney fire in house owned by Arthur Coughlin, 5 Norcross ct. Valuation $200. Insurance $500. No loss.

March 14. 1.40 A. M. Box 39. Lamp exploded in house owned by Mrs. Sarah Irwin, Central street. Valuation $4000. Insurance $2000. Loss $38. Furniture valuation $1000. No insurance, Loss $30.

March 17. 8 P. M. Box 25. House owned by E. F. Deering, occupied by E. M. Kimball. Valuation $3800. Insurance $3000. No loss.

March 19. No school 30 min. after time.

April 2. 10.35 A. M. Box 52. Forest fire.

April 3. 6 P. M. Box 54. Forest fire.

April 3. 7 P. M. Box 47. Barn owned by Warren A. Peirce. Valuation $400. Insurance $300. Contents, valuation $400. Insurance $300. $500 paid.

April 3. 1.05 P. M. Box 54. Grass fire.

April 25. 8.16 P. M. Box 54. Grass fire.

April 27. Fire at W. W. Fay's. Valuation $4000. Insurance $4000. Loss $50. Furniture valuation $2000. Insurance $1500. No loss.

July. 12. 20 Brooks avenue. Box 15. John P. Squire estate. Valuation $200. Insurance $200. Loss $60.

July 15. 9.15 P. M. Box 36. House owned by Mrs. Maria W. Hodgdon. Valuation $1700. Insurance $1500. Loss $100. Furniture valuation $1200. Insurance $1000. Loss $137.

Aug. 14. 10.50 A. M. Box 36. H. O. Pearse, Jason street. Valuation $4000. Insurance $3200. Loss. $25.

Furniture valuation $1000. Insurance $800. No loss.

Sept. 24. 8.50 P. M. Box 36. House owned by S. R. Smith estate. Valuation $3000. Insurance $2500. Furniture valuation $2000.

Oct. 10. 2.15 A. M. Box 54. C. H. Kimball's store. Valuation $800. Insurance $600. Stock valuation $150. Insurance $150. Loss $25.

Nov. 3. 4.50 P. M. Box 25. Arlington Boat Club House. Valuation $9000. Insurance $9000. Loss $25. Furniture valuation $6000. Insurance $500. No loss.

Nov. 13 12.20 P. M. Box 54. H. S. Bacon's house. Valuation $1800. Insurance $1500. Loss $20. Furniture valuation $200. No loss.

Nov. 24. 7.50. A. M. Box 15. House owned by Mr. Ross on Arlington street. Valuation $5000. Insurance $4000. Furniture valuation $1500. Insurance $1000. No loss.

Dec. 18. 5.15 P. M. Box 26. Grass fire on land owned by Town of Arlington, off Medford street.

Dec. 24. 6.30 A. M. Box 54. Chimney fire in house owned and occupied by Thos. F. Lynch, Appleton street Arlington Heights. Valuation $2000. Insurance $1500. Furniture $200. No loss.

Dec. 24. 8.30 P. M. Box 36. Greenhouse owned by Mrs. A. G. Peck, occupied by D. W. Duncan. Value $1500. Insurance $1000. Loss $450. Value $700. No insurance. Loss $600.

Dec. 25. 12.05 A. M. Box 13. False alarm.

## FIRE ALARMS.

This branch of the system has given us some trouble this year, one cause being the erection of the poles on Mystic street, their wires coming in contact with ours. The day electric light wire also has caused some inconvenience.

Our line on Pleasant street has caused some trouble, I having previously stated the cause in my report of 1895.

The fire alarm whistle has been thoroughly repaired and enlarged by placing one larger air tank and an electric motor for pumping air. These repairs and alterations have been under the supervision of Mr. Peter Schwamb, who has entered into this matter in a thorough and practical manner. I now know of no reason why there should be further trouble in this matter.

### MEMBERSHIP.

The membership of the department remains the same as given in last report, with the exception of two more permanent men—one as driver of Hose 1 and one of Hose 2. We now have five permanent men in our employ. These men are in their houses day and night with the exception of the time taken for meals. If they are absent other than this, they are supposed to place a man in their stead.

The old men (those in our employ a year or more) are allowed one week's vacation. Any one conversant in fire matters will see the benefit of permanent men in the houses.

The several pieces of apparatus answering an alarm are on the way to the box as soon as the second round is sounded, either day or night.

### APPARATUS.

The apparatus is the same as that last reported, little or nothing having been expended on it. Four Pony Chemicals have been purchased and been placed, two on Hose 3, and two on the truck. We now have eight Pony Chemicals on the several carriages as follows:

Two on Hose 1. Two on Hose 2. Two on Hose 3.

Two on Truck.

These I think will ensure a great saving from water loss in cases of small fires, as they have proved their value in one or two instances this year.

### BUILDINGS.

The buildings also remain in the same condition as last reported. No heavy expense has been incurred on them. Stall floors have been repaired and some inside painting done, but by our own men, we being fortunate enough in having a carpenter and a painter on the force. Hose IV and building at the lower end of the town still remains the same. In case of fire in that vicinity, under present circumstances, there would be a liability to heavy loss. I will make no suggestion in this matter but leave it to the citizens of that section.

### HORSES.

The department has nine horses, divided, as follows:

2 for the truck. 2 for the Chemical. 2 for Hose 3. 2 for Hose 1. 1 for Hose 2.

It was our misfortune to have one of the horses, purchased in 1896, drop dead in his stall. We found it very hard to mate the remaining horse, so purchased a pair and sold the odd horse, losing only $12 from the original cost of the remaining horse. The new pair have broken in nicely and from all appearances have the making of first-class fire horses.

The old horses which draw the Truck have been in use quite a number of years and I should not be surprised if they should give out at any time.

### HOSE.

We now have 6150 feet of hose in good condition, having purchased 500 feet of new hose out of our appropriation this year.

### HYDRANTS

The Water Commissioners have given us one High-service hydrant on Medford street, which will be of great advantage in case of fire in that vicinity. I would suggest that the

service be extended farther down the street. They also have connected the High service with the Low, which will give us more water on the Low service when needed.

### FIREMEN'S RELIEF ASSOCIATION.

The association is in good financial condition, ninety dollars having been paid for six benefits.

### RECOMMENDATIONS.

I would recommend that the Board of Engineers be invested with the power to appoint the men of the department. The town is now paying a fair pay to the called firemen and should have men that are in town a greater part of the time and that live handy to the fire stations. The most important time to be at a fire is the first few minutes of its existence, and that is the time when we most need the men, not after the fire, to answer the roll-call at the houses. We have men in all companies whom we cannot reach.

I would also suggest that the first officer of each company be appointed by the engineers. In my report of 1895 I spoke of the matter of ten dollars kept back for hat, badge and key. I would recommend that this amount be paid the members, and that no money be retained for hat, badge and key after July 1, 1898. I would recommend that the telephone which now communicates with the two houses be connected with the central office.

### STREET WATERING.

In the early part of the year an arrangement was made with your Board to water the avenue from Forest to Tufts streets, also side streets, such as Medford street, Broadway, Jason street and Bartlett avenue for the sum of $1000. I think this matter should come before the citizens and have them decide this question.

"Do the citizens think it economy for the fire horses to water the streets from April to November?"

If so the department should not be blamed if apparatus does not arrive at a fire in time to prevent loss. If thought advisable to thus water the streets I would suggest a shorter route be given the department.

### APPROPRIATION.

To meet the expenses of the department for the ensuing year I would recommend the sum of $7500 with the earnings. I ask this appropriation for the following reasons: The pay of the permanent men is $2993 at the present rate. This allowing one week's vacation. The pay of the called men and engineers is $3490, making $6483 for men alone.

The horses have consumed 1039 bushels of grain, and 38,706 pounds of hay, at the following cost:

| | | |
|---|---|---|
| For grain, | $314 | 90 |
| " hay, | 352 | 24 |
| " straw, | 60 | 34 |
| " salt, | 1 | 30 |
| Total, | $728 | 78 |

Making cost for each horse per week $1.555.

I think these figures will compare favorably with those of any department in the State, making a total estimated cost of $7211 78.

### CONCLUSION.

In closing I wish to thank your honorable board for the courteous and gentlemanly manner in which you have received all matters pertaining to the Fire Department. To

my Associate Engineers, — my thanks for co-operation in all matters connected with the management of the Department. To the Captains and Members, — accept my thanks for your prompt response to the alarms and for the interest taken to render quick and effective service.

Respectfully submitted.

CHARLES GOTT,

*Chief Engineer.*

# REPORT

OF

# BOARD OF HEALTH.

## Contagious Diseases.

During the past year the town has been singularly free from any epidemic of contagious disease.

Our statistics show that in 1894 there were reported thirteen cases of diphtheria and thirty-seven cases of scarlet fever; in 1895 forty cases of diphtheria and twenty cases of scarlet fever; in 1896 twenty cases of diphtheria and seven cases of scarlet fever; in 1897 eight cases of diphtheria and ten cases of scarlet fever. This seems almost incredible in a town of nearly seven thousand inhabitants and in such close proximity to Boston. During these four years the population of the town has steadily increased, while the number of cases of diphtheria and scarlet fever has steadily decreased.

What is the explanation of this?

With diphtheria it may be due to the use of anti-toxine, which has been used for the past two years in Arlington.

Statistics from the latest reports of the New York Health Department show that it is used with safety, not only to arrest the progress of the disease and shorten its duration, but also to render the attendants and members of the family less liable to infection.

With scarlet fever it may be due to the greater care exercised in cleansing the apartments of the sick person. Disinfection has been, for the past two years, in the care of a person authorized by the Board of Health, who disinfects the rooms and destroys any articles that are infected and cannot be cleansed. Books and toys are especially dangerous and should be destroyed. Disinfection, after any contagious disease should be as thorough as possible, therefore there should be as perfect co-operation between the family and the man who disinfects the rooms as there ought always to be between the family and the attending physician.

Isolation and disinfection are equally important.

Without the most careful attention to the smallest detail of either of these, a single case might cause an epidemic.

Isolation should be so complete that no one should be allowed to enter the sick room except the attendant and the physician.

No pet animals should ever be allowed in a room where there is a case of scarlet fever or diphtheria. Both diseases may be carried by pets directly to other families, or indirectly to them by infecting other animals.

In prolonged cases of scarlet fever and diphtheria, where desquamation (or peeling as it is commonly known), seems to be never-ending, and the germs of diphtheria seem to be ever present, the patience of the family is exhausted and they suggest or even demand that the patient be liberated.

Such cases set at liberty are very likely to infect others and spread the diseases. That these diseases may not gain a foothold in town, causing an epidemic, it is imperative that every case of contagious disease, however slight, should be at once isolated and KEPT isolated until every reasonable probability of danger to others has passed.

Not a spot of desquamation should exist upon the body after scarlet fever, and no diphtheria bacilli should be obtainable from the throat of a diphtheria patient when that patient is allowed out of the sick room, and even then two weeks more should elapse before the patient associates with other people.

From the mildest cases of diphtheria and scarlet fever the most malignant cases may originate.

Very often the mildest cases are the most dangerous, because the patient not being so ill as to be in bed distributes disease to others, and by exposure causes complications often more serious than the primary disease.

If these rigid measures were universally observed, diphtheria and scarlet fever would be less common.

What has been said in reference to careful quarantine in scarlet fever and diphtheria applies also to measles.

Measles is much more contagious than either of the above named diseases, and is more likely to develop complications.

Pneumonia and inflammation of the middle ear are quite common complications during an attack of measles. The first endangers the child's life and the second endangers the hearing. Considering the great contagiousness of measles and its disastrous complications, we have included it among the diseases to be reported and isolated until recovered.

That the number of cases of contagious disease may be kept as small as possible in our town, we ask the hearty co-operation of the physicians and parents in the execution of the regulations of this Board.

## Fowle's Brook.

Last June this Board was called upon to abate a nuisance in Fowle's brook, between the mill and Mystic pond, caused by the death therein of thousands of alewives killed by the

refuse which flowed into the brook from the works of the Arlington Gas Company. Large quantities of dead fish, which had become very offensive, were removed from the brook and its shores and buried. A heavy wire screen was provided and placed at the mouth of the brook to prevent fish from entering therein and to avoid a recurrence of the trouble and expense caused thereby.

## Spy Pond.

Late in the summer several complaints were made to the Board concerning the offensive condition of the shores of Spy pond, between Spring valley and Pond lane, caused by an accumulation of vegetable matter, which appears most abundant in that locality. Two men were employed several weeks in removing and disposing of the objectionable matter, to remedy the conditions complained of as far as practicable.

The construction of a suitable roadway around the shores of Spy pond would greatly improve the sanitary condition thereof, especially in preventing the pollution of its waters by surface or house drainage. As the number of residences in the vicinity of the pond and population of our town increases, it becomes a matter of vital importance to public health to avoid danger from impurities in the pond and unsafe sanitary conditions of its borders.

## Plumbing Inspection.

The Inspector of plumbing reports that 187 applications for permits have been received and placed on file during the year 1897.

Inspections and tests of good plumbing give satisfaction to all concerned; but testing poor plumbing and disclosing its defects does not usually prove so agreeable.

Much of the plumbing in our town is done by plumbers whose business location is elsewhere. The variations in re-

quirements of plumbing rules and regulations in different cities and towns cause some inconvenience and misunderstanding, but care has been taken by our Inspector to give information beforehand to prevent mistakes being made, and to improve the standard of workmanship whenever practicable.

## Sewers.

From a sanitary point of view the importance and value of our Town sewer system cannot be overestimated.

All the plumbing drainage of every building, when practicable, should be connected with the town sewer.

Rules have been adopted by our Board to avoid danger from sanitary defects when the sewer connections with buildings are made

## Financial.

Our expenditures have exceeded the appropriation for 1897 to the amount of $142.52, on account of the expenses incurred, as mentioned in this report, upon Fowle's brook and Spy pond, which together cost $405.54; both were unexpected and unavoidable outlays, details of which, with other expenses of the Board, are in the report of the Town Treasurer.

We herewith append copy of our town mortuary records for 1897.

EDWARD S. FESSENDEN,
EDWIN P. STICKNEY, M.D.,
EDWIN MILLS,
*Board of Health.*

# Report of Water Commissioners.

The Water Commissioners herewith submit their annual report for the year ending Dec. 31, 1897.

During the past year the pipe systems have been extended as required. To anticipate the change in grade on Broadway, a new cast-iron pipe has been laid its entire length. This pipe, when connected with the low service after the grading of Broadway, will replace the cement pipe now in use from Massachusetts avenue to Webster street, and that from River street to the Somerville line.

An Underwriter fire pump has been installed in the pumping station to be used as an emergency pump. Necessary repairs have also been made on the main pumping engine. The high and low service systems have been connected through a reducing valve at the Town Hall Building, and in case of fire the pressure in the low service system can be maintained at 40 lbs. per square inch. The various divisions of the works are in good condition.

The poor quality of the water in both systems is still a source of complaint, and with the continual increase in demand it is difficult to see how this can be much improved except at great expense. The use of water directly from the brook will always place us in immediate danger from the effects of any disease germs that may, in case of sickness on our water-shed, be carried directly into the brook by showers. The proposed construction of a sewerage system for Lexington will still further menace the purity of our water.

The various details will be given below under the different headings.

## Pipe Extensions and Renewals.

In all there have been laid 3453 feet of 10-inch pipe, 1953 feet of 8-inch pipe, and 8377 feet of 6-inch pipe, a total of 13,783 feet; 26 hydrants and 20 gates were set. A portion of the pipe, mentioned below, will eventually replace old cement-lined pipe. About 182 feet of 8-inch pipe were laid from the head of Medford street to supply a new fire hydrant on the high service, which was considered necessary for adequate fire protection in this congested district. There have been put in during this year 103 services, 55 connected with the low and 48 with the high service. There have also been added 30 1½-inch services for use in flushing sewers.

The following tables show the extensions in detail.

To extend the High Service:

| Location. | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Vine St., | 408 | 6 | 0 | 1 |
| Lowell St., | 879 | 6 | 2 | 1 |
| Kensington Park, | 213 | 6 | 0 | 1 |
| Hibbert and Sylvia Sts., | 2013 | 6 | 5 | 3 |
| Tannager St., | 604 | 6 | 1 | 1 |
| Wollaston Ave., | 105 | 8 | 0 | 0 |
| Sutherland and Lorne Roads, | 682 | 6 | 2 | 3 |
| Medford St., | 182 | 8 | 1 | 1 |

In all 287 feet of 8-inch pipe and 4799 feet of 6-inch pipe, 11 hydrants and 11 gates.

To extend the Low Service:

| Location. | Length, ft. | Size, in. | Hydrants | Gates. |
|---|---|---|---|---|
| Cleveland St., | 875 | 6 | 2 | 1 |
| Arlington St., | 1675 | 6 | 3 | 3 |
| Davis Ave., | 400 | 6 | 1 | 1 |
| Palmer St., | 588 | 6 | 1 | 2 |
| Broadway, | 2000 | 10 | 4 | 2 |
| " | 40 | 6 | 0 | 0 |

In all 2000 feet of 10-inch pipe, 3578 feet of 6-inch pipe, 11 hydrants and 9 gates.

To eventually replace cement-lined pipe:

| Location. | Length, ft. | Size, in. | Hydrants. | Gates. |
|---|---|---|---|---|
| Broadway, | 1453 | 10 | 4 | 0 |
| " | 1666 | 8 | 0 | 0 |

This pipe was laid dry in anticipation of a regrading of the street during 1898.

We have now in hand two applications for pipe extension on Brattle park and Cliff street. A considerable extension of our system will probably be required next year.

## Present Pipe System.

Length of main pipe in use January 1, 1898:

LOW SERVICE.

| | Size, in. | Length, ft. | | Hydrants. | Gates |
|---|---|---|---|---|---|
| Cement-lined pipe. | 12 | 10,991 | | | |
| | 8 | 6,121 | | | |
| | 6 | 16,796 | | | |
| | 4 | 24,484 | | | |
| Total, | | | 58,392 | 84 | 56 |
| Iron pipe, | 12 | 150 | | | |
| | 8 | 6,480 | | | |
| | 6 | 8,214 | | | |
| | 4 | 12,207 | | | |
| Total, | | | 27,051 | 61 | 53 |
| Total both kinds, | | | 85,443 | 145 | 109 |

16.183 miles.

HIGH SERVICE.

| | Size, in. | Length, ft. | | Hydrants. | Gates. |
|---|---|---|---|---|---|
| Iron pipe, | 12 | 16,503 | | | |
| | 10 | 17,180 | | | |
| | 8 | 9,500 | | | |
| | 6 | 29,445 | | | |
| | 4 | 494 | | | |
| Total, | | | 73,122 | 151 | 110 |
| | | 13.849 miles. | | | |

Total of both services, 30.03 miles of pipe, 296 hydrants and 219 gates. The pipe laid in Broadway, not being in use, is not included.

In addition to the above there are 3436 feet of smaller pipe, 2-inch to 1¼-inch, which is laid in places where hy drants were not needed and the amount of water desired was small.

The details of the cost of the pipe extensions will be found in the report of the Superintendent. Records and sketches showing the location of the pipes and connections have been made and arranged in convenient form for use and reference.

## Quantity and Quality of Water.

The high-service supply was taken from 20 driven wells as in 1896, until the demand for water during June made it desirable to add more wells to reduce the suction on the pump. On June 1st four wells were added, but as there was so much complaint due to iron in the water, on June 19th they were taken off. On July 9th one well was again added, on July 11th another, and on July 13th another, making 23 in all, which are still in use. Two of the wells near the meadows give so much iron that they are of no value. New wells are now being driven, and it is hoped that these will afford a better and an increased supply which

will enable us to cease using all wells near the edge of the meadows.

Analyses of the high service water from Jan., 1896, to the present time, are given in Table I. From these it is seen that the turbidity of the water is increasing. The material in suspension is so fine that the ordinary filter does not retain it. The amount of iron in the water appears to be increasing, which is in accord with the predictions of the State Board of Health, and there is every reason to expect a still greater amount as pumping increases. Iron is necessarily present in our water, due to the existence of organic matter and oxide of iron in the meadow bottom. The water on its way to the wells passes through this deposit and dissolves the iron in the form of protoxide, which precipitates in the form of rust when the water is exposed to the air. When a ground water contains over .05 parts of iron in 100,000 in solution it will precipitate its iron on standing and on exposure to the atmosphere. Our high service water contains much more iron than this, except in the winter. The "oxygen consumed," Table I., indicates the presence of carbonaceous material in the water. Good ground waters seldom have "oxygen consumed" over .01 part in 100,000; our driven well water averages over .20 parts in 100,000.

The analyses of the low service water, given in Table II., show but little change except a slight increase in turbidity and odor, due to the fact that the filters were becoming clogged, and in some places inoperative. This caused more water to pass through the weak places in the filter-covering, resulting in washing out the filtering material and in poor filtration.

During December the filters were cleaned off and a new coating of sand and gravel was applied. In the spring a top-dressing of finer sand willbe put on and it is hoped to

still further benefit the quality of the water which after the application of the first coating, showed a marked improvement over that of last summer. It is unfortunate that the draft on our filters in the summer is so great and the storage so small that we are liable at any time to have the efficiency of the filters reduced by leakage at weak spots which cannot be detected without lowering the water in the reservoir; also that we are compelled to use water directly from the brook. The supply on the low service was taken from the filters alone 238 days; from filters and brook (which was turned in when the demand was more than the filters could supply) 127 days. It was not necessary during the past wet summer to take any water from the Great Meadows.

The board wishes again to call the attention of citizens to the fact that using water directly from the brook is a menace to the health of the community.

The following table gives dates when water was taken from the various sources:

| Dates. | Filter. | Filter and Brook. |
|---|---|---|
| Jan. 1 to Apr. 24, | 113 days | |
| Apr. 24 to Apr. 27, | | 3 days |
| Apr. 27 to June 26, | 60 days | |
| June 26 to July 29 | | 33 days |
| July 29 to Aug. 15, | 17 days | |
| Aug. 15 to Sept. 1, | | 17 days |
| Sept. 1 to Sept. 8, | 7 days | |
| Sept. 8 to Sept. 24, | | 16 days |
| Sept. 24 to Oct. 1, | 7 days | |
| Oct. 1 to Nov. 1, | | 31 days |
| Nov. 1 to Nov. 18, | 17 days | |
| Nov. 18 to Dec. 15, | | 27 days |
| Dec. 15 to Jan. 1, | 17 days | |
| | 238 | 127 — 365 |

The Board, as usual, issued notices calling attention of consumers to hours when the use of water through hose was allowed, but the wetness of the season made it unnecessary to insist on this restriction.

Table III., taken from the report of the Boston Water Commissioner, shows the rainfall on the Mystic water-shed, adjoining ours, since 1877. In making comparisons the total rainfall is of little value, because much depends on its distribution. Dry weather in May, June and July causes considerable water to be used through garden hose, and results in a lowering of our reservoir.

The last column in the table gives the rainfall during May to August inclusive, and from this it appears that last year was a very wet year, there being only one, 1889, wetter. The distribution of the rainfall was also very good, and, as a matter of fact, but little water was needed for garden-hose. The contrast between 1896 and 1897, during the summer months, is great.

## Pumping Station.

During July and August a new underwriter duplex fire pump, having 16-inch steam cylinders, 9-inch pump cylinders and all 12-inch stroke, made by the Geo. F. Blake Manufacturing Company, was installed in our pumping station. It has a capacity of 750 gallons per minute, and is to be used as an emergency pump in case of accidents or repairs to the old pump. It was started on August 9th and found to work well.

On August 16th the old pump was stopped for repairs. The steam end proved to need packing, the plungers on the water end were much corroded and worn, and it was decided to put in new plungers, at the same time increasing their diameter to 9 inches. On September 3d the pump was tested and found not to work as expected. A close

examination revealed a bad crack in the pump cylinder, which, judging from its appearance, had existed for a long time. It being impossible to repair this break, a new cylinder was put in place October 2d. Since then the old pump has been in successful use. Had the installation of a second pump been longer delayed, we should probably have had serious trouble. The apparent excess of water pumped during a part of last year may have been due to this break, and also to the plunger leakage, both of which necessarily developed very slowly. A rigid frequent inspection has now been instituted which will doubtless prevent a recurrence of trouble of this kind. The appropriation of the emergency pump was $1500. The cost of installing was $1424.66.

Table IV. gives the statistics of the Pumping Station for the year 1897, with appended columns at the right giving corresponding statistics for 1895 and 1896. On account of the break in the pump cylinder the records between July '96 and January '97 are too high. An attempt has been made to correct the records from January to July '97 by making an allowance for leakage. The records from August to December '97 inclusive may be relied upon; comparing these with the corresponding records of 1895 it will be seen that the demand for water is decidedly on the increase.

## Stand-Pipe.

During the spring the stand-pipe will be cleaned and painted on the inside; the outside is now in good condition.

## Reservoir and Brook.

The riprap around the Reservoir and the brook, so far as controlled by the town, has been cleaned and put in good

condition. On account of putrid vegetable matter and algae in the water it was necessary, during the summer, to fill with gravel the small pond at the point where the brook enters the Reservoir. The brook now flows through this filling, its banks being suitably riprapped. The filters have had a new top-dressing applied, as has been previously explained. All is now in good order.

## Meters.

Those in use last year have been continued at the rate then fixed, 30 cents per 100 cubic feet (which is equivalent to 40 cents per 1000 gallons), to which is added a meter rental of $3.00 per year.

The results from meters placed in dwelling houses to ascertain the water consumption were as follows:

In one full-plumbed house, on the low service, occupied by a family of six persons, the average consumption from January 10th to June 6th was 118.5 cubic feet, no garden hose being used. From June 7th to October 10th garden hose was used bringing the consumption up to 246 cubic feet per week. From October 11th to January 9th, 1898, the consumption was 116 cubic feet per week, no hose being used. The total register for the year was 8423 cubic feet, which at 30 cents per 100 cubic feet gives $25.27; adding a meter rent of $3.00 makes the meter charge $28.27. The water rate charged was $28.00. On the basis of 118 cubic feet per week for domestic use and 30 cents per 100 cubic feet, the meter rate would have been $18.41 + $3.00 = $21.41, while the rate now charged is $25.00. On the same basis the charge for use of hose by meter in this, a very wet year, would have been $6.86. The charge now is $3.00.

In a second full-plumbed house on the high service, with a family of eight, the consumption for the year was 14,327

cubic feet, an average of 275.5 cubic feet per week. The meter rate here would have been $42.98 + $3.00 = $45.98; the rate charged was $28.00. In a house on the low service, having only one faucet, 1957 cubic feet were consumed during the year. The meter charge here would have been $5.87 + $3.00 = $8.87. The rate charged was $6.00. These examples are too few to base much reliance upon, however; it appears that if meters were used the water rates for domestic use would probably be diminished and those for use of hose increased. The rate for a single faucet is about right either way as far as concerns water used, but the meter rent makes the charge by meter higher. During a dry year the meters would give an accurate record of water used through hose, and would, therefore, be of value. The use of meters is the only rational method of making charges, but the expense of installation, about $10 per meter, with cost of repairs and renewals, about $3.00 per year, makes their introduction at this time questionable. It should be observed that our water rates and meter charges are necessarily high to insure sufficient income to operate the works.

## North Brook.

On careful investigation the Board found that it would not be expedient to do more than remove the visible means of contamination of the brook at its sources this year. A satisfactory arrangement was made with the farmers on the water-shed to keep their fertilizing material a safe distance away during this year for the sum of ten dollars. The danger cannot be wholly removed without the purchase or control of the entire property on the water-shed.

## Village Brook.

On account of the wet summer it was not possible to

direct the brook as proposed. It also seemed wise to postpone action until the question of a sewerage system for Lexington was settled. The appropriation, therefore, remains unexpended.

## Lexington Sewerage System.

During the year the town of Lexington applied to the Metropolitan Sewerage Commission to be admitted to the Metropolitan System. This Board has attended several meetings before the State Board of Health to discuss and make provisions for the proper protection of our water supply, in case of the construction of the contemplated sewerage system, which necessarily locates pipes on our water-shed. These are at some points above the ground water, and at others below; leaky joints would thus contaminate our supply when above the standing ground-water, and would drain off the supply when below. It is believed that by the use of iron pipe with leaded joints on our entire water-shed most of the trouble will be prevented, and the State Board of Health will no doubt insist upon this. Such protection, however, must be constantly watched to keep it efficient, and it is a question whether it can be safely relied upon for any great length of time.

## Fire Protection.

To make up for the small size of our low service pipe, and to keep up the pressure in the lower part of the town, the high and low systems have been connected at the Town House. A 4-inch pipe from the high service leads through a reducing valve to a 6-inch pipe to the low service. This valve is so adjusted that a pressure of 40 lbs. to the square inch is maintained in the low-pressure system. We have not yet had an opportunity to try this appliance in case of a fire, but there is no doubt that it will work satisfactorily.

The cost of the connection was about $195; the appropriation was $220. A high-service hydrant has been placed on Medford street, as previously noted.

## Registrar's Record.

During the year the fittings supplied by every service have been inspected carefully, and a new record has been made by use of the card-catalogue system. To the end that the Registrar might keep the accounts on a new plan adopted by the Board the following rules were made, and notices embodying them were sent out with the bills on July 1st.

First. Services, or service pipes, will be numbered and accounts will be kept with such numbers only.

Second. When a dwelling house, supplied by means of one service pipe is occupied by more than one family, and when the piping is so arranged that the water cannot be shut off from each family separately, but one bill will be made out to the owner, who must pay the water rates.

Third. In case a double house is supplied by one service and so arranged that each side can be shut off separately, two bills may be made out, one to each tenant. It is, however, preferred that in all such cases the owners pay the rates.

Fourth. When a dwelling-house is arranged in suites the owner must pay the water rates.

These rules place the burden of collecting the water rates on the owner where it belongs, in cases where one pipe supplies more than one tenant.

## Uses and Income.

From the catalogue of services and books of the Water Registrar the following table has been prepared, showing the number of fixtures supplied and the probable income for the coming year at the present rates.

| | | High. | Low. |
|---|---|---|---|
| Number of Services, | | 316 | 1,008 |
| Houses paying maximum charge of $25.00, | | 104 | 261 |
| First faucets, | | 304 | 1,126 |
| Additional faucets, | | 612 | 1,225 |
| First bath-tubs, | | 214 | 393 |
| Additional bath-tubs, | | | 10 |
| First water-closets, | | 243 | 562 |
| Additional water-closets, | | 101 | 186 |
| Vaults flushed with kitchen sink-water not used in connection with a water-closet, | | 5 | 92 |
| Hand-hose, | | 187 | 382 |
| In stables, horses, | | 24 | 320 |
| cows, | | 20 | 64 |
| Can-rooms and wash-houses, | | 1 | 11 |
| Greenhouses, | | 2 | 16 |
| Hotbed sash at 10 cents each, | | 616 | 8,465 |
| Water motors, | | 2 | 3 |
| Meters, | " | 8 | 3 |
| Fire hydrants, | no income, | 151 | 145 |
| Drinking fountains, | " | 3 | 2 |
| Stand-pipes for street-watering, | " | 3 | 15 |
| Income, 1897, | $23,168 | | |
| Probable income, 1898, | $24,128 | | |

## Stock.

We have on hand, in addition to small quantites of pipe and fittings of all sizes and necessary tools and fixtures for repairing and carrying on the works, about 2400 feet 6-inch pipe, 444 feet 8-inch pipe, 732 feet 10-inch pipe, and 1000 feet service pipe. There are about 50 tons of coal at the Pumping Station.

## Recommendations.

In the matter of the Village Brook, East Lexington, we recommend that nothing be done until the question of a sewerage system for Lexington is settled. This brook is most dangerous in a dry year when we need to take water from the Great Meadows for our low service supply.

In the matter of North Brook we recommend that all visible sources of contamination be removed by making proper agreements with the owners of land on the water-shed. Building on the northerly slope of Crescent hill will render suitable protection more difficult year by year. One solution of the difficulty will be to take such portions of the water liable to contamination through private land to the Mill Brook, thus getting rid of it.

The use of water directly from Munroe's and North Brooks should not continue, and if our water system is to be retained much longer new filters should be constructed on the westerly side of the Reservoir, as recommended last year, and a larger pipe should be laid from the Reservoir to Brattle street.

The following table gives certain statistics from the year 1893 to 1897 inclusive, which deserve careful consideration:

| | 1897 | 1896 | 1895 | 1894 | 1893 |
|---|---|---|---|---|---|
| No. days filter alone was in use | 238 | 240 | 247 | No record | No record |
| No. days filter and brook were in use . . . . . | 127 | 54 | 118 | " | " |
| No. days filter, brook and meadow were in use . . | 0 | 72 | 0 | " | " |
| Total No. services added . . | 133* | 107 | 176† | 65 | 52 |
| Total No. feet of main pipe added . . . . . | 10.664 | 6377 | 69.276† | 1219 | |

* Includes 30 1 1-2-inch services for sewer flushing.
† Installation of greater part of high service.

On account of the wet season we experienced no difficulty with the quantity of our water supply. In spite of this and the consequent high level of the water in the reservoir, we were obliged to use the brook 127 days, while in 1896 it was used only 126 days. Had the season been dry a very different state of things would have obtained.

The number of services added is on the increase and next year's record bids fair to exceed that of this year. The same is true in regard to pipe extensions. The past wet season served only to delay the question of increased water supply which must be faced. The increase in demand due to extensions, the use of sewers, growth in population, will very soon be felt and severely so in a dry season. To purify our system a reduction of the available supply is imperative and meanwhile the demand continues to increase. Extra storage capacity can be had at great expense, but even this will eventually need to be abandoned because of growth in population on our water-shed. These matters compel the Board to earnestly recommend that the question of entering the Metropolitan System be again carefully considered.

Respectfully submitted.

George W. Lane,
Peter Schwamb,
George P. Winn,
*Water Commissioners.*

The color of water is expressed by numbers which increase with the amount of color. Boston water, as drawn from a tap at the Institute of Technology, had an average color in 1896 of 0.49. Other water supplies in the State had an average color of from 0 to 1.34.

All waters containing suspended matter, excepting ground waters which contain a large quantity of iron, are filtered through filter paper before determining the color and residue on evaporation. Occasionally these determinations are also made on the unfiltered water, the results in such cases being indicated by an asterisk.

NOTE.—The records from July '96 to August '97 are liable to be in error due to leakage in the pump cylinder.

# REPORT

OF THE

# SUPERINTENDENT OF THE WATER WORKS

*To the Arlington Water Commissioners:*

GENTLEMEN: — My report for the year 1897 is hereby respectfully submitted.

## EXTENSION OF MAINS.

During the past year there have been laid 13783 feet of pipe; 3453 feet 10-inch, 1953 feet 8-inch and 8377 feet 6-inch pipe; 26 hydrants and 20 gates set, divided as follows:

**Vine Street.**

| | | |
|---|---|---|
| labor, | $124 50 | |
| 408 feet 6-inch pipe, | 130 56 | |
| lead, | 14 82 | |
| gate and gate-box | 13 25 | |
| special, | 3 50 | |
| | | $286 63 |

**Lowell Street.**

| | | |
|---|---|---|
| labor including rock excavation, | $346 50 | |
| 879 feet 6-inch pipe, | 281 28 | |
| lead, | 31 59 | |
| 2 5-inch hydrants, | 56 00 | |
| 1 6-inch gate and gate box, | 13 25 | |
| specials, | 7 00 | |
| | | $735 62 |

**Kensington Park.**

| | | |
|---|---|---|
| labor including rock excavation | $245 87 | |
| 213 feet 6-inch pipe | 68 16 | |
| lead, | 8 19 | |
| gate and gate box, | 13 25 | |
| special, | 3 50 | |
| dynamite, fuse and caps, | 10 00 | |
| | | $348 97 |

**Cleveland Street.**

| | | |
|---|---|---|
| labor, | $81 25 | |
| 875 feet 6-inch pipe, | 270 00 | |
| lead, | 31 92 | |
| two 5-inch Chapman valve hydrants, | 54 00 | |
| one 6-inch gate and gate box, | 13 25 | |
| specials, | 7 00 | |
| | | $457 42 |

**Arlington Street.**

| | | |
|---|---|---|
| labor, | $145 72 | |
| 1675 feet 6-inch pipe, | 536 00 | |
| lead, | 61 32 | |
| three 5-inch hydrants, | 81 00 | |
| three 6-inch gates and gate boxes, | 39 75 | |
| specials, | 14 00 | |
| | | $877 79 |

**Broadway.**

| | | |
|---|---|---|
| labor, | $1066 18 | |
| 3453 feet 10-inch, 1666 feet 8-inch, 40 feet 6-inch pipe, | 3106 16 | |
| lead, | 269 26 | |
| 8 5-inch hydrants, | 216 00 | |
| two gates and gate boxes, | 41 50 | |
| specials, | 107 38 | |
| | | $4806 48 |

**Hibbert and Silvia Streets.**

| | | |
|---|---|---|
| labor including rock excavation, | $804 12 | |
| 2013 feet 6-inch pipe, | 644 16 | |
| lead, | 76 44 | |
| five 5-inch hydrants. | 135 00 | |
| three 6-inch gates and gate boxes, | 39 75 | |
| specials, | 31 67 | |
| | | $1731 14 |

**Tannager Street.**

| | | |
|---|---|---|
| labor, | $232 50 | |
| 604 feet 6-inch pipe, | 193 28 | |
| lead, | 15 40 | |
| one 5-inch hydrant, | 27 00 | |
| one 6-inch gate and gate box, | 13 25 | |
| specials, | 7 50 | |
| | | $488 93 |

**Wollaston Ave.**

| | | |
|---|---|---|
| labor, | $30 62 | |
| 105 feet 8-inch pipe, | 51 45 | |
| lead, | 5 60 | |
| | | $87 67 |

**Sutherland and Lorne Roads.**

| | | |
|---|---|---|
| labor, | $232 00 | |
| 682 feet 6-inch pipe, | 218 24 | |
| lead, | 28 56 | |
| two 5-inch hydrants, | 54 00 | |
| three 6-inch gates and gate boxes, | 39 75 | |
| specials, | 20 00 | |
| | | $592 55 |

**Davis Avenue.**

| | | |
|---|---|---|
| labor, | $100 87 | |
| 400 feet 6-inch pipe, | 128 00 | |
| lead, | 15 54 | |
| one 5-inch hydrant, | 27 00 | |
| one 6-inch gate and gate box, | 13 25 | |
| specials, | 7 00 | |
| | | $291 66 |

| | | |
|---|---|---|
| labor, | $78 75 | |
| 588 feet 6-inch pipe, | 188 16 | |
| lead, | 22 68 | |
| one 5-inch hydrant, | 27 00 | |
| two 6-inch gates and gate boxes, | 26 50 | |
| specials, | 7 00 | |
| | | $350 09 |

Total amount expended in main pipe, $11267 58

**Service Pipes.**

One hundred and three services have been put in during the year; fifty-five connected with the low and forty-eight with the high service system. Average for each $11.10, total cost $1143.30.

**Repairs on Services.**

Forty-five services have been repaired and six transferred from the low to the high system, three have been lowered where the street grade had been changed.

**The Reservoir and Brook.**

The small pond above the reservoir has been filled in with stone and gravel and the brook riprapped each side as far as the culvert where it empties into the reservoir at a cost of $658.71.

**Filters.**

The filters have been cleaned off and filled about eight inches deep with clean sand and gravel at a cost of $258.29.

**Hydrants and Gates.**

There are now 296 hydrants and 219 gates in use on both systems, all are in good working order, but the hydrants should be painted at the earliest opportunity.

**Leaks in Main Pipes.**

We have had a few leaks in the old cement pipe but none very serious, they have always been promptly repaired with the least possible inconvenience to the water takers.

**Meters.**

Two meters have been added during the year, the total number now in use is nine.

**Shop.**

The shop has been painted with one coat of paint and is in good condition as are also the horses, wagons, stock and tools.

**Standpipe.**

The standpipe ought to be cleaned out and painted inside early in the year, otherwise it is in excellent order.

**Pumping Station.**

A new high pressure Blake Manufacturing Co. pump has been added to the pumping plant, which in case of accident to the older pump can be immediately put in operation. It has already shown the wisdom of the outlay.

**Driven Wells.**

We are employed at present in driving four additional wells, located as far from the meadows as the land owned by the town will permit. We are in hopes that it will increase the quantity, besides improving the quality of the water by lessening the amount of iron it contains. We find by experience that the five wells next the meadow have far the largest quantity of iron and have had three of them shut off the greater part of the last year. Twenty-two wells giving a sufficient supply at present.

In conclusion I wish to suggest to the water takers on the high service system the advisability of putting in reducing valves in their cellars where the street pressure exceeds fifty pounds. The cost would be comparatively small and would secure them against leakage in their plumbing.

THOMAS RODEN,

*Superintendent.*

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1897.

## Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely:

DWELLING HOUSES.

| | |
|---|---|
| Occupied by one family, for the first faucet, | $6 00 |
| For each additional faucet, to be used by the same family, | 2 00 |
| For set tubs not supplied with faucets and filled by hose or other means, and for faucets supplied with portable tubs, the charge will be one-half the regular rates. | |
| For basins not connected, but convenient to other fittings, the rate will be $1.00 per year. | |
| Where a house is occupied by more than one family, one faucet only being used for all, for each family, | 4 00 |
| Where a house is occupied by more than one family, the highest rates will be charged for each family, having the water carried into their part of the house: | |
| For the first bath-tub, | 5 00 |
| For each additional bath-tub, | 3 00 |
| For bath-tubs convenient to faucets, but not connected, the rate will be $3.00 per year, | |
| For the first water-closet, | 5 00 |
| For each additional water-closet, | 3 00 |
| For hopper water-closets, | 8 00 |

| | |
|---|---|
| For vaults flushed with kitchen sink water, in case such vaults are not used in connection with a water-closet, the rate will be $2.00 per year. When such vaults are used in connection with a water-closet there will be no extra charge. | |
| Where bath-tubs or water-closets are used by more than one family, for each family, | $4 00 |
| Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than | 25 00 |

BOARDING HOUSES.

| | |
|---|---|
| For the first faucet, | 10 00 |
| Each additional faucet, | 2 00 |
| Water-closet or bath-tub, when used by boarders, | 10 00 |
| Each additional bath-tub or water-closet, | 3 00 |

STORES, OCCUPIED AS OFFICE, SHOP OR SIMILAR PURPOSE.

| | |
|---|---|
| First faucet, | $6 to $20 00 |
| For each additional faucet, | 2 50 |
| For water-closet or urinal, | 6 00 |

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

| | |
|---|---|
| For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, | $6 to $25 00 |

HOTELS.

| | |
|---|---|
| For each bed for boarders and lodgers, | $3 00 |
| For each bath-tub in a hotel, | 10 00 |
| For each water-closet in a hotel, | 10 00 |

PUBLIC BATHS.

| | |
|---|---|
| For one tub in a public bath-house, | 10 00 |
| For each additional bath-tub, | 5 00 |
| For one water-closet in a public bath-house, | 10 00 |
| For each additional water-closet, | 3 00 |

STABLES.

| | | |
|---|---|---|
| Private Stables. | For the first horse, | 5 00 |
| " | For each additional horse, | 3 00 |
| " | For one cow, | 2 00 |
| " | For each additional cow, | 1 00 |
| Livery, Club and Boarding Stables. | For each horse, | 3 00 |
| Car and Omnibus Stables. | For each horse, | 2 00 |
| Truck and Cart Stables. | For each horse, | 2 00 |
| *Provided*, that in no case shall any stable be charged less than | | 5 00 |

The rates for stables include water for washing carriages without hose; when hose is used $3.00 additional.

HOSE.

| | |
|---|---|
| For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than | $3 00 |

STEAM BOILERS.

| | |
|---|---|
| For each boiler in use not over twelve hours a day, for each horse-power. | 6 00 |

BUILDING PURPOSES.

| | |
|---|---|
| For each cask of lime or cement, | 6 cents |

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than four months a year:

| | |
|---|---|
| For a jet of 1-16 of an inch, | $3 00 |
| " " 1-8 " " | 5 00 |
| " " 1-4 " " | 8 00 |

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners whenever in particular cases in their judgment the interests of the town shall require.

B. DELMONT LOCKE,

*Water Registrar.*

# AUDITOR'S REPORT.

The undersigned hereby certifies that he has audited the books and accounts of B. Delmont Locke, as Treasurer and Collector of the Town of Arlington, also as Treasurer of the Arlington Water Works, for the year 1897, and finds the same correct, with vouchers for all payments, and the balances of cash, as stated by him.

Clarence T. Parsons, *Auditor.*

Arlington Feb. 4, 1898.

# REPORT

OF THE

# SEWER COMMISSIONERS.

---

The work of the Sewer Department for the past year has been carried out on the general plan as described in the printed report published in the early part of the year. Mr. George A. Kimball has continued to be the Engineer under whose supervision the new construction has been conducted.

Mr. Warren W. Rawson was elected a member of the Board of Commissioners for three years, taking the place made vacant by the death of Mr. George D. Tufts.

The details of the work for the year, both in construction and maintenance, are described in the following report prepared by Mr. Robert W. Pond, who has lately been appointed General Superintendent of Sewers and Engineer in charge of Particular Sewers and House Connections. Mr. Pond's report also includes the details of the work on house connections, which has been done under the direction of Mr. Edward Hawes, Jr.

EDWARD S. FESSENDEN,
WINFIELD S. DURGIN,
WARREN W. RAWSON,
} *Sewer Commissioners.*

# Engineer's Report.

*To the Sewer Commissioners of the Town of Arlington.*

Gentlemen—As requested, I submit the following data relative to the Sewerage System for the year ending Dec. 31, 1897.

The construction of sewers has been extended during 1897 by the building of Sections 3 and 4 of the Arlington Sewerage System. Section 3 comprises Broadway, from Alewife Brook, to about 400 feet west of Tufts Street; Arlington Street from Broadway to Massachusetts Avenue; and Cleveland Street from Broadway to the end of sewer built in 1895.

The outlet for this section is by a connection with the Metropolitan Sewer on Broadway at Alewife Brook, excepting about 400 feet on Arlington Street which drains into the Massachusetts Avenue sewer The connection on Broadway at the Metropolitan Sewer included the building of a Tidegate Manhole and Overflow, together with the usual Shut-off and Regulating Manholes.

The work was occasioned, in part, by the development of the property lying between Massachusetts Avenue and Broadway joining and including Cleveland Street.

On April 30, 1897, the Commissioners met to consider proposals for bids. Aab & Co. of Waltham were found to be the lowest of nine competitors, and were awarded the contract.

To provide proper sewerage for the lands on portions of Broadway and Arlington Street it was necessary to depress the pipe so that suitable grades might be secured to drain these portions. This resulted in deep cutting in places, the maximum being 17.6 feet. The character of the soil was of a sandy nature for the most part, with hard clay in the lower strata. Considerable water was encountered, necessitating the laying of an underdrain on Broadway from the regulator to Winter Street, and about 300 feet upon Arlington Street, in order to allow the masonry to set up in place.

While making the connection with the Metropolitan Sewer, owing to the depth of the excavation and the large quantity of ground water, it became necessary to erect a steam pump to relieve the underdrains, the hand pumps having proved inadequate. The work was satisfactorily completed July 21, 1897.

The contract for building Section 4 of the Arlington Sewerage System was awarded to H. A. Hanscom & Co. of West Medford, on July 6, 1897, they being the lowest of seven bidders.

This section comprises Whittemore Street, Avon Place, Palmer Street from Massachusetts Avenue to Broadway and Massachusetts Avenue from opposite Whittemore Street to near Lake Street.

In designing this sewer, which has an outlet through private lands from Whittemore Street by way of the sewer built in 1896, it was found that in order to obtain a proper slope throughout the length of Massachusetts Avenue, which it was proposed to drain, would entail so great an expense on account of the deep cutting in the vicinity of the junction of Massachusetts Avenue and Whittemore Street, that it was deemed advisable to obtain a Right of Way through private property. Accordingly an agreement was entered

into with Messrs Clark and Deering for the above Right of Way, through which the sewer was laid to Avon Place and thence to Massachusetts Avenue

On Massachusetts Avenue, which is about 100 feet wide, the previous method used of laying a sewer beneath each sidewalk was adopted. By this method all congestion of travel, by the blocking of the street was avoided, also the abutters will be saved the cost of laying pipe between the sewer in its present location and the centre of the street when making connections with the sewer.

Throughout this section the soil was sand and dry gravel, and no water was encountered. The work was completed October 8, 1897 in a satisfactory manner. Also, beside the sections mentioned, there was constructed an Extension of the Gray Street sewer running easterly about 130 feet from Jason Street, also on Park Street Place from Park Street westerly about 120 feet through land belonging to Geo. D. Moore. These extensions were built at the request of the owners of the property.

There has been constructed to January 1, 1898, 66,733 feet or 12.64 miles of sewers of which 2.67 miles were constructed the past year. The total cost of sewers, not including those in the Henderson Street district, which were built under a special appropriation, is $151,366.57.

The amount of sewer assessments is $76,713.71 of which $29,012.15 has been collected. There have been 169 assessments apportioned aggregating $11,654.31.

The Sewer Assessment Plans now number 98 and are securely bound in three volumes making them convenient for reference as well as insuring them against loss.

All the main sewer pipe used the past season was purchased in 1896 excepting 756 feet of 10-inch pipe and 7608 feet of 8-inch pipe including branches.

The annexed table gives the locations of the sewers together with the size, length and number of manholes.

## Particular Sewers.

Under this heading is contained all the data relative to the connections between the buildings and the sewers. The method employed during 1896,—all work being done by the Town,—has been continued the past year.

To January 1, 1898, there was a total of 241 connections made with the main sewers, draining 279 buildings and representing a length of 15,974 feet or 3.02 miles, of which 7633 feet or 1.44 miles were laid during the season of 1897, at a cost of $5,271.68. The labor for the year, which includes superintendence, teaming and use of tools, cost $3,681.01, and the materials used $1,590.67, on a total of 129 connections.

The price per linear foot ranges from 34 cents to $1.56, and the average cost of 69 cents per foot includes the building of 16 manholes, the replacing of 16 patches of concrete in sidewalks, miscellaneous plumbing work amounting to $327.95, and the filling of 14 cesspools encountered in making connections.

Early in the season the Commissioners purchased a quantity of 4-inch cast-iron soil pipe to be used under foundation walls and thus were able to furnish the same at a much less expense than would otherwise be possible.

Reference to the annexed table will give the number of connections, together with the buildings drained into each street, and the estimated number of persons using the sewers.

## Maintenance.

The working of the sewers continues to prove satisfactory. Owing to the comparatively small number of connections, and especially on some of the small lateral lines, where there consequently is a light flow, it becomes necessary to flush the system at regular intervals, usually once in three or four weeks. The flushing is accomplished by plac-

ing movable plugs in the manholes, which are released after the manhole is filled with water from the water-mains.

Heretofore, it has been the custom to fill the manholes from nearby hydrants, but late in the year 30 connections direct into the manholes from the water-mains have been made and it is intended in the near future to equip the few remaining end manholes in like manner. By this means there will be a great saving in labor which has previously been required.

A growth of gelatinous matter accumulates in the Decatur and Henderson Street sewers, also an amount of scum near the outlets, which will not flush out but is removed by drawing a scraper or brush through the pipe.

Since the beginning of the Sewerage System, the Town has been obliged to hire engineering instruments. To provide for the continued need in the future the Commissioners, in December, 1897, purchased a new Buff & Berger Engineering Transit which will prove of great value to the Department.

Respectfully submitted,

ROBERT W. POND.

# REPORT

OF THE

# ARLINGTON PARK COMMISSION.

---

ARLINGTON, Mass., December 31, 1897.

In accordance with a vote of the Town at a Town Meeting held on the evening of Dcember 19th, 1895, the Commission, on April 9th, 1897, executed an instrument of taking, as described in the second part of Chapter 267 of the Acts of 1896. This included not exceeding 10 acres of land within the specified section bounded by Medford Street, Mount Pleasant Cemetery and other lands of the Town, Lower Mystic Pond and land of Niles, Mystic and Chestnut Streets. It consists of twelve parcels of land, owned or supposed to be owned by the following :–

Parcel No. 1, J. O. Goodwin.
" " 2, Warren A. Peirce and others.
" " 3, Devisees under the will of Wm. Stowe.
" " 4, A. E. Aldrich.
" " 5, Richard Irwin.
" " 6, S. A. Fowle.
" " 7, John M. Mulcahey.
" " 8, Bartholomew McGrevy.
" " 9, John M. Mulcahey.
" " 10, Division 23, A. O. H.
" " 11, Heirs of S. G. Damon.
" " 12, John J. Williams.

Of the above twelve parcels of land, the Devisees under the will of Wm. Stowe, Messrs. A. E. Aldrich, S. A. Fowle, John M. Mulcahey, Bartholomew McGrevy, and John J. Williams, have deeded to the Town the land taken, in consideration of a release by the Town of Park betterments on account of this taking. Others have signified their intention of doing the same.

Our expenditures on account of the purchase of lands for Public Parks have been —

| | |
|---|---|
| Teaming and setting bounds, | $44 00 |
| Counsel fees, | 380 25 |
| Engineering, | 1,000 47 |
| In settlement with the former owners, | 6,994 50 |
| | $8,419 22 |

Our expenditures for maintenance and construction have been —

| | |
|---|---|
| Printing Rules and Regulations for Menotomy Rocks Park, | $7 50 |
| Printing notices, | 6 75 |
| | $14 25 |
| Sign boards and seats for Menotomy Rocks Park, | 87 26 |
| Teaming filling for Cemetery Park, | 430 08 |
| Police service, Menotomy Rocks Park, | 35 00 |
| Total, | $566 59 |

Respectfully submitted.

J. Q. A. BRACKETT,
W. W. KIMBALL,
S. FREDERICK HICKS,
*Arlington Park Commission.*

---

*To the Inhabitants of the Town of Arlington:*

The School Committee make the following report for the year ending December 31, 1897: —

The Committee organized on the third day of March, 1897, with the choice of William H. H. Tuttle as Chairman and Mrs. Georgiana M. Peatfield as Secretary, the Committee then consisting of Mr. Timothy O'Leary, Mr. Peter Schwamb, Mr. Joseph C. Holmes, Mrs. Grace E. Kimball, Mr. Herbert H. Ceiley, Mr. Edwin Prescott, Mr. J. Howell Crosby, and also the persons chosen chairman and secretary.

In the month of March, 1897, Messrs. Holmes, Ceiley, Crosby and Prescott resigned, and at a joint meeting of the Boards of Selectmen and School Committee held on the twenty-ninth day of March, 1897, the vacancies were filled in the following manner: Mr. John H. Perry was elected in place of Mr. Holmes, Dr. Andrew F. Reed was elected in place of Mr. Prescott, Mr. Walter A. Robinson was elected in place of Mr. Ceiley, and Mrs. Amy B. Wood was elected in place of Mr. Crosby.

The recommendation of the former Committee and the appropriation made by the town did not contemplate the employment of a superintendent. The Committee are not prepared to recommend the employment of a superintendent for the coming year.

It seems best to wait until there is a greater certainty of getting superintendence of a good quality for the compensation which the Town can reasonably afford to give, or until more urgent necessity compels action.

The policy of giving one of the principals of the Grammar schools supervisory powers over all the grades below the ninth grade has been considered, and the Committee report that they do not at present recommend such action.

The matter of a course of study for the High School has been considered. By the close of the present school year, a course which is an outgrowth of former courses will have been completed and in operation, comprising three courses, a "general," an "academic," and a "classical" course. Upon the final adoption of a High School course, the Committee will consider carefully whether sufficient regard has been had for work, and methods of work, which will best qualify pupils for practical business life.

A provisional course of study has been prepared by the Committee for use in the first eight grades, and put in use for the present school year. In determining what its final form and requirements shall be, the actual work of the teachers under it will be, and already is, of the greatest help. We have apportioned the amount of teaching-time to the different subjects, so that pupils in the different schools may receive substantially the same amount of instruction in each subject, and enter the High School with substantially the same amount of knowledge and training. The task of adjusting all matters relating to the true scope of a course of study, the apportionment of time to subjects,

a daily or weekly schedule for the teacher's work, and so giving true progression in school work is not an easy one, and will require time and most careful and intelligent consideration.

In the Locke and Cutter schools, what is known as the two-grade system, that is, a system where two grades are in one room and under one teacher for the year, has been in use for several years, the classes there being of such size that two could be combined in one room. This system has also been in use in the Crosby school. In the Russell School, owing to the increase in the number of school children in the district of that school several classes have become so large that they cannot be successfully handled by one teacher. When a class, as for instance grade 1, is so large that it can be divided into two divisions, each large enough for a single teacher, the difficulty is solved by an additional teacher. In that grade two teachers have been employed for some time past.

When several classes in a school are each too large for a single teacher, and not large enough for two teachers, without an extraordinary outlay for teaching, a two-grade system must be employed in some form. The introduction of this system into the Russell school last September, a matter of pure necessity, as it appeared to the Committee, for the economical management of the school, has caused misapprehension and criticism on the part of some who were not duly acquainted with all the facts. The Committee are adopting no policy in the matter except to relieve present conditions. Some of the Committee however, are of the opinion that the two-grade system or its equivalent is a very great advantage over the one-grade system, as usually managed. In the one grade system where the pupils are all taught together in one class, or where two divisions are made for the purposes of recitation, both making practically

the same progress in any subject, special promotions are almost impossible.

The evil arising from dividing up the graded course of study into years of work, only, has been felt everywhere, and various attempts have been made to overcome it. It is said to have been remedied in nearly one-half the cities of the country by promoting pupils whenever they have completed the work of the different grades, the different classes being separated by intervals of half a year or less than half a year. It has been proposed by some to remedy the evil by dividing classes into different divisions, in the important subjects, each division being allowed to progress as fast as it can. In Cambridge, in some schools at least, the class is divided into what is called an "A" and "B" division, that is, a first and second division, and promotions are made from one division to another as well as from grade to grade. It is not intended to enter upon any new practice here, until it is fully understood and assented to. It is apparent that there is no difference in principle between the two grade system, and a system with its "A" and "B" divisions. Each gives the pupil a recitation and a study period. A study period, where there are two divisions of the same class at about the same place in any subject, the one division reciting, and the other studying, but with its attention necessarily drawn away by oral recitation of a similar kind, fails, and must necessarily fail to give the pupil the fullest power over himself, in his effort to master for himself, without aid, a prescribed task and to resist all distracting influences. The pupils who are engaged in the preparation of the next lesson should be "busy each one by himself, studying the book and mastering its facts and ideas, and comparing them one with another and making the effort to become oblivious of their fellow-pupils, the recitation going on, and the teacher." In this language which has been quoted there

are many who will recognize at a glance the one element which gave strength and power to the willing pupil of the country school with its multiplicity of grades.

The work of the schools has improved during the year, and an increased interest and devotion to their work is plainly visible on the part of the teachers. The Committee have endeavored to recognize and commend good work wherever found, and it has also made due criticism where a school was not up to its proper standard.

The vertical system of writing was by the present board at first permitted in the schools, and shortly afterwards directed to be used in all the schools. The system has worked most satisfactorily. Specimens of writing from the eighth grade pupils, where perhaps the most difficulty would be experienced show that the change was not a troublesome one, and that progress under the new system is easy.

The subject of arithmetic needs a large amount of consideration. It is believed by many that better results should be obtained in all schools, i.e.—in schools everywhere. The times seem to call for a more practical and more living and certain knowledge of arithmetic, and a better mastery of its essential principles.

A course of lectures in reading has been given to the High School under the beneficent provisions of the Nathan Pratt Fund. The importance of good reading is not likely to be over-estimated. In the absence of qualifications to judge as experts in matters of education, it is always safe to follow the leadership of the ablest educators in the country, and especially when they are practically all of one mind. The elements of good reading as they have always been taught, are now taught here. The Committee have carried out the wishes of the people and have returned to the former, the appropriate, the general, and the true method of teaching reading.

The Committee find that in certain neighboring grammar schools what is sometimes called the "Departmental System," has been introduced into the higher grades. Under this system the work of the teacher is specialized, that is, one teacher teaches arithmetic, and another teaches, say, grammar or history, or geography in two or three grades. Finding this system in operation somewhat in the Russell school, the Committee have allowed it to continue without express approval or disapproval.

The "Report of the Committee of Fifteen"—a document written by the United States Commissioner of Education says: "That the specialization of the teacher's work should not be attempted before the seventh or eighth year of the elementary school, and in not more than one or two studies then." By "elementary school" the report means the grades below the High School. The seventh and eighth grades spoken of in that report are about the equivalent of our eighth and ninth grades. As our ninth grade is in the High School Building and subject to certain specialization of work there, it may be questionable whether there should be any departmental or specialized work in the grammar schools.

The above report contains this language: "In the elementary school, for at least six years, it is better, on the whole, to have each teacher instruct his pupils in all the branches that they study, for the reason that only in this way can he hold an even pressure on the requirements of work, correlating it in such a manner that no one study absorbs undue attention. In this way the pupils prepare all their lessons under the direct supervision of the same teacher, and by their recitations show what defects of methods of study there have been in the preparation.

The ethical training is much more successful under this plan, because the personal influence of a teacher is much

greater when he or she minutely knows the entire scope of the school work. In the case of the special teacher the responsibility is divided and the opportunities of special acquaintance with character and habits diminished."

A special appropriation should be made for certain extraordinary repairs for the coming year in connection with the Russell School building to wit:—painting or dressing woodwork outside and inside, renewing treads on the stairways and some flooring, connecting buildings with sewer, filling up of cesspool and changing plumbing incidental thereto, new sinks and traps in the halls, and new and suitable furniture for some of the school rooms.

Miss Laura A. Davis resigned from the English Department of the High School at the close of the spring term, after about three years of very satisfactory work, to accept a call in the English High School of Somerville. Miss M. Cady Roberts was advanced from the ninth grade to fill the vacancy. Miss Caroline M. Weeks resigned at the close of the spring term. Miss Lillian F. Wilkins and Miss Laura M. Sylvester were appointed to fill the vacancies in the ninth grade.

In the Russell School Miss Jane M. Forbush resigned, and the vacancy was filled by Miss Alice B. Hicok. Miss Helen H. Learned was employed as assistant in the first grade from May 17th through June. The increased number of pupils in certain grades in the Russell School, at opening of the fall term, made it necessary to employ an extra teacher, and Miss Cora B. Cook was chosen to assist in these grades.

The increased number of pupils in the Crosby School have made it necessary to open two new rooms there, and Miss Virginia Gray and Miss Maude E. Gilmán were elected additional teachers for that school.

In the Cutter School Miss Antoinette L. Canfield was

appointed to Grade I in place of Mrs. Alice M. Bean, who was transferred to Grade II at the Locke School. Miss Esther C. Glidden resigned in July. Miss Ella R. Stearns was elected teacher of Grade I in Union Hall. Miss Margaret Oakes, who was a very successful teacher, resigned in May on account of ill health, and Miss Sara N. Phelps of Belmont was appointed to fill the vacancy.

The main items of expense in school management, apart from the matter of teachers' salaries, which will always be the greatest item, are books and supplies, fuel and sundries. The amounts expended for these items are to be found in another part of the Town Report.

Finding it more economical the committee purchased last summer supplies and fuel to last through the school year. In addition to these expenses, there was paid for coal for use up to last summer, $362.75. It is estimated that the supplies purchased which are to be used in the year 1898, amount to about $300. That is to say, in addition to a year's purchase of fuel and supplies the committee have expended some $650. The outstanding unpaid bills amount to about $175, consisting of several small bills, and two months' rent of the Robbins Spring House. The unpaid bills for the year 1896 paid during this financial year amount to about $625.

The income for the year 1897 of the Cutter and Russell Funds being $238.75 and $243.81 respectively, has been all expended for school purposes. Including the $200 paid for the lectures in reading, the Committee have spent nearly all the income of the Pratt Fund for the current year. This fund furnishes an income for the use of the High School only, and for certain limited purposes.

The amount paid for salaries of teachers in the year 1897 is $1,738.46 over the amount paid for the same purposes in

the year 1896. The amount paid for janitors for the year 1897 is $421.65 over the amount paid for the year 1896. The amount paid for books and supplies in the year 1897, including those paid for out of the Pratt Fund is $692.80 over the amount paid for in the year 1896. The amount paid for fuel in the year 1897 is $271.65 in excess of that paid in the year 1896. The balance of the town's appropriation unexpended December 31, 1897 is $655.46. To this is to be added $45.17 received for old books, etc., making a total of moneys unexpended Dec. 31, 1897 of $700.63. This amount of $700.63, the Committee recommend to be expended the coming year for the benefit of the schools in addition to the regular school appropriation.

Four new schoolrooms have been opened this year. One in Union Hall, one in the Robbins Spring House, and two in the Crosby Building. The room in Union Hall was mainly equipped with furniture already owned by the town, and one of the two rooms in the Crosby Building was fitted up at the time of the completion of the building.

The other room in the Crosby Building was fitted up this year at a cost of $111.90, and the room in the Robbins Spring House at a cost of $168.51. The rent of Union Hall is $200 per year, and the rent of the Robbins Spring House is $300 from Nov. 1, 1897 to July 1, 1898. Seven of the eight rooms in the Crosby Building are now occupied.

Special mention is made of the interest and helpfulness of the Woman's Club in the matter of beautifying the schoolrooms, in furnishing a work of art for each room.

The Committee will heartily co-operate with all efforts to elevate and dignify the surroundings of school life and work.

The Committee have all given freely of their time to the consideration of all matters pertaining to the welfare of the schools, and have endeavored to make the wisest expenditure of the moneys placed in their hands.

The accounts and records of the Committee have been kept with the greatest fulness and accuracy, and special acknowledgment is hereby made of the untiring and exhaustive work of the present Secretary, in reference to the financial part of her duties.

WILLIAM H. H. TUTTLE,

*Chairman.*

# STATISTICS.

The table at the end of this report indicates 1437 pupils enrolled during the year, 1225 average membership, 1138 average attendance, and 92 per cent. attendance. In 1896 the record was 1341 enrolled, 1176 average membership, 1092 average attendance, and 94 per cent. attendance. The number of different pupils attending school in town during the year 1897 appears to be 96 more than in 1896, and 178 more than in 1895. The difference shows considerable increase in school population and further growth on the part of the town.

At the end of the year, December 23, 1897, there were 1237 pupils divided as follows.

High School, 111; Grade IX, 80, — making 191 in the High School Building. A year ago it was 171.

Russell School, 431. A year ago it was 420.

Crosby School, 243. A year ago 203.

Cutter School, 190. A year ago 169.

Locke School, 182. A year ago 185.

The per cent. of attendance for the year is 92 per cent.

## SCHOOL STATISTICS, FROM JAN. 1, 1897, TO JAN. 1, 1898.

| SCHOOLS. | Number Enrolled | Number Dec. 23, 1897 | Average Number for the year | Average Daily Attendance | Per cent. of Attendance |

# REPORT

OF THE

# CROSBY SCHOOL BUILDING COMMITTEE.

At the Town meeting, March 18th, 1895, it was voted to erect a Grammar School Building in the Crosby District, and an appropriation of $200, was made to secure plans and specifications. The Committee appointed at that time, consisting of W. W. Kimball, Warren W. Rawson, George D. Moore, Walter L. Hill, Edwin Mills and Franklin Wyman, reported at the meeting of July 1st , and recommended the acceptance of plans made by the architects Messrs. Gay & Proctor, and also recommended an appropriation of $38,000 for the erection of the Schoolhouse and $6,000 for the purchase of additional land on Winter Street. The Town made these appropriations and a Building Committee, consisting of Warren W. Rawson, George D. Moore, Edwin Mills, Walter L. Hill and William A. Muller, was appointed.

This Committee held its first meeting July 3rd, 1895, and organized with Warren W. Rawson as Chairman and William A. Muller as Secretary. Twenty-five meetings were held subsequent to this one and bids on the work from more than twenty contractors were received and considered; the Committee finally voted to award the general contract to T. S. Brown of Belmont; the contract for heating and ventilating to Isaac Coffin & Co., of Boston; the contract for plumbing to William Mills & Co., of Boston, and the contract for electric wiring to Reuben W. LeBaron of Arlington.

Having awarded the contracts your Committee found it was impossible to begin operations as there were growing crops on the land, and no provision had been made in the purchase by the Town to compensate the owner. Through the efforts of the Committee, however, $100 was secured to purchase the crops, and permission was given to take possession of the land. The work proceeded without any friction between the builders and the Committee, and owing to the favorable contracts which had been secured, the Committee saw that there would be a considerable unexpended balance of the appropriation, and, therefore, at the Town meeting of April 4th, 1896, requested authority to use any such balance in grading the Schoolhouse lot and in meeting the necessary expenses of the dedication. The Town granted this request, and although your Committee expended considerable in "extras" on the building and paid for the following work; grading the entire grounds, building a sidewalk and placing the curbstone on Winter street, building asphalt and concrete walks, tinting the walls of the halls and school-rooms, the total expense of all amounting to $2521.17, there is still an unexpended balance of $42.50.

The Committee has approved all bills for work on the building, with the exception of one for the amount of $39, which it has refused to approve because of the unsatisfactory condition of the work.

The building was dedicated September 6th, 1896, and a copy of the programme is appended.

## EXERCISES.

1. PIANO SOLO,
   MRS. S. B. WOOD.
2. PRAYER,
   REV. S. C. BUSHNELL.
3. SOLO,
   MRS. G. W. KIMBALL.
4. DELIVERY OF KEYS,
   WARREN W. RAWSON,
   Chairman of Building Committee.
5. ACCEPTANCE OF BUILDING AND TRANSFER TO SCHOOL BOARD,
   EDWARD S. FESSENDEN,
   Chairman of Board of Selectmen.
6. ACCEPTANCE OF BUILDING FOR SCHOOL BOARD,
   SAMUEL H. SMITH,
   Chairman.
7. ADDRESS,
   HON. JOHN H. HARDY.
8. SOLO,
   MRS. G. W. KIMBALL.
9. PRESENTATION OF FLAG,
   W. W. KIMBALL.
10. ACCEPTANCE OF FLAG,
    MISS M. F. SCANLAN,
    Principal.
11. SINGING OF AMERICA,
    AUDIENCE.

# REPORT

OF THE

# TRUSTEES OF THE ROBBINS LIBRARY.

---

*To the Town of Arlington:*

The Trustees of the Robbins Library submit their annual report:

During the past year there has been about the usual rate of increase in the use of the Library, 45,909 books and magazines having been taken out in 1897 as against 42,348 in 1896 and 38,579 in 1895. The Reading Room has been patronized more than ever, the average Sunday attendance being 20, the average weekday attendance 74.

A glass show-case has been placed in the Reading Room for the exhibition of articles of exceptional interest. A collection has been begun by the gift of a pewter flagon from Mr. Wm. R. Cutter of Woburn, which was originally given by Rebeckah Whitmore to "Y$^{e}$ 2$^{d}$ Church of Christ in Cambridge [now Arlington], 1739." Mrs. A. T. Whittemore has loaned to the Library one flagon, four tankards and two pewter plates, which with the forementioned flagon formed part of the original communion service of the First Parish

church of this town. Through the kindness of Mr. Cutter the Library has come into the possession of sundry articles of historic interest relating to this locality, and among them more than a hundred manuscript sermons of the Rev. Samuel Cooke, the first settled minister of this precinct, "who played a great part in this community for more than forty years," from 1739 to 1783.

Mr. Winfield Robbins has continued his well-known generosity by the gift of 31 volumes which have been received from time to time during the year. Among these were a New Testament in Mandarin Chinese and a Corean First Reader. Other books and public documents have been received from Mr. A. P. Stokes, Hon. S. W. McCall, C. H. McCormick, Edward Whymper, F. S. and C. H. Pratt; also the "Advocate" from Mr. C. S. Parker, which continues to print our lists of new books. Complete sets of Carlyle, Emerson, Hawthorne, Holmes, Longfellow and Stowe have been recently added to replace worn or broken editions, also several new periodicals and magazines. Walker's International Atlas and the Standard Dictionary have been added as reference books to the Reading Room at the Heights. During the past year the chimneys of the Library have been rebuilt and additional lights placed in the Reading Room. As more room was needed for our reference books a new series of shelves has been placed on the east and south sides of the Reading Room, with a continuous space on top for magazines. The old bookcases have thus been dispensed with and more floor space obtained. One of the greatest needs of the Library is that of a new printed Catalogue for home use which shall supplement the excellent and complete card Catalogue.

As our last printed Catalogue bears the date of 1889, steps have been taken to issue a new Catalogue at the earliest possible moment.

In the appended statement of the Librarian will be found the statistics for 1897, a list of periodicals now taken, and a statement of the hours during which the Library and Reading Room are open.

Respectfully submitted.

# TOWN WARRANT.

COMMONWEALTH OF MASSACHUSETTS, MIDDLESEX, SS.

**To ALONZO S. HARRIMAN, a Constable of the Town of Arlington, in said County, GREETING:**

In the name of the Commonwealth of Massachusetts you are hereby required to notify and warn the inhabitants of the Town of Arlington, who are qualified to vote in elections and town affairs, to assemble in the Town Hall,

## on Monday, the seventh day of March next,

at 6 o'clock A. M., then and there to act on the following articles, viz.:—

ART. 1. To choose a Moderator to preside in said meeting.

ART. 2. To elect a Town Clerk for the ensuing year.

ART. 3. To elect a Town Treasurer and Collector for the ensuing year.

ART. 4. To elect one Selectman for the term of three years.

ART. 5. To elect one Assessor for the term of three years.

ART. 6. To elect four members of the School Committee, viz.: three for three years, and one for one year.

ART. 7. To elect one Water Commissioner for three years.

ART. 8. To elect one member of the Board of Trustees of the "Pratt Fund" for the term of five years.

ART. 9. To elect one member of the Board of Commissioners of the "Sinking Fund" for the term of three years.

ART. 10. To elect two trustees of the Robbins Library for the term of three years.

ART. 11. To elect one member of the Consolidated Board of trustees of "Soldiers' Monument and Robbins' Fund" and of Cemeteries, for three years.

ART. 12. To elect two Auditors and five Constables for the ensuing year.

ART. 13. To elect one Sewer Commissioner for three years.

ART. 14. To elect one Park Commissioner for three years.

ART. 15. To elect one member of the Board of Health for three years.

ART. 16. To elect all other necessary Town Officers for the ensuing year.

ART. 17. To bring in their ballots, "Yes," or "No," in answer to the question, "Shall license be granted for the sale of intoxicating liquors in this town?" in accordance with Section 5 of Chapter 100 of the Public Statutes of Massachusetts.

*All town officers who are by law required to be chosen by ballot, except the Moderator, are to be voted for on one ballot. The polls will be opened as soon as possible after the organization of the meeting and kept open until five o'clock, P. M.*

ART. 18. To hear and act on the reports of the Selectmen and other Town officers and Committees heretofore appointed.

ART. 19. To act on the list of Jurors as revised by the Selectmen.

ART. 20. To see if the Town will cause one of the church bells to be rung daily (Sundays excepted) at twelve o'clock, M. and nine o'clock, P. M.

ART. 21. To make an appropriation for the Robbins Library for the ensuing year.

ART. 22. To make an appropriation for the Public Schools for the ensuing year and determine in what manner the same shall be expended.

ART. 23. To determine in what manner the Town ways, highways and bridges shall be repaired the ensuing year.

ART. 24. To determine what sum of money the Town will raise by general tax, to defray Town expenses, interest, debt and State Aid, and make an appropriation for the same.

ART. 25. To see if the Town will appropriate the sum of one hundred and seventy-five dollars for the proper observance of Memorial Day, the same to be expended under the direction of Francis Gould Post 36, G. A. R.

(This article is inserted at the request of Charles S. Parker and others.)

ART. 26. To see if the Town will authorize the Town Treasurer, under the direction of the Selectmen, to borrow money for any necessary purpose, in anticipation of the collection of taxes the current year, the same to be repaid directly from the proceeds of said taxes.

ART. 27. To see if the Town will adopt Section 11 of Chapter 481 of the Acts of Massachusetts of the year 1894, and also sections 12 and 13 of said Chapter, relative to the regulation and inspection of buildings. Said sections are as follows:—

Section 11. With the exception of Boston each city or town which has adopted chapter two hundred and forty-three of the acts of the year eighteen hundred and seventy-two, or section one of chapter one hundred and four of the Public Statutes, or which adopts this section, may, for the prevention of fire and the preservation of life, by ordinances or by-laws not repugnent to law and applicable throughout the whole or any defined part of its territory, regulate the inspection, materials, construction, alteration and use of buildings and other structures within its limits, excepting such buildings and structures as are owned or occupied by the United States or the Commonwealth, and excepting also, bridges, quays, and wharves, and may prescribe penalties not exceeding one hundred dollars for each violation of such regulations.

Section 12. In a town which has adopted chapter three hundred and seventy-five of the acts of the year eighteen hundred and seventy, or section two of chapter one hundred and four of the Public Statutes, or which adopts this and the following section, no dwelling house or other structure more than eight feet in length or breadth and seven feet in height, except detached houses or structures situated more than one hundred feet from any other building, and wooden structures erected on wooden wharves, shall be built within such limits as the town may from time to time prescribe, unless made of and covered with some incombustible material, or unless a special license in writing is granted therefor by a majority of the Selectmen for reasons of public good or necessity, and is recorded in the records of the town.

Section 13. Any building or structure erected in violation of the provisions of chapter three hundred and seventy-five of the acts of the year eighteen hundred and seventy, or of section two of chapter one hundred and four of the Public Statutes, or in violation of the preceding section, shall be deemed a common nuisance, without any other proof thereof than proof of its use; and the Selectmen may abate and remove any such building or structure in the same manner as boards of health may remove nuisances under sections twenty-one, twenty-two and twenty-three of Chapter eighty of the Public Statutes.

(This article is inserted at the request of George D. Moore for committee.)

ART. 28. To see if the Town will authorize the Town Treasurer, under the direction of the Selectmen, to issue new bonds or notes of the Town, for the unexpired term or terms of said bonds or notes, in place of those now held by the Sinking Fund Commissioners or take any other action thereon.

(This article is inserted at the request of the Sinking Fund Commissioners.)

ART. 29. To see if the Town will appoint a committee to investigate and ascertain as to the expediency of building a hose house and the expense and location thereof, in the easterly part of the Town, and report at an adjournment of this meeting, or at a future Town meeting.

(This article is inserted at the request of W. W. Kimball and others.)

ART. 30. To see if the Town will vote to lay out and establish as a town way the way called Cleveland street, as laid out by the Selectmen, said way being bounded and described as follows:—Beginning on the northeastly side line of Massachusetts avenue at a mark on a stone post, distant 261.99 ft. from the southeasterly side line of Winter street, measured on the said northeasterly side line of Massachusetts avenue: thence the line runs north 55° E. 1602.10 ft. to a stone bound on the southwesterly side line of Broadway.

The above described line is the northwesterly side line of said street, and the southeasterly side line is parallel thereto, and 45 ft. distant therefrom. Said above lines are more fully shown on two plans entitled "Plan and Profile of Cleveland street, Arlington, Mass., for Acceptance." Scale 40 and 6 ft. to an inch, dated January, 1898, and made by H. S. Adams, C. E., on file in the Town Clerk's office.

ART. 31. To see if the Town will vote to lay out and establish as a town way, the way called Laurel street, as laid out by the Selectmen, said way being bounded and described as follows:—Beginning at a stone bound on the southeasterly side line of Cleveland street, distant 1035 ft. northeasterly from the northeasterly side line of Massachusetts avenue, measured on said southeasterly side line of Cleveland street; thence the line runs south 35° E. 200 ft. to a stone bound on the northwesterly side line of Marathon street, distant 1048.08 ft. northeast from the northeasterly side line of Massachusetts avenue, measured on said northwesterly side line of Marathon street.

The above described line is the southwesterly side line of said Laurel street and the northeasterly side line is parallel thereto and 45 ft. distant therefrom. Said above described lines are more fully shown on a plan entitled "Plan and Profile of Laurel street, Arlington, Mass., for Acceptance." Scale 40 and 6 ft. to an inch, dated January, 1898, and made by H. S. Adams, C. E., on file in the Town Clerk's office.

ART. 32. To see if the Town will vote to lay out and establish as a town way, the way called Marathon street, as laid out by the Selectmen, said way being bounded and described as follows:—Beginning at a stone bound on the northeasterly side line of Massachusetts avenue, distant 507.51 ft. southeast from the southeasterly side line of Winter street, measured on said northeasterly side line of Massachusetts avenue; thence the line runs N. 55° E. 1661.78 ft. to a stone bound on the southwesterly side line of Broadway.

The above described line is the northwesterly side line of said street, and the southeasterly side line is parallel thereto and 45 ft. distant therefrom. The above lines are more fully shown on two plans entitled "Plan and Profile of Marathon street, Arlington, Mass., for Acceptance." Scales 40 and 6 ft. to an inch, dated January, 1898, made by H. S. Adams, C. E., on file in the Town Clerk's office.

ART. 33. To see if the Town will appoint a committee of twenty-one, to whom all articles in the warrant involving the appropriation of money shall be referred, to consider and report at the adjourned meeting.

ART. 34. To see if the Town will take any action for the purpose of increasing, purifying and protecting its water supply.

ART. 35. To see if the Town will make an appropriation for extending and improving its water works.

(These two articles are inserted at the request of the Water Commissioners.)

ART. 36. To see if the Town will make an appropriation for park purposes.

(This article is inserted at the request of the Park Commissioners.)

ART. 37. To see if the Town will appropriate a sum not exceeding one hundred dollars to be expended under the direction of the Selectmen, for the purpose of enforcing or causing to be enforced in said Town the penalties provided by law against any person or persons guilty of a violation of any law in relation to the sale of intoxicating liquor.

(This article is inserted at the request of Wm. A. Muller and others.)

ART. 38. To hear and act upon the report of the committee appointed to consider and report upon the matter of purchasing the land lying between Academy street and the Library lot, as a site for a new Town House.

ART. 39. To see if the Town will vote to purchase as a site for a new Town House, the estate formerly of Jesse P. Pattee, containing about one and one-half acres, and the estate now in the occupation of Alvin Robbins, containing about fifty-three thousand and fifty-eight square feet, on the southwesterly side of Massachusetts Avenue, comprising the lands lying between Academy street and the Library lot, and make an appropriation therefor

ART. 40. To see what action the Town will take in regard to lighting the streets after December 31st, of the present year, the time of the expiration of the existing contract with the Somerville Electric Light Company.

ART. 41. To see what action the Town will take in regard to providing additional school accommodations in the Locke district and making the necessary appropriation for the same.

ART. 42. To see what action the Town will take in regard to providing additional school accommodations in the Cutter district and making the necessary appropriation for the same.

(These two articles are inserted at the request of the chairman of the School Committee.)

ART. 43. To see if the Town will make an appropriation for connecting the Russell School building with the sewer, for painting and repairing the building and refurnishing rooms therein.

(This article is inserted at the request of the School Committee.)

ART. 44. To see if the Town will vote to change the name of Glen Road to Brantwood Road, from its junction with Brantwood Road to its junction with Jason Street.

ART. 45. To see if the Town will vote to accept the bequests given to it under the will of the late Samuel C. Buckman, and take any other action relative thereto.

ART. 46. To see if the Town will appropriate any part of the Sinking Fund in liquidation of the debt maturing the present year.

ART. 47. To see if the Town will vote to sell at par to the Trustees of the Town Funds, any of its bonds hereafter issued, and to authorize the Sinking Fund Commissioners to sell to said trustees at par any bonds of the Town held by them.

ART. 48. To see what action the Town will take with reference to the moneys which shall be received by it from the Commonwealth, by reason of any taking, by the Commonwealth, under Chapter 520 of the Acts of the year 1897, of a portion of the Town Sewers.

ART. 49. To see if the Town will authorize the Selectmen to appoint an Inspector of Wires, and make the necessary appropriation.

ART. 50. To see if the Town will vote to lay out and establish as a town way the way called Ashland street, as laid out by the Selectmen, said way being bounded and described as follows:—Beginning at a point on the southwesterly side line of Appleton street, distant eighty-one (81) feet southeasterly from a stone bound near the junction of Appleton and Vine streets, measuring in a southeasterly direction on said southwesterly side line; thence the line runs south 7 degrees west 352.04 ft. to a point; thence the line runs by a curved line to the right, of 250.87 ft. radius, 186.13 ft. to a point; thence the line runs south 49 degrees 30 minutes 30 seconds west 272.78 ft. to the southeasterly side line of Florence avenue. The above described line is the northwesterly side line of said street, and the southeasterly side line is parallel thereto and 50 ft. distant therefrom. The intersection of said Ashland street with Florence avenue to be by a curved line of 20.15 ft. radius, 48.35 ft. long; the intersection of said Ashland street with Cliff street to be by a curved line of 20.02 ft. radius, 41.3 ft. long; the intersection of said Ashland street with Elmore street to be on the northerly side of said Elmore street by a curved line of 50 ft. radius, 51.80 ft. long; and on the southerly side of said Elmore street with a curved line of 14.85 ft. radius, 27.71 ft. long.

**Hereof fail not, and make due return of this Warrant, with your doings thereon, to the Town Clerk on or before said day and hour of meeting.**

**Given under our hands at said Arlington, this twenty-fourth day of February, in the year of our Lord one thousand eight hundred and ninety-eight.**

**EDWIN S. FARMER,**
